ACKNOWLEDGEMENTS

The indicators used in this report were developed following consultation on the data availability survey with the Working Group on Statistics on Crime and Criminal Justice and in consultation with the EU Network of National Rapporteurs or Equivalent Mechanisms and with the support of Eurostat. The European Commission is grateful to the different services and organisations in each country that were able to provide the data and methodological information requested.

This report has been prepared under Contract No: **HOME/2017/ISFP/PN/THBX/0057** between Lancaster University and the European Commission

LIST OF FIGURES	9
COUNTRY CODES.....	10
ABBREVIATIONS AND ACRONYMS.....	11
EXECUTIVE SUMMARY	12
Introduction.....	12
The requirement to measure trafficking in human beings.....	12
Methodology	12
Findings on Registered victims (identified and presumed)	13
Findings on Traffickers	15
Findings on Impunity.....	17
Progress and remaining challenges	17
KEY FINDINGS	18
Registered victims	18
Traffickers.....	18
1. INTRODUCTION.....	19
1.1 THE REQUIREMENT AND IMPORTANCE OF MEASURING TRAFFICKING IN HUMAN BEINGS.....	19
1.2 Definition of trafficking in human beings	20
1.3 Previous work on data collection on trafficking in human beings by the European Commission.	21
2. METHODOLOGY	21
2.1 Data on victims and traffickers registered with authorities rather than data on all victims and traffickers.....	21

2.2	Details of the data requested	22
2.3	Data Collection Procedures and Coordination	27
2.4	Data provision and remaining gaps	28
2.5	Addressing missing data, the calculation of totals and percentages and approach to errors.....	32
2.6	Progress and remaining challenges	33
3.	VICTIMS	34
3.1	Introduction.....	34
3.2	Registered Victims (identified and presumed): Numbers.....	34
3.2.1	Introduction.....	34
3.2.2	Registered victims (numbers).....	34
3.2.3	Registered victims (proportion of population).....	36
3.2.4	Identified and presumed victims	37
3.3	Assistance.....	38
3.3.1	Registering organisations.....	38
3.3.2	Received assistance	41
3.3.3	Type of assistance received by registered victims.....	43
3.3.4	Reflection period.....	47
3.3.5	Residence permits.....	47
3.3.6	Seeking International Protection Status	49
3.3.7	Cooperation of victims with law enforcement and courts	52
3.4	Forms of exploitation	54
3.4.1	Introduction.....	54
3.4.2	Sexual, labour or other exploitation	55
3.5	Sex and age.....	56
3.5.1	Introduction.....	56
3.5.2	Male and female.....	57
3.5.3	Adults and children.....	58
3.5.4	Sex by age	60
3.5.5	Detailed age	62
3.5.6	Unaccompanied child victims and separated children	63
3.6	Forms of exploitation by gender and age.....	64
3.6.1	Introduction.....	64
3.6.2	Form of exploitation by gender	64
3.6.3	Sexual exploitation by age	69
3.7	Recruitment.....	71
3.7.1	Introduction.....	71
3.7.2	Means of recruitment, by form of exploitation	71
3.7.3	Means of recruitment, by gender and age.....	73
3.7.4	Country of recruitment, by form of exploitation.....	75
3.7.5	Country of recruitment, by age and gender	76

3.7.6 Destination countries.....	77
3.8 Citizenship	80
3.8.1 Introduction.....	80
3.8.2 EU and non-EU Citizens.....	80
3.8.3 Country of citizenship of EU Registered Victims.....	81
3.8.4 Country of Citizenship of non-EU Registered Victims.....	84
3.8.5 Citizenship by form of exploitation	87
3.8.6 Citizenship by gender	88
3.8.7 Citizenship by age	90
3.8.8 Child registered victims by citizenship	91
3.8.9 Nigerian Victims	93
4. TRAFFICKERS.....	95
4.1 Introduction.....	95
4.2 Key Numbers and Actions	95
4.2.1 Introduction.....	95
4.2.2 Suspects: Formal contact with police and/or criminal justice system - Suspected, arrested, or cautioned	95
4.2.3 Prosecutions: Numbers.....	96
4.2.4 Prosecutions: Final decisions made by the public prosecution service	97
4.2.5 Convictions	100
4.2.6 Court judgments.....	101
4.2.7 Criminal sanctions against users of services which are objects of exploitation of victims of trafficking.....	102
4.2.8 Freezing and confiscation of assets of convicted traffickers	103
4.3 Forms of exploitation (sexual, labour, other) and links to organised crime.....	105
4.3.1 Introduction.....	105
4.3.2 Suspects by form of exploitation	105
4.3.3 Prosecutions by form of exploitation	107
4.3.4 Convictions by forms of exploitation.....	110
4.3.5 Organised crime and/or migrant smuggling.....	112
4.4 Gender of trafficker.....	113
4.4.1 Introduction.....	113
4.4.2 Suspects by gender	114
4.4.3 Prosecutions by gender	115
4.4.4 Convictions by gender	116
4.5 Traffickers by age.....	117
4.5.1 Introduction.....	117
4.5.2 Suspects by age	117
4.5.3 Prosecutions by age.....	118
4.5.4 Convictions by age.....	119
4.6 Citizenship of traffickers.....	120
4.6.1 Introduction.....	120
4.6.2 Suspects by citizenship: EU/non-EU citizens	120
4.6.3 Suspects by citizenship: EU citizens	121
4.6.4 Suspects: Non-EU Citizenship.....	124

4.6.5 Suspects, by gender and by citizenship	126
4.6.6 Prosecutions by citizenship	127
4.6.7 Prosecuted persons by gender	129
5. CONCLUSIONS	131
5.1 Introduction.....	131
5.2 Registered Victims, Suspected, Prosecuted and Convicted Traffickers over Time 131	
5.3 Citizenship of Registered Victims, Suspects and Prosecutions	135

EXECUTIVE SUMMARY

Introduction

Trafficking in human beings is the buying and selling of women, girls, men, and boys. It has hugely deleterious consequences for individuals, society, and the economy.

This is the fourth report published by the European Commission that presents a compilation of statistics at the EU Member State level on trafficking in human beings. This data collection exercise approached all 28-Member States and covers the years 2015 and 2016 and updates the 2014 data collection as relevant.

The requirement to measure trafficking in human beings

The gathering and reporting of statistics on trafficking in human beings is required by Articles 19 and 20 of the **European Directive 2011/36/EU on preventing and combating trafficking in human beings and protecting its victims** (1), adopted in 2011. Article 19 of the Directive requires that 'Member States shall take the necessary measures to establish national rapporteurs or equivalent mechanisms. The tasks of such mechanisms shall include the carrying out of assessments of trends in trafficking in human beings, the measuring of results of anti-trafficking actions, including the gathering of statistics in close cooperation with relevant civil society organisations active in this field, and reporting.' Article 20 requires that 'Member States shall transmit to the ATC the information referred to in Article 19'. In the Directive's preamble, paragraph 28 states that '[i]n order to evaluate the results of anti-trafficking action, the Union should continue to develop its work on methodologies and data collection methods to produce comparable statistics on trafficking in human beings'.

Methodology

Data is collected on victims who are registered with authorities and other organisations and on traffickers who are in formal contact with the police and criminal justice system, prosecuted or convicted.

The data is collected from Member States via their national rapporteurs and/or equivalent mechanisms by the European Commission/DG HOME/EU Anti-Trafficking Coordinator (EU ATC), with support from Eurostat. A questionnaire is sent to each Member State with requests for data.

This report provides information on a wider range of issues, or 'indicators', than all previous reports, notably, the Eurostat Statistical working papers on Trafficking in human beings (2013 and 2015¹²) and first Commission progress report³. **This is significant progress in the development of the knowledge base needed to prevent and combat trafficking in human beings.**

While most Member States provided some information, several did not respond to parts of the more detailed requests. Some of the suggestions made in the report refer to how to further

1 Eurostat (2013) Trafficking in human beings - 2013 edition

2 Eurostat (2015) Trafficking in human beings - 2015 edition

³Report on the progress made in the fight against trafficking in human beings (2016) as required under Article 20 of Directive 2011/36/EU on preventing and combating trafficking in human beings and protecting its victims {SWD(2016) 159 final} (COM(2016) 267 final)

improve the quality of the data in similar future data collection exercises.

The data reported below concerns the EU in **the period 2015-2016**. The tables in the Annex include Member States' updated data for 2014. There are no discernible trends in registered victims at the EU level between 2015 and 2016. There are no discernible trends in the number of suspects, prosecutions or convictions at EU level.

Findings on Registered victims (identified and presumed)

Information on victims comes from a range of sources, including: police, nongovernmental organisations (NGOs), border guards, immigration officers, labour inspectors, among others. Registered victims are composed of two categories: presumed and identified. Victims are 'presumed' when they met the criteria of Directive 2011/36/EU but have not been formally identified by the relevant formal authority as victims of trafficking in human beings or who have declined to be formally or legally identified as trafficked. Victims are considered 'identified' for persons who have been formally identified as victims of trafficking in human beings by the relevant formal authority in Member States'. The data on victims concerns 'registered' victims (identified and presumed).

In the period 2015-2016, the number of registered victims of human trafficking in the EU28 was **20 532 (9 147 in 2015 and 11 385 in 2016)**.

✓ *Citizenship of registered victims (identified and presumed)*

Nearly one quarter (22%) of registered victims of trafficking were citizens of the reporting country, in the EU28 2015-2016. Nearly one quarter (22%) were citizens of other EU Member States. **Thus, nearly half (44%) were citizens of the EU and just over half (56%) were non-EU citizens.**

The top five EU countries of citizenship of registered victims in 2015-2016 were Romania, Hungary, the Netherlands, Poland and Bulgaria. **These are the same countries as in 2010-2012 and in the first Commission Progress report.**

The top five non-EU countries of citizenship of registered victims were **Nigeria** (2 094), **Albania** (1 397), **Vietnam** (1 099), **China** (739) and **Eritrea** (287). For 2010-2012, Eurostat found the top five non-EU countries of citizenship of victims of trafficking registered in the EU were: **Nigeria, Brazil, China, Viet Nam, and Russia**. In the first Commission Progress report for years 2013 and 2014, with respect to non-EU citizens, the top five countries with the highest number of victims were Nigeria, China, Albania, Viet-nam and Morocco. In 2015-2016 and 2010-2012 and 2013-2014, **Nigeria, Viet Nam and China** were in the top five countries of citizenship of registered victims of trafficking in the EU.

Around three-quarters (74%) of the registered victims of Nigerian citizenship were trafficked for sexual exploitation. Less than one in twenty (4%) were trafficked for labour exploitation. Nearly one quarter (23%) were trafficked for 'other' forms of exploitation. Nearly half (1 012 out of 2 084) of the victims with Nigerian citizenship were registered as victims in **Italy**; and nearly one quarter (500 out of 2 084) were registered as victims in the **United Kingdom**. The victims were overwhelmingly female (1 483 females and 66 males).

Caution over the interpretation of differences in numbers of registered victims is warranted as authorities, agencies, and organisations may have different practices for identifying victims.

✓ *Member States with the highest number of registered victims*

The top five countries where victims of trafficking are registered are different when the focus is on the proportion of the population rather than on the absolute number. When the focus is proportion (registered victims per million of the population), the top five Member States for registered victims in the period 2015-2016 are: the **Netherlands** (72), the **United Kingdom** (54), **Cyprus** (53), **Hungary** (51), and **Austria** (44). When the focus is on absolute numbers, the top five are the **United Kingdom** (7 071), **Netherlands** (2 442), **Italy** (1 660), **Romania** (1 636) and **France** (1 516). This means that, while the **Netherlands** and the **United Kingdom** are in the top five in both proportional and absolute measures, the other three countries in the top five for proportions are **Bulgaria**, **Cyprus**, and **Hungary**, while for absolute numbers these are **Italy**, **Romania**, and **France**.

✓ *Forms of exploitation*

Sexual exploitation is the most common form of exploitation, accounting for over half (56%) of registered victims of trafficking in human beings. Labour exploitation was the purpose of trafficking for around one quarter (26%) of the registered victims. 'Other' forms account for 18%. Most (2 758 out of 4 509, or 61%) of the registered victims of trafficking for labour exploitation in the EU are found in the UK, so data from the UK significantly changes the proportions of the forms of trafficking in the EU28. (If the UK data were not included, then the proportions change to: sexual 65%, labour 15% and other 20%.)

There is considerable variation between Member States in regard to the different forms of exploitation that come to the attention of authorities and other registering bodies. Some Member States show a higher proportion trafficked for sexual exploitation, whereas others show a higher proportion trafficked for labour exploitation. In 2015-2016, the five Member States with the highest proportion of registered victims trafficked for sexual exploitation were: **Slovenia** (97%), **Hungary** (96%), **Estonia** (83%), **Croatia** (76%), and **Denmark** (76%). The five Member States with the highest proportion of registered victims trafficked for labour exploitation were: **Malta** (84%), **Portugal** (73%), **Czech Republic** (56%), **Belgium** (52%), and the **United Kingdom** (46%).

Children were 23% of the registered victims of trafficking in human beings for sexual exploitation.

The form of exploitation is similar for EU and non-EU citizens. For EU citizens, this is sexual (57%), labour (31%) and other (11%). For non-EU citizens, this is sexual (51%), labour (32%) and other (17%).

✓ *Breakdown by gender and age*

Females were over two-thirds (68%) of registered victims in the period 2015-2016. Without including UK data, this rises to 77%. The forms of exploitation are gendered: some forms affected largely women, others largely men. In 2015 and 2016, females (women and girls) were 95% of registered victims of trafficking for sexual exploitation; males (men and boys) were 80% of registered victims of trafficking for labour exploitation; for trafficking for other forms 68% were female victims and 32% male victims.

In most Member States (23 out of the 27 that provided data), the majority of victims registered in that country were female, though the proportions vary among them. The Member States with the highest proportion of females amongst registered victims in 2015-2016 were: **Slovenia** (97%), **Bulgaria** (92%), **Germany** (89%), **Hungary** (89%), and **Austria** (88%).

Children were almost one quarter (23%) of registered victims of trafficking. In this study 'child'

refers to any person below 18 years of age.

Findings on Traffickers

The data on 'traffickers' concerns three categories: people in formal contact with the police and/or criminal justice system (suspected, arrested or cautioned); prosecutions; and convictions.

Around three quarters of suspects (78%), prosecutions (75%) and convictions (72%) concerned trafficking for sexual exploitation.

Around three-quarters of those suspected, prosecuted or convicted for trafficking in human beings are male. Suspects were 71% male, those prosecuted were 75% male, and those convicted were 71% male in the EU28, during 2015-2016. In most Member States, the majority of traffickers are male.

Most traffickers are adults. A very small proportion of those suspected, prosecuted or convicted of trafficking are under 18 years of age (the threshold of adulthood as defined in the Directive). Adults were 97% of suspects, 94% of those prosecuted, and 99% of those convicted.

✓ Suspected Traffickers

Across the period 2015-2016, 7 503 people were in formal contact with the police and criminal justice system (i.e. suspected, arrested, and/or cautioned). In 2015 the number was 3 331, while in 2016 it was 4 172.

Over three-quarters (78%) of those people were in formal contact with the police and criminal justice system in connection with trafficking for sexual exploitation.

This compares with 15% for trafficking for labour exploitation and 8% for other forms (the percentages do not sum exactly to 100% due to rounding)

There is a high level of variation between Member States in the number of persons brought into formal contact with the police and/or criminal justice system. The five Member States with the highest number of reported persons suspected, arrested or cautioned for the trafficking in human beings were: **Romania** (2 777), **Germany** (1 198), **Czech Republic** (1 148), **Bulgaria** (856), and **France** (465) in 2015-2016.

