Environmental crimes' intelligence and investigation protocol based on multiple data sources

New generation of technological tools at the service of LEAs/BGs coupled with capacity building package to support investigations at national and cross-border level, while facilitate **collaborative operations** and networking in this domain.

20 PARTNERS (+3 affiliated entities)	9 COUNTRIES	5.9 M€ BUDGET (78% EC grant)	3 YEARS

EMERITUS PLATFORM FOR INTEGRATED INTELLIGENCE

Protocol for waste-crimes investigation

Training programme for environmental crimes investigation

UCs-bases simulation exercises

EMERITUS community of practice

Evidence-based recommendations

Satellite images, Drones, AI to search for waste-related illegal activities

Testing of technologies in simulated environment
- October 2023

Four **use cases** are addressed to ensure that the project results translates into technologies and operative support fitting in real-world scenarios and needs of LEA/BGs.

Water contaminant source detection

Waste storage centres monitoring

Cross-border illegal waste trafficking monitoring

Identification of illegal waste discharge sites in broad areas
