

About ENLETS

ENLETS works by sharing best practices on a broad level, engaging on mutual priorities and stimulating future projects that can help fill the gaps and known issues facing law enforcement. The environment promotes collaboration and fosters a supportive network, working to help each other through current challenges.

Within ENLETS, Technology Interest Groups (TIGs) are instrumental in propagating best practices, offering a platform where ideas and insights are exchanged to stimulate progress in law enforcement technology across Europe. TIGs are coordinated by a subject matter expert from a member state, with objectives, duration, and membership approved by the ENLETS Core Group.

About TIGs

Based on the strategic goals of the European Network of Law Enforcement Technology Services, the community established Technology Interest Groups. The TIGs work in a structured way and are led by an expert from a member state.

TIGs are formed to achieve ENLETS' objectives and support front line policing, crime and public protection as well as procurement-related challenges. Objectives, duration and membership are described in a Project Initiation Document (PID), approved by the ENLETS Core Group.

There are TIGs dedicated to six different areas:

- Digital Workplace
- Public Order
- C-UAS
- Financial Investigation
- Operational Centres
- Green Policing