The proportion of 'suspects' for trafficking for sexual exploitation varied substantially between Member States. It was highest in **Greece** (100%), **Finland** (100%), **Slovenia** (98%), **Germany** (96%), and **Estonia** (83%). It was lowest in the **United Kingdom** (0%), **Malta** (6%), **Slovakia** (11%), **Sweden** (30%), and **Belgium** (42%).

The proportion of suspects for trafficking for labour exploitation varied between Member States. It was highest in **Malta** (94%), **Belgium** (48%), **Spain** (22%), **Latvia** (15%) and **Poland** (8%).

Over three quarters (84%) of suspects with known citizenship held EU citizenship, in the EU28, during 2015-2016. Less than one fifth (16%) held non-EU citizenship during 2015-2016. The top five citizenships of EU suspects in the EU28 during 2015-2016 were: **Romania** (3 280), **France** (612), **Bulgaria** (337), **Germany** (314) and **Latvia** (161). The top five countries for the citizenship of suspected traffickers who do not hold EU citizenship, in the EU28 during 2015-2016, are: **China** (181), **Nigeria** (151), **Turkey** (67), **Albania** (49) and **Morocco** (40).

Three quarters (74%) of suspected traffickers of EU citizenship were male in the EU28 during

2015-2016. Among those of non-EU citizenship, the proportion of males was 54%. Among those of 'unknown, stateless or other' citizenship, the proportion of males was 92%.

✓ *Prosecutions for Trafficking in human beings*

There were 5 979 prosecutions in the period 2015-2016 (3 142 in 2015 and 2 837 in 2016). The Member States reporting the largest number of prosecutions for trafficking in human beings in the period 2015+2016 were: **France** (2 396), **Romania** (817), **Austria** (747), the **Netherlands** (216), and **Greece** (214).

Three-quarters (75%) of those prosecuted, were so in connection with trafficking for sexual exploitation, in 2015-2016 in the EU28. This compares with 2% for trafficking for labour exploitation and 23% for all other forms of exploitation during the same time period.

The proportion of prosecutions for trafficking for sexual exploitation varied substantially between Member States. It comprised 100% of prosecutions in the **Czech Republic**, **Austria** and **Romania** and less than half in **Latvia** (26%), **Lithuania** (18%), and **Malta** (43%).

Among those prosecuted for trafficking in the EU28 during 2015-2016 with known citizenship, 87% held EU citizenship and 13% held non-EU citizenship. Among EU citizens prosecuted for trafficking, in the EU28 during 2015-2016, the countries that contributed most were: **Romania** (44%), **Hungary** (28%), **the Netherlands** (5%), **Italy** (5%) and **Lithuania** (5%).

Among non-EU citizens, the top five citizenships of individuals prosecuted were: **Nigeria** (87), **Albania** (43), **Serbia** (21), **Bosnia and Herzegovina** (19) and **Egypt** (18)

Over three-quarters of those prosecuted in the EU28 from each of the main citizenship categories were male during 2015-2016: EU (78%), non-EU (76%) and 'unknown, stateless and other' (79%).

✓ *Convictions for Trafficking in human beings*

In 2015-2016, there were 2 927 convictions for trafficking in human beings in the EU28 (1 582 in 2015 and 1 345 in 2016). The five Member States with the highest number of convictions for trafficking in human beings were: **France** (1 687), **Romania** (585), **Italy** (146), the **Netherlands** (124), and **Bulgaria** (85) during 2015-2016.

Nearly three-quarters (72%) of those convicted were so in connection with trafficking for sexual exploitation, in 2015-2016 in the EU28. This compares with 1% for trafficking for labour exploitation and 28% for all other forms of exploitation during the same time period. Men were nearly three-quarters (71%) of those convicted for trafficking in human beings.

The proportion of convictions for trafficking for sexual exploitation varied substantially between Member States. It comprised 100% of convictions in **Ireland**, **Latvia**, **Romania** and **Sweden**. It was no more than half in **Estonia** (27%), **Lithuania** (41%) and the **United Kingdom** (50%).

✓ *Court judgments*

There were 3 691 court judgments in the EU28 during 2015-2016 (1 994 in 2015 and 1 697 in 2016). All Member States provided data. Five of them reported no judgments. The Member States with the most judgments were **France** (1 591), **Romania** (737), **Italy** (292) **Belgium** (238) and the **United Kingdom** (153).

Findings on Impunity

For the first time, the report **includes** findings on criminal sanctions against users of services which are objects of exploitation of victims of trafficking in human beings. There were reports of two (2) ‘suspects’ (persons brought into formal contact with the authorities – suspected, arrested, or cautioned), 135 prosecutions, and 18 convictions in the EU28 during 2015-2016 concerning the use of services which are the objects of trafficking in human beings.

Five (5) Member States provided data on this matter, while twenty-three (23) did not. Three Member States reported numbers of suspects, prosecutions and convictions for these offences: **Italy, Romania, and Finland**. Two Member States reported no suspects, prosecutions, or convictions: **Lithuania, and Slovenia**.

The report, further, presents the extent to which Member States report registered victims and traffickers (‘suspects’, prosecutions, and convictions). For EU28, in 2016, this is: 11 385 registered victims, 4 930 suspects, 2 837 prosecutions and 1 345 convictions. Some Member States report nearly as many traffickers (suspected, prosecuted, convicted) as registered victims, while others report far more registered victims than traffickers (suspected, prosecuted, convicted). This ranges, in 2016, from the UK (3 805 victims 152 prosecutions, and 4 convictions) to France (1 516 victims, 1 198 suspects, 1 236 prosecutions, and 785 convictions). Member States may have different strategies, policies or practices regarding the balance of caring for victims and reducing the impunity of traffickers.

More people who are suspected (84%) or prosecuted (87%) in relation to trafficking in human beings hold EU citizenship than do registered victims (44%). Of those with known citizenship, nearly half (44%) of registered victims hold EU citizenship (22% in the same Member State as registration and 22% in a different EU Member State), just over half (56%) hold citizenship in a non-EU country. Over four fifths (84%) of suspects hold EU citizenship (66% in the same Member State as police contact; and 18% in a different Member State), less than one fifth (16%) hold citizenship in a non-EU country. Over four fifths (87%) of those prosecuted hold EU citizenship (75% in the same Member State as the prosecution; and 12% in a different Member State), just over one tenth (13%) hold citizenship in a non-EU country.

Progress and remaining challenges

Trafficking in human beings is a grave violation of human rights and a serious and organised crime, with significantly higher number of victims than those made visible by official counting methods. Measuring trafficking in human beings is challenging.

In the most recent data collection, for 2015 and 2016, more requests for data were made on a wider range of issues than in earlier similarly large data collection exercise. **The deepening of the knowledge base through the data collected constitutes a significant improvement.** Nevertheless, data collection in trafficking in human beings is still under improvement. Definitions and systems are still in the process of development. Despite this, the data collected by the European Commission on registered victims of trafficking is widely regarded as world-leading in its quality.

There has been progress in the increased collection and provision of detailed information on the characteristics of registered victims and the engagement of victims and traffickers with relevant organisations in civil society and authorities in state and criminal justice system.

A remaining challenge is the provision of data on the treatment of (alleged) traffickers by the criminal justice system. A further challenge is the provision of the more detailed information requested on the characteristics of registered victims.

KEY FINDINGS

Registered victims

- ✓ 20 532 victims were registered in the 28 EU Member States over the two years 2015-2016.
- ✓ 68 % of registered victims were female, without including UK data, this rises to 77%.
- ✓ 32 % of registered victims were male, without including UK data, this lowers to 23%.
- ✓ 56 % of registered victims were trafficked for sexual exploitation, without including the UK this percentage changes to 65%.
- ✓ 95 % of registered victims of sexual exploitation were female.
- ✓ 23% of registered victims who were trafficked for sexual exploitation were children.
- ✓ 26% of the registered victims were trafficked for labour exploitation.
- ✓ 18% were trafficked for 'other' forms of exploitation.
- ✓ 23 % of registered victims were children.
- ✓ 44% of registered victims were EU citizens.
- ✓ 22% of registered victims of trafficking were citizens of the reporting country.
- ✓ There are no discernible trends in registered victims at the EU level between 2015 and 2016.

Traffickers

- ✓ 7 503 people were in formal contact with the police and criminal justice system (i.e. suspected, arrested, and/or cautioned) during the two years 2015-2016.
- ✓ 5 979 prosecutions for trafficking were reported during 2015-2016.
- ✓ 2 927 convictions for trafficking in human beings were reported during 2015-2016.
- ✓ Over 70 % of traffickers were male: suspects (71%), prosecutions (75%) and convictions (71%).
- ✓ Around three quarters of suspects (78 %), prosecutions (75 %) and convictions (72 %) concerned trafficking for sexual exploitation.
- ✓ Over three quarters (84%) of suspects and those prosecuted (87%) held EU citizenship.
- ✓ There are no discernible trends in the number of suspects, prosecutions or convictions at EU level.

1. INTRODUCTION

Trafficking in human beings is the buying and selling of women, girls, men and boys like commodities. It has serious detrimental effects on individuals, society and the economy. Trafficking in human beings is driven by high profits for traffickers, which fuel a complex interplay of supply and demand.

Trafficking in human beings is a gross violation of fundamental rights and expressly prohibited by Article 5 (3) of the EU Charter of Fundamental Rights. It is listed as a crime in Article 83 of the Treaty on the Functioning of the European Union; and known as a 'Euro crime'. It is a serious and organised crime and often has a cross border dimension. The Directive 2011/36/EU on preventing and combating trafficking in human beings and protecting its victims⁴ sets forth common minimum standards on the definition of the criminal offence and the penalties applicable, as well as on measures for protection, assistance and support of victims, and prevention of the crime.

1.1 THE REQUIREMENT AND IMPORTANCE OF MEASURING TRAFFICKING IN HUMAN BEINGS

Addressing trafficking in human beings is complex and requires a variety of approaches, one of which is the measurement of the crime, including information on the victims and their support, and criminal justice data on the perpetrators. Understanding the nature, scale and costs of the crime is crucial to ensuring appropriate action at the EU level in order to prevent the phenomenon. Comparable, reliable and comprehensive statistics are crucial in identifying and addressing trends, developing evidence-based policy, and measuring the impact of initiatives.

The gathering and reporting of statistics on trafficking in human beings is required under Articles 19 and 20 of the **European Directive 2011/36/EU on preventing and combating trafficking in human beings and protecting its victims**, adopted in 2011. Article 19 of the Directive requires that 'Member States shall take the necessary measures to establish national rapporteurs or equivalent mechanisms. The tasks of such mechanisms shall include the carrying out of assessments of trends in trafficking in human beings, the measuring of results of anti-trafficking actions, including the gathering of statistics in close cooperation with relevant civil society organisations active in this field, and reporting'. Article 20 requires that 'Member States shall transmit to the Anti-Trafficking Coordinator (ATC) the information referred to in Article 19'. In the preamble, paragraph 28 states that '[i]n order to evaluate the results of anti-trafficking action, the Union should continue to develop its work on methodologies and data collection methods to produce comparable statistics on trafficking in human beings'.

On 19 June 2012, the Commission adopted a Communication on the **EU Strategy towards the Eradication of Trafficking in Human Beings 2012–2016**⁵ ('EU Strategy'). One of the actions in the EU strategy was to develop, together with the Member States, an EU-wide system for the collection and publication of data broken down by age and gender. The Commission has been working with national rapporteurs or equivalent mechanisms towards this aim to ensure the collection of comparable and reliable data.

⁴ Directive 2011/36/EU of the European Parliament and of the Council of 5 April 2011 on preventing and combating trafficking in human beings and protecting its victims, and replacing Council Framework Decision 2002/629/JHA, OJ L 101, 15.4.2011.

⁵ European Commission (2012) *The EU Strategy towards the Eradication of Trafficking in Human Beings 2012–2016*, COM (2012) 286, final.

Building also on the EU Strategy, recently, the Commission Communication on ‘**Reporting on the follow-up to the EU Strategy towards the eradication of the trafficking of human beings and identifying further concrete actions**’⁶ (2017, December) identifies cross-cutting actions for a sound knowledge base as one of the EU’s priorities. One key action includes publishing, in the second Commission Progress Report in 2018, the latest criminal justice statistics at EU level on trafficking in human beings, with support from Eurostat, the national statistical authorities, and the EU Network of National Rapporteurs and Equivalent Mechanisms. This study provides additional details, including methodology, on statistics published in the Commission’s second progress report.

1.2 Definition of trafficking in human beings

The definition of trafficking is provided in the European Union Directive 2011/36/EU on preventing and combating trafficking in human beings, protecting its victims, with transposition date 6 April 2013.

Article 2 of the Directive 2011/36/EU defines the offences concerning trafficking in human beings:

1. Member States shall take the necessary measures to ensure that the following **intentional acts** are punishable: The recruitment, transportation, transfer, harbouring or reception of persons, including the exchange or transfer of control over those persons, **by means of** the threat or use of force or other forms of coercion, of abduction, of fraud, of deception, of the abuse of power or of a position of vulnerability or of the giving or receiving of payments or benefits to achieve the consent of a person having control over another person, for the **purpose** of exploitation.
2. A **position of vulnerability** means a situation in which the person concerned has no real or acceptable alternative but to submit to the abuse involved.
3. **Exploitation** shall include, as a minimum, the exploitation of the prostitution of others or other forms of sexual exploitation, forced labour or services, including begging, slavery or practices similar to slavery, servitude, or the exploitation of criminal activities, or the removal of organs.
4. **The consent of a victim of trafficking** in human beings to the exploitation, whether intended or actual, **shall be irrelevant** where any of the means set forth in paragraph 1 has been used.
5. When the conduct referred to in paragraph 1 **involves a child**, it shall be a punishable offence of trafficking in human beings even if none of the means set forth in paragraph 1 has been used.
6. For the purposes of this Directive, ‘child’ shall mean any person below 18 years of age.

The forms of exploitation listed in the Directive are not exclusive and Member States can include in their national legislations forms in addition to those enumerated.

The definition of additional terms used in the questionnaire and in the tables, which draw from other Articles in the Directive, is provided in the Annex.

⁶ COM(2017)728final

1.3 Previous work on data collection on trafficking in human beings by the European Commission.

Data has been collected since 2008 and published in three Eurostat statistical working papers (see the table below). The first working paper (Eurostat, 2013) covered the years 2008, 2009 and 2010. The second working paper (Eurostat, initially published in 2014, updated in 2015) covered the three years from 2010 to 2012 and increased the detail of what was collected⁷. For the purpose of the first Commission Progress Report⁸, a limited data collection has been undertaken by the European Commission/ EU Anti-Trafficking Coordinator for the years 2013 and 2014. The analysis of the statistical data is available in the staff working document which accompanies the first progress report⁹.

This is the fourth report published at the EU level by the European Commission that presents a compilation of statistics on trafficking in human beings. This data collection exercise approached all 28-Member States and covers the years 2015 and 2016. Member States were asked to provide input or updates for 2014 data already provided to the Commission, based on availability. The data provided for the year 2014 is not at the same level as that collected for 2015-2016, so is provided in the Annex but not the main part of this report.

2. METHODOLOGY

This section describes the nature of the data, the methodology deployed in the collection of the data for this report, the gaps in the data, and the challenges in providing comprehensive, accurate and meaningful data on trafficking in human beings. The data is restricted to victims registered with authorities and traffickers who come into contact with the criminal justice system. The data is collected from Member States via their national rapporteurs and equivalent mechanisms, by the European Commission/DG HOME/EU Anti-Trafficking Coordinator, with support from Eurostat. There are gaps in the data, which vary by member state and level of detail requested.

2.1 Data on victims and traffickers registered with authorities rather than data on all victims and traffickers

Data in this report is drawn solely from administrative sources. It measures the victims and traffickers that have come into contact with a range of organisations within each Member State.

