CERIS Event: Foresight and Key Enabling Technologies

05 - 06 Mar 2024

Poll results

Table of contents

- In which organisation/company do you work?
- Have you already used foresight?
- In which domain have you used foresight?
- What do you think of foresight for security?
- What are the most relevant/valuable KETs for civil security to be included in the next WP or in the next FP10?
- What is needed to boost the development of KETs for civil security? What should be arranged by whom?

In which organisation/company do you work?

Netherlands Police

Mossos d'Esquadra

Gradiant Smiths Detection Jrc CERTH SEREN5 project

RTO Innovation

Riad Alma Mouassine & O.S.J.

European Commission JRC

Research

Gendarmerie

REA (EC)

Fraunhofer INT

SCK CEN

University Rey Juan Carlos

oslo Police University of the Bavarian Police Trilateral Research

REA

Seren5

TNO Sopra Steria

Police NRW Innovation Lab European Commission

ETRA

The Belgian Nuclear Research Center

Have you already used foresight?

Platform design

In which domain have you used foresight?

Horizon scanning

Disaster Risk Management

Government (regional level)

Future society Radicalism

Tracing illicit money flows

Technology for space & defence Defence

Tracing illigit manay flows

Risk management

Platform design

Science

EU policy

Research and innovation

Risks

Policina

Research Roadmaps

Security /Law Enforcement

Fighting crime and terrorism

Policy making

security

The future of democracy

R&D

Civil security

Operations

Space National security

Technologie Scouting

Intelligence

Defense Law enforcement

Financial risk

Innovation Radar Research & development

Criminality

Law enforcement agencies

What do you think of foresight for security?

Only as strong as the data behind it

Should be done collaboratively Clarify market needs

Useful but recognise limited accuracy

Potentially dangerous

Helpful Much needed

involve

Resilience

Needed

interesting Requires robust method

long Securing acciety

Useful Relevant

Risk minimisation

Necessary

Excellent approach

Indispensable

Essential

Think outside the box

Essentially

geopolitical

Should be done Difficult

Strategic tool

Delicate

Crucial

Useful but might be easily wepaoniswd to drain budgets and e

Good thing, change in mindset

Not sure whether it is mature enough

What are the most relevant/valuable KETs for civil security to be included in the next WP or in the next FP10?

Robotics/drones remote management/deployment system

Situational awareness Fake image/fake news detection Secure

Mass Data processing Sensing

Resource allocation

Tackling disinformation

Quantum

Quantum communications

Resilient communities

LLMs Virtual

Software defined Car

Unmanned systems

Biotechnology + AI

Space Technologies Deep fake Deep fakes detection

What is needed to boost the development of KETs for civil security? What should be arranged by whom?

Multistakeholder approaches (& diverse stakeholders)

Revision of procedures and processes

Joint MS procurement Pilots Use EU agencies more actively End user engagement

> **Funding Ethics**

ecosystem involvina Risk appetite

security Rethink traditional procurement datasets level Industrial policy

Creation

Cooperation

Lighthouse Probe

Project2Policy Makers

Network programme wide standalone

industrials

space/connection R+D mandate in public sector researchers Pcp demos

Political vision endusers

Sustainability

Transfer of knowledge and tools to law enforcement

PA procurement commitment
