The key is based on the following criteria^{1 2}:

- a) The size of the population (2014 figures, 40% weighting). This criterion reflects the capacity of a Member State to absorb a certain number of refugees;
- b) Total GDP (2013 figures, 40% weighting). This criterion reflects the absolute wealth of country and is indicative for the capacity of an economy to absorb and integrate refugees;
- c) Average number of spontaneous asylum applications and the number of resettled refugees per 1 million inhabitants over the period 2010-2014 (10% weighting). This criterion reflects the efforts made by Member States in the recent past;
- d) Unemployment rate (2014 figures, 10% weighting). This criterion reflects the capacity to integrate refugees.

¹ Calculations are based on statistical information provided by Eurostat (consulted on 8 April 2015).

² The percentage calculations were made to five decimal places and rounded up or down to two decimal places for presentation in the table; allocations of persons were made on the basis of the full figures to five decimal places.