Trafficking in human beings is a crime and as such should be included in EU crime statistics collection. The convention in crime statistics is to count the number of crimes and the number of offenders. In the field of trafficking in human beings, it is important to count the number of

⁷ Eurostat (2015) Trafficking in Human Beings. Eurostat Statistical Working Papers. Luxembourg: European Union. Available at https://ec.europa.eu/anti-trafficking/publications/trafficking-human-beings-eurostat-2015-edition_en

⁸ European Commission, Anti-Trafficking Coordinator (2014) *First Report on the progress made in the fight against trafficking in human beings*. https://ec.europa.eu/anti-trafficking/eu-policy/first-report-progress-made-fight-against-trafficking-human-beings-2016_en

⁹ COMMISSION STAFF WORKING DOCUMENT Accompanying the document REPORT FROM THE COMMISSION TO THE EUROPEAN PARLIAMENT AND THE COUNCIL Report on the progress made in the fight against trafficking in human beings (2016) as required under Article 20 of Directive 2011/36/EU on preventing and combating trafficking in human beings and protecting its victims {COM(2016) 267 final} Available at https://ec.europa.eu/anti-trafficking/sites/antitrafficking/files/commission_staff_working_document.pdf

victims, whether or not crimes are simultaneously registered. This is consistent with the victim-centred approach of the EU legal and policy framework to address trafficking in human beings, and anchored in key legal instruments, including the Victims Directive 2012/29/EU and Directive 2011/36/EU.

For traffickers and suspected traffickers, the sources of data include, police, prosecutors, and courts. There are two units of measurement: apprehended and prosecuted individuals; and cases that are prosecuted (although these were not distinguished during this data collection exercise).

For victims, the sources of data include: police, nongovernmental organisations (NGOs), border guards, immigration officers, labour inspectors, among others. Registered victims are composed of two categories: presumed and identified. Victims are 'presumed' when they met the criteria of Directive 2011/36/EU but have not been formally identified by the relevant formal authority as victims of trafficking in human beings or who have declined to be formally or legally identified as trafficked. Victims are considered 'identified' for persons who have been formally identified as victims of trafficking in human beings by the relevant formal authority in Member States', this is to say after a process that establishes that they are victims; often, but not always, involving the police. 'Identified' and 'presumed' victims are referred together as 'registered victims'.

Information collected on registered victims and traffickers includes not only their number, but also key characteristics that are considered relevant to the evaluation and improvement of policy processes. These include: gender; age; citizenship; form of exploitation.

Victims who are not registered by authorities or other organizations and traffickers not identified by authorities are not included in these figures, as statistics reported to the European Commission are based on administrative data. The actual number of victims is likely to be significantly higher than is the number reported to these administrative bodies. The ratio of known to hidden victims is not known.

There is research that estimates the number of hidden victims. This report does not include estimates of the total number of victims of trafficking in human beings, only of those registered with the authorities or other organisations.

2.2 Details of the data requested

Data was requested for 2014-2016 from the 28 Member States on the number of registered (presumed and identified) victims of trafficking in human beings and on the number of traffickers who were suspected, prosecuted or convicted. Information on a subset of indicators was however optional for 2014

The main part of the report describes the 2015 and 2016 data. In the annex to the report, the complete data provided by Member States is listed and covers all three years of data collection, namely 2014 -2016.

More detailed information on their characteristics was also sought. The 'indicators' for the detailed disaggregation of data requested is provided in Table 2.3.1, using the wording and numbering provided in the questionnaire.

Table 2.3.1: Indicators and Disaggregated Data Requested from Member States, 2015, 2016

VICTIMS (IDENTIFIED AND PRESUMED), DISAGGREGATED BY
1.1 Registering organization
1.2 Gender and age
1.3 Form of exploitation (Identified and Presumed), by gender and age
1.4 Citizenship, by gender and age
1.4b Citizenship, by form of exploitation
1.5 Country of recruitment, by gender and age
1.5b Country of recruitment, by form of exploitation
1.6 Means of recruitment, by age and gender
1.6b Means of recruitment, by form of exploitation
1.7 Country of destination, by gender and age
1.8 Seeking international protection status in the current migration and refugee crisis by gender and age
1.8b Seeking international protection status in the current migration and refugee crisis, by form of exploitation
1.8c Seeking international protection status in the current migration and refugee crisis, by citizenship
1.9 Reflection period and residence permit, by gender and age
1.9b Reflection period and residence permit, by form of exploitation
1.9c Reflection period and residence permit, by citizenship
1.10 Type of assistance and support received, by gender and age
1.11 Number of victims cooperating with law enforcement
1.12 Number of victims testifying in court
PERSONS BROUGHT INTO FORMAL CONTACT WITH POLICE/CRIMINAL JUSTICE SYSTEM, DISAGGREGATED BY:
2.1 Citizenship, by gender and age
2.2 Form of exploitation, by gender and age
2.3 Involvement in organised crime or migrant smuggling
3 PROSECUTED PERSONS FOR TRAFFICKING IN HUMAN BEINGS,
3.1 Prosecuted persons disaggregated by citizenship, gender and age
3.2 Prosecuted persons disaggregated by form of exploitation, gender and age
3.3 Number of final decisions by the prosecution service (for persons prosecuted for trafficking in human beings), by nature of that final decision
COURT DATA ON JUDGMENTS OF TRAFFICKERS BY GENDER AND AGE
4.1 Number of court judgments (including convictions) for trafficking in human beings, by gender and age
4.2 Number of convictions by form of exploitation, by gender and age
4.3 Freezing and confiscation of assets relating to offences of trafficking in human beings
CRIMINAL JUSTICE DATA FOR THE CRIMINAL OFFENCE OF USE OF SERVICES WHICH ARE OBJECTS OF EXPLOITATION OF TRAFFICKING IN HUMAN BEINGS
5 Number of users brought into contact with the police/criminal justice system, number of prosecutions and number of convictions, disaggregated by gender and age

The raw numbers collected for 2014, 2015, and 2016 in the questionnaire are provided in the tables in the Annex. The main body of the report offers more readable summaries of this data for 2015 and 2016. Table 2.3.2 shows the links between the questionnaire, indicators, and Annex Tables.

Table 2.3.2 : Questionnaire, Questions and Annex Tables

2.3 Data Collection Procedures and Coordination

Many organisations assist in the collection of the data on trafficking in human beings. Reporting is coordinated by the European Commission/DG HOME/EU Anti-Trafficking Coordinator. This is specified in Article 19 of the Anti-Trafficking Directive: ‘National rapporteurs or equivalent mechanisms Member States shall take the necessary measures to establish national rapporteurs or equivalent mechanisms. The tasks of such mechanisms shall include the carrying out of assessments of trends in trafficking in human beings, the measuring of results of anti-trafficking actions, including the gathering of statistics in close cooperation with relevant civil society organisations active in this field, and reporting’.

Primary data is collected within Member States by the organisations and authorities that come into contact with victims and perpetrators of trafficking in human beings. These include: police, prosecutors, courts, nongovernmental organisations (NGOs), border guards, immigration officers, and labour inspectors, among others. The tasks of National Rapporteur and/or Equivalent Mechanisms include, among others, the gathering of statistics in close cooperation with relevant civil society organisations active in the field, and reporting, as specified in Articles 19 and 20 of the Directive. Each Member State has a national statistical office, and it is usual that they are involved in EU-level data collection in some way. The EU Anti-Trafficking Coordinator (EU ATC) contributes to Commission reporting on progress in anti-trafficking work within the EU. This is obligation every two years, and there is a clear need to make data collection annual. Where relevant, the EU Anti-Trafficking Coordinator is supported on statistical matters by Eurostat.

Information is collected from Member States using a questionnaire, which is embedded in a spreadsheet. This contains requests for information on key characteristics of registered victims and traffickers, including sex, citizenship, form of exploitation, and so on. This information is variously referred to in the report as ‘indicators’ and ‘disaggregation’. The details or ‘indicators’ sought was based on prior data collections for the Eurostat Statistical working papers on trafficking in human beings and on the 2017 data availability survey.

In preparation for the most recent data collection, a questionnaire on data availability, developed by the EU ATC was sent in 2017 by Eurostat to the national statistical authorities, parallel to which the support of the EU National Rapporteurs and Equivalent Mechanisms (NREMs) was sought. Based on their replies and following consultations with the EU NREMS, on 10 July 2017, the data collection questionnaire on trafficking in human beings was sent by the Office of the EU ATC to the EU NREMs accompanied by detailed guidance for collecting data for the second Commission progress report.

For the current report, Eurostat supported the analysis. Based on Eurostat’s requests for clarifications, the Office of EU ATC contacted NREMs. Received and processed data based on these exchanges have been sent to NREMs for their final validation. The confirmed data by EU Member States were passed to the external contractor of DG HOME/ EU ATC for analysis, who identified further issues, which were addressed through further correspondence by EU ATC and NREMs, although, as specified below, some gaps and errors remain.

Section 5 offers concluding remarks on this data collection.

2.4 Data provision and remaining gaps

There are substantial gaps in the data provided by Member States. These are especially large for the more detailed disaggregation of the data.

While most Member States provided data, some did not provide data for specific years and issues. The number of Member States providing data and the names of those that did not are provided in Tables 2.5.1 for victims and Tables 2.5.2 and 2.5.3 for traffickers (formal contact with the police and prosecutions). Note that for the current data collection we have taken data from the Table in each section with the largest number of individuals, namely Table A1.1 for victims, Table A2.2 for formal contact with the police, and Table A3.2 for prosecutions.

Source: Annex Table 3.2 and earlier reports referenced in Section 1.3. Croatia was included as a Member State from 2010 onwards but formally joined the EU in 2013.

Data is more fully provided on registered victims than on traffickers. Data gaps are less frequent for aggregate data and more frequent for detailed disaggregated data. On registered victims, all

Member States provided some data for most years. Data provision for traffickers was less comprehensive. The number of Member States providing data was fewer in 2015 and 2016 than in 2010, 2011 and 2012. This pattern is found both for data on persons in formal contact with the police (suspected, arrested or cautioned) and for prosecution. On persons in formal contact with the police, 22 Member States provided data in 2010–2012, but only 17 did so in 2015 and 19 in 2016. On prosecution, while in 2011 24 Member States and in 2012 23 Member States provided data, only 19 did so in 2015 and 18 in 2016. The Member States are identified in Tables 2.5.2 and 2.5.3.

In the most recent data collection, for 2015 and 2016, more requests for data were made on a wider range of issues than in earlier similarly large data collection exercise in the 2015 Eurostat Statistical working paper. Table 2.5.4 shows the extent to which Member States have provided data on various issues in 2010, 2011, 2012 as well as 2015 and 2016. **The deepening of the knowledge base through the data collected constitutes a significant improvement.** There are larger gaps in the provision of data for new issues than for those on which data has previously been collected. For some issues, less than half Member States provided data. The gaps in detailed data provision by Member States on traffickers' engagement with the criminal justice system are more substantial than those for victims.

Table 2.5.4: Number of EU Member States returning data on indicators, 2010, 2011, 2012, 2015, 2016

Information on victims	2010	2011	2012	2015	2016

: Data not in 2015 Eurostat working paper

2.5 Addressing missing data, the calculation of totals and percentages and approach to errors

Almost all Member States provided information on the key characteristics of victims, though there are some exceptions. Fewer Member States provided information on the detailed characteristics. Variations in the provision of data by Member States can have implications for the summary figures for the EU 28. Since Member States provided more data for key characteristics than on detailed characteristics, the totals in the tables concerning detailed characteristics are smaller than the totals in tables concerning only key characteristics. These differences are summarised in Table 'Totals and Technical Adjustments', which is provided in the Annex. The summaries for the EU28 for the period 2015 to 2016 include all of the data that any Member State provided (even if they only provided data for one year). Any deviation from this approach is explained in the report. This practice allows for the provision of the maximum information.

Absolute numbers and totals in the reports are as given by Member States and will include unknowns; In contrast total known when reporting on disaggregated characteristics (such as sex, age and from of exploitation) will not include unknowns In principle, the calculation of percentages and proportions uses only those cases where that characteristic is known (excluding those unknown).

Despite early processes to check and improve data, there were remaining issues that were addressed during the preparation of this report. An account of technical adjustments made is provided in the Methodological Table in the Annexes. These issues were of six types:

- a) Missing data. Member States did not always provide data as requested. There is more than one way to address missing data that is correct from the perspective of statistical quality. For the summaries of 2015-2016, all data from all EU28 Member States is included. There is routine provision of Tables of all EU28 Member States to make gaps visible, to assist the making of judgements on the meaning of data at EU28 level. This is a change from Eurostat (2015) where data from MS were only included if they had reported for all three relevant years, 2010, 2011, and 2012; and where detailed information was provided in the Annexes rather than the main report.
- b) Different totals are provided by Member States in different data tables. This appears to be the result of gaps in data provision being greater where more detailed disaggregation was requested. The procedure is to assume that the data table providing the largest total within a broad category (i.e. victims, police contacts, prosecutions or convictions) is likely to be the most

accurate; and the difference between this and the total provided in the detailed tables is assumed to be made up of those whose detailed characteristics are 'unknown'. A Table is provided in the Annex on these numbers.

- c) Missing totals in tables where the member state has not provided data concerning detailed disaggregation. The procedure followed is to report the data provided by the Member State.
- d) Incorrect summation of cells.
- e) Impossible values. These are flagged in Tables.
- f) Lack of metadata given by the member state, reducing capacity to understand data.

The methodological guidelines to the data collection contained advice to Member States to avoid double counting of victims when data is gathered from different services. This report does not make an assessment in that regard.

2.6 Progress and remaining challenges

Measuring trafficking in human beings is challenging.

Trafficking in human beings is a grave violation of human rights and a serious and organised crime, with significantly higher number of victims than those made visible by official counting methods. Although undertaken since 2012, data collection in trafficking in human beings is still under improvement. Definitions and systems are still in the process of development.

There has been progress in the increased collection and provision of detailed information on the characteristics of registered victims and the engagement of victims and traffickers with relevant organisations in civil society and authorities in state and criminal justice system.

A remaining challenge is the provision of data on the treatment of (alleged) traffickers by the criminal justice system. A further challenge is the provision of the more detailed information requested on the characteristics of registered victims.

3. VICTIMS

3.1 Introduction

The data provided concerns victims of trafficking in human beings who have been registered by authorities and/or other agencies and organisations. *The registration of victims is a key step towards making sure they are treated as 'rights holders' have access to their rights and can exercise them effectively. Attention to the characteristics of registered victims is important to provide appropriate assistance and protection and cater for their individual needs, taking into consideration the gender, age and the consequences of the form of exploitation they have been subjected to, and for appropriately addressing and preventing the crime.*¹⁰ Attention to the characteristics of registered victims is important for the development of policies tailored to victims' circumstances.

The chapter starts with an account of the numbers of registered victims, then the forms of assistance that Member States provide to them, then the detailed characteristics of the victims. The sections are thus: numbers; assistance; forms of exploitation; sex and age; form of exploitation by sex and age; means of recruitment and destination; citizenship.

Variations in the numbers of registered victims could potentially be understood in two ways: the number of trafficking victims in the population is different; or authorities, agencies, and organisations have different practices for identifying and engaging with trafficking victims and, thus, registering a different proportion of them. **Thus, caution over the interpretation of differences in numbers of registered victims is warranted.**

3.2 Registered Victims (identified and presumed): Numbers

3.2.1 Introduction

The key characteristics of victims of trafficking in human beings reported by Member States include: numbers; type of exploitation; gender (male or female); age (adult or child); and their cross-tabulations sex by age. Proportion of population is taken into account.

It is not possible to find trends over time in these key characteristics, compared with data from 2010-2012 reported by Eurostat (2015).

Most Member States provided data on these key characteristics. When Member State variation in data provision appeared to make a significant difference to the EU28 level, this is noted.

3.2.2 Registered victims (numbers)

The number of registered victims of human trafficking in the EU in the most recent year for which there is data, 2016, is 11 385. In 2015, the number was 9 147. This makes a total of 20 532 in the period 2015-2016. Table 3.2.2 shows the number of registered victims in each EU Member State in 2015, 2016, and in 2015-2016.

While there might appear to be an increase in victims from 2015 to 2016, the data does not support the conclusion that there is a significant change. Although the number of registered victims is greater in 2016 than in 2015 (by 2 238), this is largely (over 90%) accounted for by one

¹⁰ Commission Communication 'Reporting on the follow up to the EU Strategy towards the Eradication of trafficking in human beings and identifying further concrete actions (COM(2017)728final)

large Member State (**France**) providing data only for 2016 (1 516 victims), and one further Member State (the **United Kingdom**) that has experienced policy change reporting an increase (539) in the number of registered victims. Slightly more Member States reported an increase in registered victims of human trafficking in 2016 than a decrease. Specifically, fifteen (15) Member States reported an increase, while eleven (11) reported a decrease, one (1) reported for only one year, and one (1) for neither year. With only two data points (2015 and 2016), statements about trends are generally unwise. Furthermore, the number of registered victims reported in the EU in 2015 (9 147) and 2016 (11 385) are similar to those reported by Eurostat (2015) *Trafficking in Human Beings* for 2010 (9 710), 2011 (9438), and 2012 (10 998).

The Member States with the largest number of registered victims is not always the same. The five (5) Member States with the largest number of registered victims, for the period 2015-2016 were: the **United Kingdom** (7 071), the **Netherlands** (2 442), **Italy** (1 660), **Romania** (1 636), and **France** (1 516). However, this “top five” changes slightly between 2015 and 2016. While **the United Kingdom**, the **Netherlands**, **Romania** and **Italy** are present in both 2015 and 2016, in 2015 the top five included **Hungary**, while in 2016 it included **France** (which did not report in 2015).

In the period 2010 to 2012, Eurostat (2015) found the top five to be: **Italy**, **the United Kingdom**, the **Netherlands**, **Romania**, and **France**. This is the same top five as for the period 2015-2016.

3.2.3 Registered victims (proportion of population)

The absolute number of registered victims in Member States was the focus of the previous section (3.2.2). The picture looks slightly different when numbers of registered victims are considered in proportion to the size of the population of the registering country. For example, 100 victims is a larger proportion of the total population in a country with a small population than in a country with a large population. The consequences of taking the size of the Member State population into account are shown in Table 3.2.3, which presents data on victims of trafficking as a proportion of the population of the registering country. It shows registered victims of trafficking in human beings for each million inhabitants.

Within the EU28 as a whole, in the period 2015-2016, there was an average of 22 registered victims per million inhabitants (21 in 2015, 23 in 2016). This is similar to the proportions reported by Eurostat (2015) for 2010 (16), 2011 (16), and 2012 (22).

The top five countries where victims are registered are different when the focus is on the proportion of victims vis-à-vis the total population of the registering country rather than on the absolute number of victims in the registering country. When the focus is on proportions, the top five Member States for registered victims in the period 2015+2016 are: the **Netherlands** (72), the **United Kingdom** (54), **Cyprus** (53), **Hungary** (51), and **Romania** (41). While the **Netherlands**, the **United Kingdom**, and **Romania** remain in the top five when using absolute and proportional measures, **Italy** and **France** (top five in absolute numbers) are replaced by **Cyprus** and **Hungary** (top five proportionate numbers).

3.2.4 Identified and presumed victims

The registration of victims is a key step towards making sure they are treated as 'rights holders' have access to their rights and can exercise them effectively. Victims are 'presumed' when they met the criteria of Directive 2011/36/EU but has not been formally identified by the relevant formal authority as victim of trafficking in human beings or who has declined to be formally or legally identified as trafficked. Victims are considered 'identified' for persons who have been formally identified as victims of trafficking in human beings by the relevant formal authority in Member States'.

There were 11 307 presumed victims and 9 225 identified victims and in the EU28 in 2015-2016

(5 304 presumed and 3 843 identified in 2015; 6 003 presumed and 5 382 identified in 2016).

Eurostat (2015: Table A1) found the following numbers in the earlier period: 2010 – 3 865 presumed and 5 845 identified; 2011 – 4 856 presumed and 4 582 identified; 2012 – 6 555 presumed and 4 443 identified.

Member States vary as to how they manage these processes. In responding to requests for information, 14 provided data on presumed victims only, 5 data on identified victims only 8 data on both presumed and identified, and one no data. This is shown in Table 3.2.4.

3.3 Assistance

3.3.1 Registering organisations

More than five types of governmental authorities and non-governmental organisations are mentioned as registering victims of trafficking in human beings, such as: the police, non-governmental organisations (NGOs), immigration officials, border guards, and labour inspectors, as well as others. Others included: Office of Combating Trafficking in Human Beings, centres for

migrants and asylum seekers, prosecutors, National Assistance System for Victims of Human Trafficking, and Intelligence Centre against Terrorism and Organized Crime.

The police registered over half (10 420 out of 20 532) of the reported victims of trafficking in human beings in the EU28 in 2015-2016. The next most frequent source of registrations was immigration officials (3 851), followed by NGOs (2 110), border guards (373) and labour inspectors (145). This is shown in Table 3.3.1.

Member States vary in how many of these types of authorities and organisations register victims. Counting those organisations reporting zero victims but excluding “not available”, the police are reported to register in 22 Member States, NGOs in 13, immigration officials in 10, border guards in 6, and labour inspectors in 6. Out of the five main types of organisations, the **Netherlands** accepts registration of victims from all five, the **United Kingdom** and **Ireland** from four, **Italy** and **Luxembourg** from three, the **Czech Republic, Greece, Latvia, Poland, Portugal, Romania,** and **Slovakia** from two, and **Belgium, Denmark, Germany, Spain, France, Croatia, Cyprus, Hungary, Malta, Slovenia** and **Sweden** from one. 2016 figures are summarised in Figure 3.3.1 and numbers for 2015, 2016 and 2015-2016 shown in detail in Table 3.3.1 For 2012, Eurostat (2015: Figure 3.3.1) report that the police registered in 18 Member States, NGOs in 7, immigration officials in 3, border guards in 3, and labour inspectors in 1. It appears that there is a small increase in the range of authorities and organisations registering victims since 2012.

Figure 3.3.1: Organisations registering victims, 2016

Number of Member States

Source: Annex Table A 1.1 Cells with zero counts are counted as they indicate that the Member State can take reports from that organisation but did not register any in that year.

3.3.2 Received assistance

Articles 11(2) and 11(4) of Directive 2011/36/EU requires that a person is provided with assistance and support as soon as the competent authorities have a reasonable-grounds indication for believing that the person might have been subjected to the offence of trafficking in human beings and appropriate mechanisms aim at the early identification of, assistance to and support for victims, in cooperation with relevant support organisations. This assistance takes various forms, including various forms of assistance with practical matters of life and living, various forms of assistance with legal status, and specialised assistance for children.

These forms of assistance are shown in tables on: Types of assistance and support received; international protection status; residence permit to Third country nationals (on more than one legal basis); reflection periods; and specialised assistance to child registered victims.

There were 4 497 registered victims receiving assistance in the EU28 in 2015-2016 (2 191 in 2015 and 2 306 in 2016). This is shown in Table 3.3.2. Three-quarters (76%) of those receiving assistance were female; and nearly one third (30%) were children, in 2015-2016.

For the earlier period, Eurostat (2015: 42) report the following instances of assistance: 2 652 in 2010; 2 647 in 2011; and 2 799 in 2012.

3.3.3 Type of assistance received by registered victims

Many types of assistance and support have been received by registered victims. The reported number of times assistance was provided was 9 036 in 2015-2016 (3 935 in 2015 and 5 101 in 2016). Table 3.3.3.1 shows the assistance provided (sometimes this is counted as per actions and sometimes as per persons assisted). This is further shown in Figure 3.3.3.

The types of assistance most frequently provided in the EU28, 2015-2016, were accommodation (2 975) and medical (and psychological) assistance (2 514), followed by, legal assistance (952), education (851), (re)integration assistance (611), training (536), job placement (503), and return assistance (460), together with other types (2 478).

The top five Member States providing assistance were reported to be: **Romania** (2 878), the **United Kingdom** (2 700), **Italy** (1 923), **Denmark** (320) and **Lithuania** (318).

Eighteen (18) Member States provided data; and ten (10) Member States provided none.

Eurostat (2015: Table A9) reports assistance and protection received during 2010-2012 to be: 2 652 in 2010; 2 703 in 2011; and 5 452 in 2012.

Source: Annex Table A1,10 : data not available

Notes: Some Member States have counted number of actions; some others have counted victims (classifying into the main assistance type). Data is as given by the Member State.

Provisions in the EU Anti-trafficking Directive are based on the best interest of the child and establish additional protection measures for child victims (arts. 13-16).

130 actions were reported during 2015-2016 in the EU28. This is shown in Table 3.3.3.2. Actions or assistance to individuals in order of frequency were: specific actions to assist and support child victims of trafficking (36), measures that have been adopted to carry out individual assessment of the best interests of the child (30), access to education (28), measures to provide assistance and support to the family of child victims (22), guardian for unaccompanied children (10), specific actions taking due account of special circumstances of unaccompanied child victim (6), appointment of guardian or representative in case of conflict of interest between child and parent (2), and other (4). In addition, one country separately reported the provision of assistance to unaccompanied children.

Ten (10) Member States provided data (of which four had no actions to report); and eighteen (18) Member States provided no data.

There is no comparable data for 2010-2012.

Source Annex Table A1,10a : data not available. Notes: Some Member States have counted number of actions; some others have counted victims (classifying into the main assistance type). Data is as given by the Member State. Unaccompanied children: Portugal had 4 unaccompanied children receiving non-child-specific accommodation and medical assistance in 2016 but no child-specific actions were recorded.

3.3.4 Reflection period

The purpose of a 'reflection period' is to allow victims to recover and escape the influence of the perpetrators of the offences so that they can take an informed decision on whether to cooperate with the competent authorities. This is provided for third country nationals (i.e. non-EU citizens) under Directive 2004/81/EC.

Reflection periods were received by 2 674 people in the EU28 during 2015-2016 (1 305 in 2015 and 1 385 in 2016). The top five Member States providing these, 2015-2016, were: **Italy** (1 660), the **Netherlands** (250), **Spain** (189), **Belgium** (182), and **Denmark** (145). Around three-quarters (77%) of the victims who were reported to be granted a reflection period were females. See Table 3.3.4

Data was provided by eighteen (18) Member States, and none by ten (10).

During 2010-2012, Eurostat (2015: Table A10) reports reflection periods: 2010 (767), 2011 (1 110), and 2012 (1 110).

3.3.5 Residence permits

Table 3.3.5.1. shows residence permits granted to third-country nationals who are victims of trafficking in human beings who cooperate with the competent authorities on the basis of Directive 2004/81/EC on residence permits.

In this context, Table 3.3.5.2 shows also different types of residence permits granted to victims of

trafficking who are non-EU nationals.

Residence permits were granted under the auspices of Directive 2004/81/EC to 983 people in the EU28 during 2015-2016 (490 in 2015 and 493 in 2016). Over half (59%) were granted to females. The top five Member States providing these, 2015-2016, were the **Netherlands** (329), **Belgium** (175), **Italy** (171), **Cyprus** (166) and **Spain** (52).

Fourteen Member States reported providing residence permits.

For the period 2010-2012, Eurostat (2015: Table A11) reports residence permits based on Directive 2004/81/EC: 2010 (768), 2011 (789), and 2012 (1 100).

Source: Annex Table A1.9c : data not available N indicates totals reported by Member States; N known gives the number of victims with known gender.

Residence permits based on Directive 2004/81/EC and other grounds were granted to 1 312 people in the EU28 during 2015-2016 (618 in 2015 and 694 in 2016). Over half (61%) were granted to females. The top five Member States providing these, 2015-2016, were the **Netherlands** (329), **Belgium** (184), **Italy** (252), **Cyprus** (166) and **Finland** (114).

Sixteen Member States reported providing such residence permits.

For the period 2010-2012, Eurostat (2015: Table A12) reports on residence permits on any basis: 2010 (866), 2011 (864), and 2012 (1 953).

3.3.6 Seeking International Protection Status

3.3.6.1 Introduction

In some cases, victims of trafficking may be seeking international protection, including during the current migration and refugee crisis. These are reported by form of exploitation, gender, age and citizenship.

This is new data collection, so there are no comparisons with 2010, 2011, 2012.

3.3.6.2 Seeking International Protection Status, by form of exploitation

There were 257 people reported by six Member States as seeking international protection in the EU28 during 2015-2016 (95 in 2015 and 162 in 2016). Data was provided disaggregated by form of exploitation. Over half (56%) were victims of trafficking for sexual exploitation, 12% for labour and 32% for other forms. See Table 3.3.6.2.

Six Member States provided the data on these 257 people. A further seven Member States responded to the request for data and reported no cases.

3.3.6.3 Seeking International Protection Status, by gender and age

There were 258 people seeking international protection status in the EU28 during 2015-2016 (95

in 2015 and 163 in 2016) data was available disaggregated on the basis of gender and age. Over half (55%) were females and nearly two-thirds (64%) were children See Table 3.3.6.3.

The top three Member States were: **Finland** (111), **Italy** (93) and **Denmark** (37). The remaining four Member States jointly provided 17 cases.

Seven Member States provided the data on these 257 people. A further six responded to the request for data and reported no cases.

3.3.6.4 Seeking International Protection Status, by citizenship

All those seeking international protection status are non-EU citizens. The top five countries with the highest numbers of citizens reported seeking international protection status in 2015-2016 are: **Nigeria** (125), **Somalia** (29), **Afghanistan** (18), **Morocco** (15) and **Cameroon** (14). See Table 3.3.6.4.

3.3.7 Cooperation of victims with law enforcement and courts

3.3.7.1 Introduction

Articles 11(3) of Directive 2011/36/EU requires that Member States take the necessary measures to ensure that assistance and support for a victim are not made conditional on the victim's willingness to cooperate in the criminal investigation, prosecution or trial, without prejudice to Directive 2004/81/EC or similar national rules.

Reporting on the number of victims cooperating with law enforcement and testifying in court is a new addition to data collected from Member States. This means there is no comparable data for 2010-2012.

3.3.7.2 Victims co-operating with law enforcement

There were 3 623 registered victims cooperating with law enforcement in the EU 28 during 2015-2016 (1 862 in 2015 and 1 761 in 2016). See Table 3.3.7.2. The top five Member States reporting this cooperation, 2015-2016, were: **Romania** (1 846), **Italy** (513), **Spain** (450), **Austria** (271) and **Lithuania** (168).

Eleven (11) Member States provided data; seventeen (17) did not.

3.3.7.3 Registered victims testifying in court

There were a reported 93 registered victims testifying in court in the EU 28 during 2015-2016 (55 in 2015 and 38 in 2016). See Table 3.3.7.3.

Five (5) Member States provided data, of which one reported no cases; twenty-three (23) did not.

3.4 Forms of exploitation

3.4.1 Introduction

Trafficking in human beings is for the purpose of exploitation, of which there is more than one form. Here, trafficking in human beings is divided along three broad forms of exploitation as established in earlier data collections: trafficking for the purpose of sexual exploitation, trafficking for the purpose of labour exploitation, and trafficking for the purpose of other forms of exploitation. Each form of trafficking in human beings has different implications for the victims and for policy interventions.

The Directive refers in a non-exhaustive manner to “the exploitation of the prostitution of others or other forms of sexual exploitation”. In order to get more specific information within the area of sexual exploitation, data was requested on among other activities: street prostitution, window prostitution and brothels, strip clubs/bars, pornography industry, escort services and modelling agencies, and massage parlours. The Directive further mentions in a non-exhaustive manner ‘forced labour’ or services, including begging, slavery or practices similar to slavery, servitude, (see Section 1.2). During data collection, request for reporting was made for among other locations: agriculture, construction, textile industry, hotel/restaurant/catering, care, and fisheries.

Data requested included: domestic servitude, forced begging/use for begging, the exploitation of criminal activities, the removal of organs and benefit fraud, which are grouped together as ‘other’ in the statistics that follow.

3.4.2 Sexual, labour or other exploitation

The most common form of exploitation was 'sexual', making up over half (56%) of registered victims of trafficking in human beings in the EU28, 2015-2016. Around one quarter (26%) of registered victims were trafficked for labour exploitation and 18% for 'other' exploitation. This is shown in Figure 3.4.2 and Table 3.4.2.

Figure 3.4.2 Form of Exploitation: Sexual, Labour, Other

The majority (61%) of the registered victims of trafficking for labour exploitation in the EU28, 2015-2016, were in the **United Kingdom**. Consequently, the inclusion or exclusion of data from the **United Kingdom** significantly changes the relative proportion of trafficking which is for sexual, labour, or other forms in the EU28). If the **United Kingdom** data is not included, then the proportions change to: sexual 65%, labour 15%, and other 20%.

There is considerable variation between Member States in regard to the different forms of exploitation that come to the attention of authorities and other registering bodies. Some Member States show a higher proportion trafficked for sexual exploitation, whereas others show a higher proportion trafficked for labour exploitation. In 2015-2016, the five Member States with the highest proportion of registered victims trafficked for sexual exploitation were: **Slovenia** (97%), **Hungary** (96%), **Estonia** (83%), **Croatia** (76%), and **Denmark** (76%). The five Member States with the highest proportion of registered victims trafficked for labour exploitation were: **Malta** (84%), **Portugal** (73%), **Czech Republic** (56%), **Belgium** (52%), and the **United Kingdom** (46%).

For the period 2010 to 2012, for the EU28, Eurostat (2015) found that the majority (69%) of victims of human trafficking were for sexual exploitation, with a further 19% for labour exploitation and 12% for other forms of exploitation.

3.5 Sex and age

3.5.1 Introduction

Detailed disaggregation of the intersection of sex and age is provided in this section.

3.5.2 Male and female

In both 2015 and 2016, over two-thirds (68%) of registered victims of trafficking in human beings in the EU28 were female (women and girls) almost one-third (32%) were male (men and boys). In most Member States (23 out of the 27 that provided data), the majority of registered victims were female, though the proportions vary among them. This is shown in Figure 3.5.2 and Table 3.5.2.

Figure 3.5.2. Male and female registered victims

Over half (3 382 out of 5 949 or 57%) of male registered victims of trafficking in human beings in the EU28 were found in the **United Kingdom**, so data from the **United Kingdom** significantly changes the sex ratio of registered victims of trafficking in human beings in the EU28. If the **United Kingdom** data is not included, then the female proportion of registered victims in 2015-2016 in the EU increases to over three-quarters (77%), and the male proportion lowers to almost one-quarter (23%).

The Member States registering the highest proportion of female victims in 2015-2016 were: **Slovenia** (97%), **Bulgaria** (92%), **Germany** (89%), **Hungary** (89%), and **Austria** (88%).

Eurostat (2015) found the female proportion of registered victims in the EU28 to be: 2010 (80%), 2011 (70%), and 2012 (74%). In 2010-2012, the **United Kingdom** contributed a smaller proportion of the EU28 registered victims than in 2015-2016.

3.5.3 Adults and children

Children are particularly vulnerable to trafficking in human beings, and provisions of the EU Anti-trafficking Directive are based on the best interest of the child and establish additional protection measures for child victims.

Children accounted for nearly one quarter (23%) of registered victims of trafficking in human beings in the EU28 during 2015-2016 (25% in 2015 and 21% in 2016). This is shown in Figure 3.5.3 and Table 3.5.3.

Figure 3.5.3 Adults and children, registered victims

The proportion of registered victims of trafficking in human beings who are children varies significantly between Member States. In 2015-2016 the Member States registering the highest proportion of children amongst victims were: **Estonia** (83%), **Hungary** (63%), **Greece** (56%), **Latvia** (37%), and the **Netherlands** (28%), although the small numbers reported by some Member States generate the need for caution in interpretation.

Eurostat (2015) found the following proportion of registered victims to be children: 2010 (13%), 2011 (15%), and 2012 (15%).

Source: Annex Table A1.2 : data not available ; %children is calculated from those victims with known adult/child status.

3.5.4 Sex by age

Women made up 62%, girls 17%, men 17%, and boys 5% of registered victims of trafficking in human beings, in the EU28, 2015-2016. The proportions vary considerably between Member States. This is shown in Figure 3.4.4 and Table 3.5.4. The percentage of female (women and girls) is different when the data is disaggregated by age than when it is not because some countries with higher proportions of males (e.g. UK), did not provide data disaggregated by age as well (without including UK these percentages change).

Figure 3.5.4 Sex by age, registered victims

Some Member States less frequently provided data on whether registered victims were women, girls, men, or boys, than for simpler separate disaggregation by either sex (male or female) or age (adult or child). For example, data was not provided at this level of disaggregation by the **United Kingdom**. The non-provision of data by the **United Kingdom** at this more detailed level of disaggregation clearly change the percentage of female (women plus girls) registered victims at the EU28 level, from 68% in Table 3.5.2 to 79% in Table 3.5.4.

The proportion of registered victims who were women, girls, men, and boys in 2015-2016 is similar to that found in 2010-2012 by Eurostat (2015), which were: women (67%), girls (13%), men (17%), and boys (3%).

Source Annex Table A1.2 : data not available N indicates totals reported by Member States. Percentages are calculated from those where the detailed age/sex breakdown is known.

3.5.5 Detailed age

Four age groups are distinguished, dividing children into 0-11 and 12-17, and dividing adults into 18-24 and 25 plus. In the EU28, 2015-2016, the largest category was 25+ (46%), followed by 18-24 (28%), 12-17 (23%) and 0-11 (2%). See Table 3.5.5 and Figure 3.5.5.

For 2010-2012, Eurostat (2015: Figure 3) reports the following detailed ages of registered victims: 25+ (45%), 18-24 (36%), 12-17 (17%), and 0-2 (2%).

3.5.6 Unaccompanied child victims and separated children

There were 285 registered unaccompanied child victims and separated children, either identified or presumed, in the EU28 in 2015-2016 (86 in 2015 and 199 in 2016). Of these, in 2015-2016, 210 were identified and 75 were presumed (84 and 2 in 2015; 126 and 73 in 2016). See Table 3.5.6.

Ten (10) Member States provided data, of which two (2) reported no cases. Most (188 out of 285) unaccompanied child victims and separated children in 2015-2016 were registered in Italy.

There is no comparable data for 2010-2012.

3.6 Forms of exploitation by gender and age

3.6.1 Introduction

The different forms of trafficking – for sexual, labour and other exploitation – have different gender profiles and age profiles. There is a correlation between females and sexual exploitation and between males and labour exploitation. The gender profile is looked at from two directions: the form of exploitation; and for males and for females. Sexual exploitation is analysed by its gender profile and its detailed age profile.

3.6.2 Form of exploitation by gender

Females were the vast majority (95%) of the victims of trafficking for sexual exploitation in the EU28 in 2015-2016 (96% in 2015 and 94% in 2016). Males were over three quarters (80%) of the victims trafficking for labour exploitation in the EU28 in 2015-2016 (80% in 2015 and 80% in 2016). Females were two-thirds (68%) of the victims of trafficking for other forms of exploitation in 2015-2016 (71% in 2015 and 65% in 2016). See Figure 3.6.2.1 and Table 3.6.2.1. The gender

profile is shown in its simple form as male or female. There were 19 persons for whom gender was shown as 'other'. In keeping with the methodological practice in this report, the percentages are shown only for those for whom gender was known as male or female.

Figure 3.6.2.1 Form of exploitation (sexual, labour, other) by gender

Data was provided by 26 Member States, 2015-2016.

During 2010-2012, Eurostat (2015) reported similar a female proportion of registered victims of different forms of trafficking for sexual exploitation in the EU28: 2010 (94%), 2011 (94%) and 2012 (96%). During 2010-2012, Eurostat (2015) reported the following gender patterns: sexual exploitation (95% female), labour exploitation (71% male), and other (52% female).

Source: Table A1.3 N refers to the number of registered victims with that form of exploitation for known gender. : data not available

Among female victims of trafficking, in the EU28 in 2015-2016, three-quarters (77%) was for sexual exploitation, 8% for labour exploitation, and 16% for other forms of exploitation (in 2015: sexual 77%, labour 8%, other 15%; in 2016: sexual 76%, labour 7%, other 16%). This is shown in Table 3.6.2.2 and Figure 3.6.2.2.

Among male victims of trafficking, in the EU28 in 2015-2016, one tenth (10%) was for sexual exploitation, nearly three quarters (72%) for labour exploitation, and 18% for other forms of exploitation (in 2015: sexual 9%, labour 77%, other 14%; in 2016: sexual 11%, labour 68%, other 20%). This is shown in Table 3.6.2.2 and Figure 3.6.2.2.

Data was provided by 26 Member States.

During 2010-2012, for the EU28, Eurostat (2015) found: among females, 85% was for sexual exploitation, 7% for labour and 8% for other forms of exploitation; among males, 64% was for labour exploitation, 14% for sexual exploitation and 22% for other forms of exploitation.

3.6.3 Sexual exploitation by age

Children were 23% of the registered victims of trafficking for sexual exploitation, in the EU28 in 2015-2016 (23% in 2015 and 22% in 2016). The proportion varied greatly between Member States. See Table 3.6.3.1. All but two Member States provided data on this issue.

For 2010-2012, Eurostat (2015: Figure 9) report that among registered victims of trafficking for sexual exploitation, 1% were aged 0-11; 13% were aged 12-17; 45% were aged 18-24; and 41% were aged 25+.

Source: Annex Table A1.3 N refers to the number of sexual exploitation victims. N known are those with known gender. : data not available

When detailed age categories are considered for EU28 during 2015-2016, the proportions are: 2% 0-11, 25% 12-17, 34% 18-24 and 39% 25 plus. The proportion varied greatly between Member States. See Table 3.6.3.2 and Figure 3.6.3. Six Member States did not provide data on this issue (which accounts for changes in the percentages for victims under and over 18).

Source: Annex Table A1.3. N refers to the number of reported sexual exploitation victims in each year. N known are those with known detailed age group.

3.7 Recruitment

3.7.1 Introduction

Patterns of recruitment into becoming a victim of trafficking in human beings vary. These four sections report on the different means of recruitment (oral, press, internet, agencies, other) and on the country from which victims are recruited. They are further differentiated by form of exploitation, by gender and by age.

Oral is the most important means of recruitment: it is nearly two-thirds (65% - 2 646 out of 4 060). See Table 3.7.2.

3.7.2 Means of recruitment, by form of exploitation

The means of recruitment (oral, press, internet, agency, other) vary by form of exploitation (sexual, labour, other), in the EU28 during 2015-2016, as shown in Table 3.7.2.

When the form of exploitation is sexual, and considering only *known* means of recruitment, the most important form of recruitment is oral (1 653 out of 1 785 or 93%) and the second most important is the internet (76 out of 1 785 or 4%). When the form of exploitation is labour, the most important form of recruitment is oral (417 out of 520 or 80%) the second most important is agencies (62 out of 520 or 12%),

Ten (10) Member States provided data.

The disaggregation of the means of recruitment by exploitation is a new question so there are no comparisons with earlier years.

3.7.3 Means of recruitment, by gender and age

The means of recruitment (oral, press, internet, agency, other) vary by gender and age of the registered victim, in the EU28 during 2015-2016, as shown in Table 3.7.3.

Females are more likely (2 023 out of 2 952 or 69%) to be recruited by oral means than men (619 out of 1 076 or 58%).

Children are more likely (838 out of 973 or 86%) to be recruited by oral means than adults (1 904 out of 3 060 or 62%).

There is no comparable data for 2010-2012 reported by Eurostat (2015).

3.7.4 Country of recruitment, by form of exploitation

Some victims are recruited from one EU Member State and exploited in another. Table 3.7.4 shows the countries from which registered victims have been recruited (down the left-hand column). Nearly three-quarters of these (1 704 out of 2 302, or 74%) are from **Romania**; the majority (61%) of these were recruited for sexual exploitation.

Eleven (11) Member States provided this data.

No comparable data was collected in 2010-2012.

N are totals given by Member States; N known are those victims with known forms of recruitment. : data not available

3.7.5 Country of recruitment, by age and gender

Among these victims recruited from one EU Member State and exploited in another, around two-thirds (66%) were female (rather than male) and one third (32%) were children (rather than adults). The gender and age composition of these registered victims varies substantially between Member States. See Table 3.7.5.

Twelve (12) Member States provided this data.

No comparable data is reported by Eurostat (2015).

Source: Annex Tables A1.5. Based on data from 12 responding Member States who are distributed across the 28 countries of recruitment above. The responding Member States are Croatia, Estonia, Finland, Italy, Latvia, Lithuania, Malta, Portugal, Romania, Slovenia, Slovakia, Spain. N are totals given by Member States in the questionnaire; N known are those victims with known adult/child status. : data not available

3.7.6 Destination countries

The destination country is not always the same as the country in which a victim of trafficking is registered. For most, the country of registration is the destination, but some others will have an alternative destination. Tables 3.7.6.1 and 3.7.6.2 show the differences and how they are affected by gender and age. In the table we can see that for **Austria** (a reporting MS) they have a large number for which that was their destination; **Germany** and the **United Kingdom** did not report but had a reasonable number of victims giving that as their destination.

There is no comparable data for 2010-2012.

3.8 Citizenship

3.8.1 Introduction

Trafficking in human beings can be a cross-border crime; but it is not always. The citizenship of victims of trafficking is the outcome of varied and complex flows. Some are citizens of the country that registered as victims of trafficking in human beings; others are not. Some are trafficked in their own country; some cross the national borders within the EU; and some cross the EU/non-EU frontier.

This section starts with data on the extent to which victims of trafficking in human beings are citizens of the country in which they were registered as victims of trafficking, or citizens of other EU Member States, or citizens of non-EU states. This information is provided in summary (Table 3.8.2) and in detail by specific states, sub-divided as to whether they are EU (Table 3.8.3) or non-EU (Table 3.8.4). Lists are provided on the top 5 and 10 countries of citizenship (EU and non-EU). Further detailed data are provided on: form of exploitation (Table 3.8.5); gender (Table 3.8.6); age (Table 3.8.7); children (Table 3.8.8); and **Nigerian** victims (the most frequent non-EU country of citizenship) (Tables 3.8.9.1 and 3.8.9.2).

3.8.2 EU and non-EU Citizens

Trafficking can be ‘internal’ to the EU (citizens of the EU registered as victims of trafficking in EU Member States), or ‘external’ to the EU (citizens of countries other than the EU registered as victims of trafficking in EU Member States).

Nearly one quarter (22%) of registered victims of trafficking were citizens of the reporting country, in the EU28 2015-2016. Nearly one quarter (22%) were citizens of other EU Member States. Thus, nearly half (44%) were citizens of the EU and just over half (56%) were non-EU citizens. This is shown in Table 3.8.2.1.

In 2010-2012, Eurostat (2015: Table 7) reports that 65% of victims were registered in the country of their own citizenship. Most of the difference between 2015-2016 and 2010-2012 is due the presence of data from **Bulgaria** in 2010-2012 (3 043 out of 15 474 registered victims: Table 2) but not in 2015-2016, so the difference does not indicate a real trend.

Table 3.8.2.1 Citizenship by EU/non EU

Source: Annex Table A1.4 and detailed Member State responses to question 1.4 : data not available

3.8.3 Country of citizenship of EU Registered Victims

Among registered victims who are EU citizens, some countries are more frequently cited as the country of citizenship than others. This can be reported as an absolute number (see Table 3.8.3.1) and also as a proportion of the population (per 1 000 000 inhabitants) (Table 3.8.3.2).

The distribution of victims with given citizenship across the EU Member States (as the site of their registration and probable exploitation) is shown in detail in Table 3.8.3.1. The intensity of the colour indicates the extent to which victims of a given citizenship are registered as trafficked in that Member State. For some countries of citizenship, this is more intense than others. The diagonal indicates the victims who are trafficked in the country of their own citizenship. This information is summarised in Table 3.8.3.2 using a proportionate measure, showing the extent to which people are trafficked in their own country (country of citizenship), or another EU Member State. There is significant variation in the extent to which internal EU trafficking is within a Member State or crosses internal national boundaries.

The top five countries of citizenship of registered victims of trafficking in human beings, during 2015-2016 in the EU28, were, in absolute numbers: **Romania** (1 511), **Hungary** (1 327), **the Netherlands** (724), **Poland** (634) and **Bulgaria** (568) (Table 3.8.3.1 and Table 3.8.3.2). The top five countries, proportionate to the size of the population, were **Hungary** (135), **Bulgaria** (79), **Lithuania** (77), **Romania** (76) and **Slovakia** (57) (Table 3.8.3.2). Three countries are in the top five on both methods of reporting for 2015-2016: **Romania**, **Bulgaria** and **Hungary**. The proportion of EU victims of trafficking that are accounted for by specific EU Member States is provided in Table 3.8.3.4, including: **Romania** (20%), **Hungary** (20%), the **Netherlands** (13%), **Poland** (10%) and **Bulgaria** (9%).

For 2010-2012, Eurostat (2015: Table 3) reported that the top five EU Member States in absolute numbers were: **Romania** (6 101), **Bulgaria** (3 043), **the Netherlands** (1 080), **Hungary** (1046) and **Poland** (976). For 2010-2012, Eurostat (2015: Table 4) reports that the top five EU Member States proportionate to population were: **Bulgaria** (138), **Romania** (101), **Latvia** (57), **Hungary** (35) and **Slovakia** (29). Three countries were in the top five on both methods of reporting for 2010-2012: **Romania**, **Bulgaria**, and **Hungary**.

In both 2015-2016 and 2010-2012, three countries were in the top five on both methods of reporting: **Romania**, **Bulgaria** and **Hungary**.

3.8.4 Country of Citizenship of non-EU Registered Victims

Among registered victims who were not EU citizens, some countries were more frequently cited as the country of citizenship than others. This is reported in Table 3.8.4.1. The intensity of the colour in this Table (3.8.4.1) indicates the extent to which victims registered in the EU28 have the citizenship of that country. The top ten non-EU countries of citizenship of registered victims are shown in Table 3.8.4.2. The top five, in 2015–2016, were: **Nigeria** (2 094), **Albania** (1 397), **Viet Nam** (1 099), **China** (739), and **Eritrea** (287).

For 2010–2012, Eurostat (2015: Table 3) found the top five non-EU countries of citizenship of

victims of trafficking registered in the EU were: **Nigeria, Brazil, China, Viet Nam**, and **Russia**. In the first Commission Progress report for years 2013 and 2014, with respect to non-EU citizens, the top five countries with the highest number of victims were Nigeria, China, Albania, Viet-nam and Morocco.

In 2015-2016 and 2010-2012 and 2013-2014, **Nigeria, Viet Nam** and **China** were in the top five countries of citizenship of registered victims of trafficking in the EU.

3.8.5 Citizenship by form of exploitation

The forms of exploitation by citizenship is shown in Table 3.8.5. The forms of exploitation is similar for EU and non-EU citizens. For EU citizens, this is sexual (57%), labour (31%) and other (11%). For non-EU citizens, this is sexual (51%), labour (32%) and other (17%).

There is no comparable data for 2010-2012.

3.8.6 Citizenship by gender

There is no significant difference in the gender of registered victims by citizenship type. Females were over three quarters of the victims among EU citizens (76%), non-EU citizens (76%) and

among 'unknown, stateless and other' (77%), in the EU28, during 2015-2016. This is similar for both 2015 and 2016: EU citizens (77% female in 2015; 76% female in 2016); non-EU citizens (76% female in both 2015 and 2016); unknown, stateless and other (68% female in 2015; 81% female in 2016). There were some differences at a more detailed level, for example, the percent of females among victims of EU citizenship varied from 100% (**Belgium, Germany, Cyprus, Luxembourg, Finland** and **Sweden**) to 0% in **Malta** and 14% in **Portugal**. See Table 3.8.6.

During 2010-2012, Eurostat (2015: Table 6) reports the following proportions of the gender of victims by broad citizenship groups: EU citizens (74% female); non-EU citizens (77% female) and unknown, stateless and other (57% female). This is similar to 2015-2016 for EU and non-EU citizens.

3.8.7 Citizenship by age

Children were most often found among those for whom their state was ‘unknown, stateless or other’ and least often found among those for whom their citizenship was EU, in the EU28 during

Data collection on trafficking in human beings in the EU

2015-2016. Adults were 69% of EU citizens, 84% of non-EU citizens, and 45% of 'unknown, stateless and other', who were victims of trafficking of human beings. See Table 3.8.7.

Although similar data was collected for 2010-2012, this was not reported in Eurostat (2015).

3.8.8 Child registered victims by citizenship

The characteristics of child registered victims vary by their citizenship in the EU28 during 2015-2016. See Table 3.8.8.

Nearly half (647 out of 1 310) child registered victims that held EU citizenship were of Hungarian

citizenship. The top five EU Member States for the citizenship of child registered victims were: **Hungary (647), the Netherlands (255), France (191), Romania (86) and Croatia (27). There were more child victims with EU citizenship (1 310) than there were with non-EU citizenship (643) and where citizenship was 'unknown, stateless or other' (253).**

The gender of the child victims varied with citizenship, in the EU28 during 2015-2016. **Girls were over four fifths (84%) of victims among those with EU citizenship;** just over half (54%) of victims with non-EU citizenship; and just under one third (30%) of those whose citizenship was 'unknown, stateless or other'.

Although similar data was collected for 2010-2012, this was not reported in Eurostat (2015).

3.8.9 Nigerian Victims

People with Nigerian citizenship are more frequently the registered victims of trafficking in human beings in the EU28 during 2015-2016 than any other non-EU citizenship. There were 2 084 registered Nigerian victims of trafficking in human beings in the EU28 during 2015-2016. See Table 3.8.9.1.

Nearly half (1 012 out of 2 084) of the victims with Nigerian citizenship were registered as victims in **Italy**; and nearly one quarter (500 out of 2 084) were registered as victims in the **United Kingdom**. The victims were overwhelmingly female (1 483 females and 66 males). They were usually adult women (1 272) (nearly half (174) aged 18-24 years; and just over (193) half aged 25 or over) rather than girl children (161).

Data collection on trafficking in human beings in the EU

Around three-quarters (74%) of the registered victims of Nigerian citizenship were trafficked for sexual exploitation. Less than one in twenty (4%) were trafficked for labour exploitation. Nearly one quarter (23%) were trafficked for 'other' forms of exploitation. If data from the UK were not included, the percentages change: sexual exploitation (80%), labour exploitation (1%), and other exploitation (19%). This is shown in Table 3.8.9.2.

4. TRAFFICKERS

4.1 Introduction

As per the EU Directive and EU Strategy (see Chapter 1) the police and criminal justice systems of Member States criminalise trafficking in human beings with the aim of reducing the impunity of traffickers.

This chapter concerns traffickers (and alleged traffickers) who have come to the attention of the police and criminal justice system in some way. The front part (4.2) concerns the numbers of traffickers and key actions by Member States. The middle part (4.3) concerns the forms of exploitation. The later part concerns the characteristics of traffickers: their gender (4.4), age (4.5), and citizenship (4.6). Each section is subdivided into three: 'suspects', prosecutions, and convictions.

The term 'suspect' is a shorthand for persons in formal contact with the police and/or criminal justice system who are suspected, arrested or cautioned for criminal offences of trafficking in human beings, at the national level. Prosecution data concerns either the individuals who are prosecuted or to the crimes that are prosecuted. Convictions data concerns either the individuals who are convicted or to court cases. In some data collection systems, individuals and cases are clearly separated, but not in others; as a consequence, in this report, the distinction is sometimes blurred.

The data derives from the records of the police, prosecution, and court systems. It is generated at different stages of the treatment of (alleged) offenders and therefore the collection of data is done in slightly different ways.

The provision of data by Member States on traffickers was, overall, less comprehensive than the data they provided on victims. A summary of data provision is provided in Table 2.5.4 (Chapter 2), and the details are provided in each section of this Chapter (4).

No trends can be discerned. There are large differences between Member States.

4.2 Key Numbers and Actions

4.2.1 Introduction

The key numbers concern: suspects – those in formal contact with the police and criminal justice systems (suspected, arrested, or cautioned) (4.2.2); prosecutions (4.2.3); and, convictions (4.2.4).

In relation to criminal offences of using the services which are objects of trafficking in human beings, data is provided on suspects, prosecutions and convictions (4.2.6).

Data is provided on decision-making processes during prosecution (4.2.4) and court proceedings (4.2.5). Data is provided on the freezing and confiscation of assets of convicted traffickers (4.2.7).

4.2.2 Suspects: Formal contact with police and/or criminal justice system - Suspected, arrested, or cautioned

There were 7 503 people in formal contact with Member States' police and/or criminal justice systems, either being suspected, arrested, and/or cautioned for offences of trafficking in human beings, in the EU28 2015-2016 (in 2015 this was 3 331, while in 2016 it was 4 172). This is shown in Table 4.2.2.

There is a high level of variation between Member States in the number of persons brought into formal contact with the police and/or criminal justice system. The five Member States with the highest number of reported persons suspected, arrested or cautioned for the trafficking in human beings were: **Romania** (2 777), **Germany** (1 198), **Czech Republic** (1 148), **Bulgaria** (856), and **France** (465) in 2015-2016.

Data is provided for 20 Member States. There was a coding error for a further Member State, concerning the ambiguity as to whether the question referred to suspects or victims in formal contact with the authorities.

Eurostat (2015) reports similar numbers for 2010-2012: 4 591 in 2010, 4 152 in 2011, and 4 017 in 2012. Twenty-two (22) Member States provided data in each of 2010, 2011 and 2012.

4.2.3 Prosecutions: Numbers

There were 5 979 prosecutions in the EU28 in 2015-2016 (3 142 in 2015 and 2 837 in 2016). This is shown in Table 4.2.3.

The Member States reporting the largest number of prosecutions for trafficking in human beings in the period 2015+2016 were: **France** (2 396), **Romania** (817), **Austria** (747), the **Netherlands** (216), and **Greece** (214).

Data was provided by 19 Member States. Nine (9) Member States provided no data: **Belgium**, **Denmark**, **Germany**, **Estonia**, **Croatia**, **Italy**, **Cyprus**, **Poland**, and **Finland**.

The number of prosecutions in the EU28 in 2015 and 2016 is similar to that reported by Eurostat (2015) for 2010–2012 (Table A18): 2010 (2 699), 2011 (2 928), and 2012 (3 178). Since only 14 Member States reported for all of 2010, 2011 and 2012, comparisons should be treated with caution.

4.2.4 Prosecutions: Final decisions made by the public prosecution service

While a case may enter the prosecution system, not all cases finally go to court on the charge of trafficking. They may go to court on a different charge or have an outcome that is not court based. On four types of outcome data was requested: “decisions to summon for trafficking in human beings”, “decision to summon for other criminal offences”, “out-of-court settlement”, and “others”.

Table 4.2.4.1 shows the percentage of outcomes for the EU28, during 2015–2016. Table 4.2.4.2 shows the range across Member States in the numbers of different outcomes that they report.

Around two-thirds (66%) of outcomes were prosecution for trafficking; 11% was summons for another criminal offence, 2% were settled out of court, and nearly a quarter (22%) were dealt with in another way.

Court procedures for trafficking were the only reported outcome in eight (8) Member States (**Denmark, Italy, Latvia, Lithuania, Hungary, Poland, Slovenia** and **Finland**).

Fifteen (15) Member States provided data; twelve (12) Member States provided no data; and one provided impossible values (91404 for 2015 and 84815 for 2016) which were not included.

Eurostat (2015) reported that 15 Member States provided data for each of 2010, 2011 and 2012.

4.2.5 Convictions

There were 2 927 convictions in the EU28 during 2015-2016 (1 582 in 2015 and 1 345 in 2016). See Table 4.2.5.

The five Member States with the highest number of convictions for trafficking in human beings were: **France** (1 687), **Romania** (585), **Italy** (146), the **Netherlands** (124), and **Bulgaria** (85) during 2015-2016. Data on convictions was provided by nineteen (19) Member States.

The number of convictions for trafficking in human beings during 2010-2012 found by Eurostat (2015: Table A23) was: 2010 (1 370); 2011 (1 389); 2012 (1 096). During the 2010-2012 period, the five Member States with the highest number of convictions for trafficking in human beings were: **Romania** (906), **Germany** (380), **Bulgaria** (343), the **Netherlands** (329), and **Belgium** (180). Three countries appear in the top five in both periods: **Romania**, **Netherlands** and **Bulgaria**.

4.2.6 Court judgments

There were 3 691 court judgments in the EU28 during 2015-2016 (1 994 in 2015 and 1 697 in 2016). These are shown in Table 4.2.6.1.

All Member States appeared to provide data. Five of them reported no judgments. The Member States with the most judgments were **France** (1 591), **Romania** (737), **Italy** (292) **Belgium** (238) and the **United Kingdom** (153).

During 2010-2012, Eurostat (2015: Table A22) reports that there the following judgments: 1 565 in 2010, 1 578 in 2011, and 1 250 in 2012). **France** and **Romania** again gave the most judgments.

4.2.7 Criminal sanctions against users of services which are objects of exploitation of victims of trafficking

Article 18 (4) of the Anti-Trafficking Directive obliges Member States to consider taking measures to establish as a criminal offence the use of services which are the objects of exploitation of trafficking in human beings, with the knowledge that the person is a victim of trafficking in human beings. It thus calls for Member States to consider sanctioning criminally those who knowingly use the services provided by victims of trafficking. The development of criminal legislation to put this principle into effect has been under recent development. This section reports on the extent to which Member States provided data on the utilisation of such criminal sanctions against users of the services which are objects of trafficking in human beings.

There were reports of two (2) ‘suspects’ (persons brought into formal contact with the authorities – suspected, arrested, or cautioned), 135 prosecutions, and 18 convictions in the EU28 during 2015-2016 concerning the use of services which are the objects of trafficking in human beings. See Table 4.2.7.

Five (5) Member States provided data on this matter, while twenty-three (23) did not.

Three Member States reported numbers of suspects, prosecutions and convictions for these

offences: **Italy, Romania, and Finland**. Two Member States reported no suspects, prosecutions, or convictions: **Lithuania, and Slovenia**.

The request for this information was new for this data collection exercise, so there is no comparison for 2010-2012 available from Eurostat (2015).

4.2.8 Freezing and confiscation of assets of convicted traffickers

Trafficking in human beings is significantly driven by the pursuit of profit, according to Europol. One of the sanctions against traffickers is to freeze or confiscate their assets. Assets include property, real estate, cars, boats, and cash money etc.

72 orders freezing assets were reported in the EU28 in 2015-2016 (39 in 2015 and 33 in 2016). The value of property frozen was estimated to be €6 099 984 (€3 111 834 in 2015 and €2 988 150 in 2016).

38 orders to confiscate assets in the EU28 were reported during 2015-2016 (14 in 2015 and 24 in 2016). The estimated value of property recovered at the time of confiscation was €2 008 416 (€1 266 748 in 2015 and €741 668 in 2016). See Table 4.2.8.

Data collection on trafficking in human beings in the EU

The five Member States reporting use of these two measures were: the **United Kingdom** (100), **Slovenia** 6), **Poland** (no number), **Estonia** (2) and the **Czech Republic** (2).

Seven (7) Member States provided data on these issues and twenty-one (21) did not. Two (2) provided data that reported that no such orders were made in this period.

The request for this information is new for this data collection exercise, so there is no comparison for 2010-2012 available from Eurostat (2015).

4.3 Forms of exploitation (sexual, labour, other) and links to organised crime

4.3.1 Introduction

Trafficking in human beings concerns exploitation. This can take several forms, which were grouped into three categories for this data collection exercise: sexual, labour and other.

Data on the form of exploitation used by suspects, and those prosecuted and convicted of trafficking in human beings is provided.

Around three quarters of suspects (78%), prosecutions (75%) and convictions (72%) concerned trafficking for sexual exploitation.

4.3.2 Suspects by form of exploitation

Just over three-quarters (78%) of 'suspects', i.e. those in formal contact with the police and criminal justice systems (suspected, arrested or cautioned), were so in connection with trafficking for sexual exploitation, in 2015-2016, in the EU28. This compares with 15% for trafficking for labour exploitation and 8% for all other forms of exploitation during the same time period. See Table 4.3.2 and Figure 4.3.2.

The proportion of 'suspects' for trafficking for sexual exploitation varied substantially between Member States. It was highest in **Greece** (100%), **Finland** (100%), **Slovenia** (98%), **Germany** (96%), and **Estonia** (83%). It was lowest in the **United Kingdom** (0%), **Malta** (6%), **Slovakia** (11%), **Sweden** (30%), and **Belgium** (42%).

The proportion of suspects for trafficking for labour exploitation varied between Member States. It was highest in **Malta** (94%), **Belgium** (48%), **Spain** (22%), **Latvia** (15%) and **Poland** (8%).

Fourteen (14) Member States provided data on this issue for 2015 and 2016; two (2) provided data for one year; and one made a coding error.

This pattern is similar to that reported by Eurostat (2015) for 2010-2012. As reported by Eurostat (2015), those in formal contact with the police and criminal justice system in connection with the trafficking in human beings were so for sexual exploitation in the following proportions: 2010, 76%; 2011, 70%; and 2012, 66%.

4.3.3 Prosecutions by form of exploitation

Three-quarters (75%) of those prosecuted, were so in connection with trafficking for sexual exploitation, in 2015-2016 in the EU28. This compares with 2% for trafficking for labour exploitation and 23% for all other forms of exploitation during the same time period. See Figure 4.3.3 and Table 4.3.3.

The proportion of prosecutions for trafficking for sexual exploitation varied substantially between Member States. It comprised 100% of prosecutions in the **Czech Republic**, **Austria** and **Romania** and less than half in **Latvia** (26%), **Lithuania** (18%), and **Malta** (43%).

There are gaps in data provision by Member States. Thirteen (13) Member States provided data for one or other of 2015 and 2016; fifteen (15) provided no data.

This pattern is similar to proportion of prosecutions that were for sexual exploitation reported by Eurostat (2015) for: 2010, 76%; 2011, 72%; and 2012, 70%.

Source: Annex Table A3.2 : data not available. N are total number of prosecutions reported in A2.2; N known are prosecutions with a known form of exploitation.

4.3.4 Convictions by forms of exploitation

Nearly three-quarters (72%) of those convicted were so in connection with trafficking for sexual exploitation, in 2015-2016 in the EU28. This compares with 1% for trafficking for labour exploitation and 28% for all other forms of exploitation during the same time period. See Table Figure 4.3.4 and 4.3.4.

The proportion of convictions for trafficking for sexual exploitation varied substantially between Member States. It comprised 100% of convictions in **Ireland, Latvia, Romania** and **Sweden**. It was no more than half in **Estonia** (27%), **Lithuania** (41%) and the **United Kingdom** (50%).

Thirteen (13) Member States provided data for one or other of 2015 and 2016.

Eurostat (2015) did not report on this, so no comparisons are possible for 2010-2012.

4.3.5 Organised crime and/or migrant smuggling

Trafficking in human beings is a highly profitable form of serious and organised crime, explicitly prohibited in the EU Charter of Fundamental Rights, involving a complex chain of actors. Further, it can be linked with other crimes and/or supporting offences that may facilitate the various stages of the trafficking chain in given contexts. Amongst others, migrant smuggling is one example with respect to the specific context of non-EU victims trafficked to the EU through irregular migration routes.

Member States were asked whether they would classify suspects as being involved in either organised crime or migrant smuggling. Table 4.3.5 shows the responses.

During 2015-2016, there were reports of 239 (2015) and 196 (2016) suspects involved in organised crime and 36 (2015) and 30 (2016) involved in migrant smuggling, with two (2) cases (2016) involving both. Organised crime was reported much more frequently than migrant smuggling as linked to suspects (suspected, arrested, or cautioned) for trafficking in human beings.

Ten (10) Member States responded in at least one of the years 2015 and 2016, of which two (2) stated the number was zero (0).

There is no comparison with 2010-2012 since this data collection request was new.

4.4 Gender of trafficker

4.4.1 Introduction

Around three-quarters of those suspected, prosecuted or convicted for trafficking in human beings are male. Suspects were 71% male, those prosecuted were 75% male, and those convicted were 71% male in the EU28, during 2015-2016. In most Member States, the

majority of traffickers are male. See Figure 4.4.1. The proportion that are male varies between Member States and whether this concern suspects (see Table 4.4.2), prosecutions (see Table 4.4.3) or convictions (see Table 4.4.4).

Figure 4.4.1: Traffickers by gender (suspects, prosecutions, convictions)

4.4.2 Suspects by gender

Nearly three-quarters (71%) of suspects (persons in formal contact with the police and criminal justice system being suspected, arrested or cautioned) were male.

Seventeen (17) Member States provided data on the gender of those in formal contact with the police or criminal justice system (suspected, arrested or cautioned) in at least one year; and one made a coding error.

This is similar to the gender proportions of suspects reported by Eurostat (2015) during: 2010 (70%), 2011 (72%) and 2012 (73%).

4.4.3 Prosecutions by gender

Males were three-quarters (75%) of those prosecuted for trafficking in human beings. In no Member State were women the majority. The proportion of men varied from **Lithuania** (86%), to **Latvia** (53%).

Sixteen (16) Member States provided data on the gender of those prosecuted in one or more year.

This is similar to earlier gender proportions of those prosecuted reported by Eurostat (2015): 2010 (67%), 2011 (72%) and 2012 (73%).

Source: Annex Table 4.2a : data not available. Total gives the number of convictions reported in A2.1c; Total known are those with known gender.

4.5 Traffickers by age

4.5.1 Introduction

Most traffickers are adults. A very small proportion of those suspected, prosecuted or convicted of trafficking are under 18 years of age (the threshold of adulthood as defined in the Directive). Adults were 97% of suspects, 94% of those prosecuted, and 99% of those convicted (See Tables 4.5.2, 4.5.3, 4.5.4).

4.5.2 Suspects by age

Ninety-seven per cent (97%) of suspects - those in formal contact with the police and criminal justice system (suspected, arrested or cautioned) were adult, in the EU28 in 2015-2016. See Table 4.5.2.

The proportion varied between Member States. Five Member States reported no child suspects. The highest proportion of child suspects were found in **Estonia** (45%)

Fifteen (15) Member States provided this data.

There is no comparable data for 2010-2012.

4.5.3 Prosecutions by age

Ninety-four per cent (94%) of prosecutions concerned adults, in the EU28 in 2015-2016. See Table 4.5.3.

The proportion varied between Member States. In five Member States 100% of the prosecutions were of adults: **Greece, Lithuania, Malta, Portugal** and **Sweden**. The highest proportion of prosecutions of those under 18 were found in **Hungary**, where it was 25%.

Eleven (11) Member States provided this data; seventeen (17) did not.

There is no comparable data for 2010-2012.

4.5.4 Convictions by age

Ninety-nine per cent (99%) of convictions concerned adults, in the EU28 in 2015-2016. See Table 4.5.4.

The proportion varied between Member States. In nine (9) Member States 100% of convictions were of adults, and in two (2) more it was 99%. The highest numbers of child convictions were found in **Romania** and **France** (10 each).

Thirteen (13) Member States provided this data; fifteen (15) did not.

There is no comparable data for 2010-2012.

4.6 Citizenship of traffickers

4.6.1 Introduction

The citizenship of traffickers is addressed in relation to suspects (those in formal contact with the police and/or criminal justice system who are suspected, arrested, or cautioned) and prosecutions.

For suspects, data is presented on: summary of EU and non-EU citizenship; EU Member State citizens; percentage contribution of Member States to EU28 total; non-EU citizens; and the gender of suspects.

For prosecutions, data is presented on: summary of EU and non-EU citizenship; percentage contribution of EU Member States to EU28 total of prosecutions; and non-EU countries of citizenship of prosecuted persons.

4.6.2 Suspects by citizenship: EU/non-EU citizens

Over three quarters (84%) of suspects with known citizenship held EU citizenship in the EU28, during 2015-2016 (89% in 2015 and 81% in 2016). Less than one fifth (16%) held non-EU citizenship during 2015-2016 (11% in 2015 and 19% in 2016). See Table 4.6.2.

During 2010-2012, Eurostat (2015: 45) reports that 69% of suspected traffickers were EU citizens.

Table 4.6.2: Citizenship of suspected traffickers

4.6.4 Suspects: Non-EU Citizenship

The citizenship of suspects who do not hold EU citizenship are shown in Table 4.6.4.

The top five countries for the citizenship of suspected traffickers who do not hold EU citizenship, in the EU28 during 2015-2016, are: **China** (181), **Nigeria** (151), **Turkey** (67), **Albania** (49) and **Morocco** (40).

During 2010-2012, Eurostat (2015: Table 16) reports that the top five countries for non-EU suspects were **Nigeria** (267), **China** (127), **Morocco** (121), **Albania** (110) and **Brazil** (92).

4.6.5 Suspects, by gender and by citizenship

Three quarters (74%) of suspected traffickers of EU citizenship were male in the EU28 during 2015-2016. Among those of non-EU citizenship, the proportion of males was 54%. Among those of 'unknown, stateless or other' citizenship, the proportion of males was 92%.

While this data was collected in the earlier period, Eurostat (2015) does not report on this particular disaggregation.

4.6.6 Prosecutions by citizenship

Among those prosecuted for trafficking in the EU28 during 2015-2016 with known citizenship, 87% held EU citizenship, with 13% holding non-EU citizenship. See Table 4.6.6.1.

For 2010-2012, Eurostat (2015, Figure 14) finds that 49% were EU citizens prosecuted in their own country, 24% were EU citizens who were prosecuted in another EU country, 22% were third country nationals, while for 5% citizenship was unknown. This means that of those prosecuted during 2010-2012, 73% held EU citizenship.

4.6.7 Prosecuted persons by gender

Over three-quarters of those prosecuted in the EU28 from each of the main citizenship categories were male during 2015-2016: EU (78%), non-EU (76%) and 'unknown, stateless and other' (79%). See Table 4.6.7.

For 2010-2012, Eurostat (2015: 56) found 71% of those prosecuted were male, but does not analyse this by citizenship.

5. CONCLUSIONS

5.1 Introduction

This report provides data on the extent and nature of trafficking in human beings in the EU28, for the period 2015-2016, with some limited reference back to earlier dates. This chapter offers a summary across the EU28, from 2010-2016, of registered victims, suspected, prosecuted and convicted traffickers and a summary of the citizenship of registered victims, suspected and prosecuted traffickers and concluding remarks.

5.2 Registered Victims, Suspected, Prosecuted and Convicted Traffickers over Time

This section brings together the measurement of victims with the measurement of traffickers. These statistics may help inform the balance of effort given to mitigating the harms to victims and reducing the impunity of traffickers.

Covering the period 2010 to 2016, Table 5.2 summarises the extent to which Member States have registered victims of trafficking in human beings, brought persons into formal contact with the police and criminal justice system in relation to trafficking in human beings (suspected, arrested, or cautioned), and prosecuted and convicted persons for the crime of trafficking in human beings.

There are clear patterns which are relatively stable over the period of time under examination, including in variations between Member States.

There appear to be no clear and substantial trends over the period of time under examination.

There are substantial variations between Member States. This variation includes the extent to which victims or traffickers are the focus of attention by the authorities and other agencies.

Table 5.2 shows the extent to which Member States report registered victims and traffickers ('suspects', prosecutions, and convictions). In 2016, for the EU28, this was: 11 385 registered victims, 4 172 suspects, 2 837 prosecutions, and 1 345 convictions. Some Member States report nearly the same number of registered victims as traffickers (suspected, prosecuted, convicted), while others report far more registered victims than traffickers (suspected, prosecuted, convicted). For example, in 2016, France reported 1 516 victims, 1 198 suspects, 1 236 prosecutions, and 785 convictions, while the UK reported 3 805 victims, 4 suspects, 152 prosecutions, and 4 convictions for the same year.

Member States may have different strategies, policies, and/or practices regarding the balance of caring for victims and reducing the impunity of traffickers.

5.3 Citizenship of Registered Victims, Suspects and Prosecutions

The citizenship of registered victims, suspects and prosecutions in the EU28 indicates complex flows within and across national and EU borders.

Out of those with known citizenship, more people who are suspected (84%) or prosecuted (87%) in relation to trafficking in human beings hold EU citizenship than do registered victims (44%). This is summarised in Table 5.3.1.

Nearly half (44%) of registered victims hold EU citizenship (22% in the same Member State as registration and 22% in a different EU Member State), just over half (56%) hold citizenship in a non-EU country.

Over four fifths (84%) of suspects hold EU citizenship (66% in the same Member State as police contact; and 18% in a different Member State), whereas less than one fifth (16%) hold citizenship in a non-EU country.

Over four fifths (87%) of those prosecuted hold EU citizenship (75% in the same Member State as the prosecution; and 12% in a different Member State), just over one tenth (13%) hold citizenship in a non-EU country.

Table 5.3.1 Citizenship of registered victims, suspects and those prosecuted

	2015 - 2016					
	victims		suspects		prosecutions

Source: Table A1.4, A2.1a, A3.1c and detailed Member State responses to question 1.4

The proportionate contribution of EU Member States (in relation to the citizenship of registered victims, suspects and those prosecuted) to the total for the EU28 (for registered victims, suspects and prosecutions) in 2015-2016, is shown in Table 5.3.2. While some Member States are either high or low for both victims and traffickers (suspects and those prosecuted), some Member States are high in one and low in the other.

The five Member States that contribute the most to the EU28 totals of registered victims, suspects and those prosecuted are as follows. **Romania** contributes 21% of registered victims, 21% of suspects and 44% of prosecutions. **Hungary** contributes 18% of registered victims, 18% of suspects and 28% of prosecutions. **The Netherlands** contributes 10% of registered victims, 10% of suspects and 5% of prosecutions. **Poland** contributes 9% of registered victims, 9% of suspects and 2% of prosecutions. **Bulgaria** contributes 8% of registered victims, 8% of suspects and 3% of prosecutions.

5.4 Summary

The collection and analysis of data on trafficking in human beings is developing. Each EU data collection exercise has been an improvement on previous ones. The progress and remaining challenges was described and discussed in Chapter 2 on methodology; so, this section should be read in conjunction with Chapter 2.

While there is a legal requirement in the Directive for Member States to provide statistics on trafficking in human beings to the European Commission, there remain, despite improvements, some gaps. These gaps mean that the support for policy development that statistics should provide is not yet as comprehensive as it might be. The gaps are smallest for the simpler

information and largest in the request for detailed information. Despite these gaps, the data collected by the European Commission on registered victims of trafficking is widely regarded as world-leading in its quality.

There has been significant progress in the provision of statistics on trafficking in human beings; but challenges remain. In a comparison of the current data collection exercise (reported here) with earlier reports (Eurostat Statistical Working papers, 2013 and 2015) and first Commission progress report, the progress has to be acknowledged: there is more detailed information on registered victims in the current as compared with past reports, and there were reporting on new indicators. This new information especially concerns social and policy developments to ensure the implementation of the rights and entitlements of registered victims and targeting the culture of impunity.

Criminal justice data for the criminal offence of use of services which are the objects of exploitation of trafficking in human beings (suspects, prosecutions and convictions).	Table 4.2.7: Criminal justice data for the criminal offence of use of services which are the objects of exploitation of trafficking in human beings (suspects, prosecutions and convictions).

Guidelines provided to member states for completing the tables

This section of the Annex provides the guidelines provided to Member States on how to fill in the Excel spreadsheet used to collect the data.

The data was collected in a series of Tables, and each Table corresponds to one or more Annex tables (which are provided in a later Annex section).

Member states were also asked to provide metadata for each Table giving further information on the data that was being supplied. The metadata is provided after the data tables.

For each Table we provide the original Table number (which collects data on a specific indicator and corresponds to the list in Section 2.3 of the main report), and the corresponding Annex Table or Tables constructed from that Excel table.

1. Information on victims by age and gender

Statistical information on the total number of victims of trafficking in human beings is likely to be the most difficult data to collect. Figures might be available in registration systems of different services: in police registers when victims have reported the crime; border guards might react on trafficking signals at (EU) borders; and labour inspectors might pick up signs of victims of human trafficking during their (regular) controls on working conditions in businesses. Immigration services will register trafficked persons from third countries who have requested a residence permit based on EU Directive 2004/81.

Victim assistance services might register a victim when the victim has requested assistance and different authorities will refer a potential victim to the police. Some Member States have a registration system linked to their National Referral Mechanism.

The identification of victims of trafficking in human beings depends on national systems in Member States. Data is to be collected on all victims of trafficking in human beings. A person is considered to be a victim of trafficking in human beings when the crime against her/him fulfils the constituent elements of trafficking in human beings. The most accurate system for registration of trafficking victims will be in countries that have developed a system of a relevant formal authority to identify victims of trafficking in human beings and have developed a national register for all victims.

The first report on trafficking in human beings showed that data on victims of trafficking in human beings often, but not always, was provided by the police. So the relevant formal authority to identify victims of trafficking in human beings in these countries seemed to be the police. In some countries, the status of 'victim' could be granted by other authorities such as the immigration service, the state agency for social welfare or mandated NGOs. The term '**identified victim**' will be used for this category of victims of trafficking in human beings and can be defined as a person who has been formally identified as a victim of trafficking in human beings by the relevant formal authority in a Member State. But in some cases victims will not report to the relevant formal authority, such as in cases where the victim does not report the crime to the police or does not want to cooperate with the police. The victim may be in need of assistance and support and for this reason contact victim service providers. Also in these cases, the victim could fulfil the constituent elements of the crime of trafficking in human beings and therefore be considered a victim of trafficking in human beings according to the legal definitions. In different studies this category of victims is either called '**presumed**' or '**potential**' victims of trafficking in human beings. Article 11 of the Directive 2011/36/EU introduces the 'reasonable-grounds indication' for believing that the person might have been subjected to trafficking in human beings. To obtain a figure for the total number of victims of trafficking, data on victims that have not been formally registered by the relevant formal authority as a victim of trafficking should be used. The term 'presumed victim' will be used for this category of trafficking victims and could be defined as a person who has met

the criteria of the EU Directive but has not been formally identified by the relevant formal authority as a trafficking victim or who has declined to be formally or legally identified as trafficked. National rapporteurs or equivalent mechanisms may have an overview of all human trafficking victims in their Member State. Member States are requested to clearly indicate which is the category of victims (identified and/or presumed/potential) they are reporting describing their national system of registering victims.

When data is gathered from different services it is obviously important to avoid double counting of victims in the data reported. This could also be relevant in cases where the victim has moved to another EU Member States. The victims might indeed than be registered in both countries and reported by both countries.

Some additional breakdowns by age have been requested in some tables.

Please include ':' in the tables when data is not available and '0' when this is the reported value.

Table 1.1 and Table 1.2 Number of victims by registering organisation and gender and age

List the total number of victims (by gender and age group) by registering organisations. The identified categories are: Police, NGOs, Immigration, Labour inspectors, Border Guards and Others. Please provide data on as many categories as possible. Specify additional organisations in the category "Others" in the metadata.

Data is requested on the total number (not percentages) of both (if possible) **'identified'** and **'presumed'** victims of trafficking in human beings by the relevant authority, To ensure comparability, data on 'identified' and 'presumed' victims **should be provided separately**. The date of registration of the victim at the moment of their first interview, intake, report etc. with the relevant authority should be used to decide the appropriate year. Data on 'identified' victims will most likely come from the police. Data on 'presumed' victims of trafficking in human beings may be available from entities such as national rapporteurs or equivalent mechanisms, victim assistance services, immigration services, labour inspections and border guards.

NB: to avoid double counting at national level, it is advisable to collect data on the date of birth of all victims, using the format day/month/year at the time of first contact with the relevant authority (= interview, intake, report etc.) **in accordance with national data protection laws**.

Age group

Data on victims is to be collected on the total number of child (minor) and adult victims, where available by age group 0-11 and 12-17 and adults, age group 18-24 and 25+. Children/minors are defined as persons under 18 years of age. Adults are those aged 18 and above. Unaccompanied and/or separated children who are victim of trafficking (EU and non-EU) are to be reported separately within the total number of child victims.

Gender

Data is to be collected on the total number of female and male victims. Data on the number of transgender victims is to be included in the metadata file or in "other gender", respectively.

Table 1.3 Number of victims by form of exploitation

List the total number of victims (by gender and age group) by form of exploitation by year
A breakdown is introduced for sexual exploitation and forced labour in order to obtain more specific data. The identified forms of exploitation are: Sexual, Forced Labour, Domestic Servitude, Forced

Begging/Use for Begging, Criminal Activities, Removal of Organs, Benefit Fraud, and Others (such as Forced Marriages, Illegal Adoptions, Selling of Children). Specify any other forms of exploitation included in the category "Others" in the metadata.

Sexual exploitation: in order to get more specific information within the area of sexual exploitation, data is asked on exploitation of prostitution or other forms in the areas of Street prostitution, Window Prostitution and Brothels, Strip Clubs/Bars, Pornography Industry, Escort Services and Modelling Agencies, Massage Parlours and Others. The category "Others" could include hotels, private clubs and private flats. Specify any other forms of sexual exploitation included in the category "Others" in the metadata file.

Forced labour: in order to get more specific information within the area of the exploitation for forced labour, data is asked on the following sectors: Agriculture, Construction, Textile Industry, HORECA, Care, Fisheries and Others. The category "Others" could include factories, plants, tourism, in-house factories, mines and the logging industry. Specify any other forms of forced labour included in the category "Others" in the metadata file.

Domestic servitude: domestic servitude is considered a form of exploitation for Forced Labour. For this data collection process it is actually singled out as more information is needed on this form of trafficking in human beings.

Forced begging or Use for begging means the exploitation of begging, including the use of a trafficked dependent person for begging.

Criminal Activities: exploitation for the purpose of Criminal Activities such as drug trafficking, terrorism and petty crimes. Where possible, indicate the types of criminal activity involved.

Removal of Organs.

Benefit Fraud: exploitation for the purpose of Benefit Fraud is singled out based on the increase identified in Europol's Serious and Organised Crime Threat Assessment report of 2013 and as it is included in Europol, Situation Report (2016), Trafficking in human beings.

Others: Exploitation for the purpose of Forced Marriage, Illegal Adoption, Selling of Children, Slavery, etc.
Where possible, please specify any other forms of exploitation in the metadata file.

Table 1.4 Number of victims by citizenship

List all the countries of citizenship of trafficking victims (by gender and age group) based on information in their passport or in other identity documents and state the total number of victims per country per year. The data provided should be absolute numbers (not percentages). Eurostat GEO codes should be used to identify the countries.

NB: to avoid double counting, it is advisable to count only one citizenship per victim.

Tables 1.5 and 1.6 Number of victims by means and by country of recruitment

List the means of recruitment of victims and the country of recruitment (including the victim's own country, if recruited locally) of human trafficking victims (by gender and age group) and state the total number of victims by means of recruitment by year in Table 1.6b The means of recruitment can be disaggregated in the categories: Oral (such as friends, family, colleagues), Press (such as

newspapers), Internet (such as social networks, web sites of businesses), Temporary Work Agencies and Intermediary Agencies (such as job recruitment, au pair, modelling) and "Others". The data provided should be absolute numbers (not percentages).

List all the countries of recruitment where the victim was at the moment of first contact with the trafficker in Table 1.6. Problems in identifying the country of recruitment might occur when victims have been recruited via the internet. Information on the country of recruitment of victims, within or outside the European Union, provides an overview of trafficking routes, trends and patterns in modus operandi of organised crime and can also be used for more focused prevention activities.

Table 1.7 Number of victims by country of destination (by age and gender)

List the countries of destination or intended destination, based on information as available, in Table 1.7. The data provided should be absolute numbers (not percentages). Eurostat GEO codes should be used to identify the countries. If data is not complete, the category 'unknown' should be filled in with the missing information.

Tables 1.8a Victims seeking international protection status in the current migration and refugee crisis, by gender and age

Table 1.8b Number of victims seeking international protection status in the current migration and refugee crisis, by form of exploitation and

Table 1.8c Number of victims seeking international protection status in the current migration and refugee crisis, by citizenship

The tables list the total number of registered victims of trafficking in human beings (identified and/or presumed), who were using the migration routes, either the Western Balkan or the Central Mediterranean route. Please provide further information in the metadata.

Table 1.9 Reflection period and residence permit, by gender and age

Given a reflection period In Table 1.9, list the total number of victims (by gender and age group) who have made use of the reflection period based on the Council Directive 2004/81/EC. To identify the appropriate year for reporting, the date of registration of the victim by the appropriate authority at the start of the reflection period should be used. Immigration services, police or NGOs are most likely to supply this data.

Requested and granted a residence permit

In Table 1.9, list the total number of victims (by gender and age group) who applied for a residence permit and who received a residence permit based on the Council Directive 2004/81/EC. List the victims who received a residence permit based outside of the scope of the Directive, e.g. on humanitarian grounds, in the category "Granted residence permit based on other grounds" and specify the type of permit in the metadata file. Please distinguish between the different types of permits. To identify the appropriate year, the date when the residence permit was requested and granted should be used. Immigration services or the police are most likely to collect this type of information.

Table 1.10 Type of assistance and support received, by gender and age

Received assistance In Table 1.10, list the total number of victims of trafficking in human beings

(by gender and age group) who received assistance.

Type of assistance

In Table 1.10, list the total number of victims by the type of assistance received. Types of assistance are disaggregated by Accommodation, Medical and Psychological Assistance, Legal Assistance, Education, Training (vocational and business), Job placement, (re)Integration Assistance, Return Assistance and Others. Others should include assistance and support measures for child victims, including unaccompanied children and separated children, such as number of specific actions to assist and support child victims of trafficking; by measures that have been adopted to carry out individual assessment of the best interest of the child; access to education; appointment of guardian or representative in case of conflict of interest with parents; measures to provide assistance and support to the family of child victims; specific actions taking due account of special circumstances of unaccompanied child victim; guardian for unaccompanied child victims; any other. Please provide further information in the metadata.

The different types of assistance range in intensity and duration. This data is required in order to gauge the volume of victims who need assistance and to study any differences in gender and by age. This data can most likely be provided by the different victim assistance services. Special emphasis is needed to avoid double counting data on child victims and unaccompanied and/ or separated children and support and assistance, which is the same as for children and adults.

2. Persons brought into formal contact with police/criminal justice system

Table 2.1 Persons brought into formal contact with the police and/or criminal justice system, by citizenship

List the total number of persons (by gender, age group and citizenship) brought into formal contact for trafficking in human beings with the police/criminal justice system. "Formal contact" with the police and/or criminal justice system may include persons suspected, or arrested or cautioned, for a criminal offence, at the national level. It includes persons suspected or accused in criminal proceedings until the final conclusion of those proceedings. Please refer to EUROSTAT methodological guidance 2017 for more details (<http://ec.europa.eu/eurostat/documents/64346/2989606/Methodological+guide+for+users/bfd3bb4a-67b7-44de-860e-cb911df9e17a>) Data on persons brought into formal contact for trafficking in human beings with the police/criminal justice system is to be collected on the total number of children (all persons under 18 years old, no further breakdown) and on adults, age group 18-24 and 25-30, 31+.

List the countries of citizenship of persons brought into formal contact for trafficking in human beings with the police/criminal justice system (by gender and age group) based on information in their passport or in other identity documents and state the total number of suspected traffickers per country. The data provided should be absolute numbers (not percentages).

Eurostat GEO codes should be used to identify the countries. Some human trafficking cases might have several suspected traffickers. To get the best comparable data, the total number of suspected traffickers per year is to be collected. In cases with several suspects, please include all suspected traffickers **in the data**.

Table 2.2 Number of persons brought into formal contact for trafficking in human beings with the police and/or criminal justice system, by form of exploitation (forms and sectors identified as in Table 1.3 and those involved in organised crime)

List the total number of persons brought into formal contact for trafficking in human beings with the police/criminal justice system (by gender and age group) by form of exploitation by year. A breakdown is introduced for the following exploitation purposes: Sexual, Forced Labour, Domestic Servitude, Forced Begging/Use for begging, Criminal Activities, Removal of Organs, Benefit Fraud, and Others (such as Forced Marriages, Illegal Adoptions, Selling of Children). Specify any other forms of exploitation included in the category "Others" in the metadata file. Please provide data on legal persons that are subject to police investigations in the metadata file such as the total number of investigations of legal persons, type of legal persons, sector of exploitation, parallel investigations with individual traffickers, etc.

In some cases the suspected trafficker committed the crime of human trafficking, using multiple forms of exploitation. In such cases, data should be provided on the most prevalent form of exploitation where possible (and an explanation provided in the metadata). If the system does not differentiate between the different forms of exploitation, the total number of suspected traffickers should be collected. If additional information on forms of exploitation based on studies is available, details should be included in the metadata. The total number of persons brought into formal contact for trafficking in human beings with the police/criminal justice system in Table 2.2 should correspond with the total number in Table 2.1. If data is not complete, the category 'unknown' should be filled in with the missing information.

Table 2.3 Number of persons brought into formal contact for trafficking in human beings with the police and/or criminal justice system involved in organised crime or migrant smuggling

Data is to be collected on the total number of suspected traffickers that can be linked to organised crime networks per year. For the purpose of this data collection process, the definition for organised crime of the Council Framework Decision 2008/441 should be used. The police will most likely register a link of the suspected trafficker with an organised crime group in appropriate cases. Smuggling: Directive 2002/90/EC established a common definition of the offense in its Article 1, General infringement: 1. Each Member State shall adopt appropriate sanctions on: (a) any person who intentionally assists a person who is not a national of a Member State to enter, or transit across, the territory of a Member State in breach of the laws of the State concerned on the entry or transit of aliens; (b) any person who, for financial gain, intentionally assists a person who is not a national of a Member State to reside within the territory of a Member State in breach of the laws of the State concerned on the residence of aliens.

3. Data on prosecuted traffickers by gender and age

Table 3.1 Persons prosecuted, by citizenship

List the total number of prosecuted persons for trafficking (by gender and age group). The date of registration (= start) of the case of the prosecuted trafficker in the public prosecution system should be used to identify the appropriate year. This number refers to persons against whom legal proceedings have been initiated by the prosecuting authorities. List the countries of citizenship of prosecuted traffickers (by gender and age group) based on information in their passport or in other identity documents and state the total number of prosecuted traffickers per country. The data provided should be absolute numbers (not percentages). Eurostat GEO codes should be used to identify the countries. Data on prosecuted traffickers is to be collected on the total number of children (all persons under 18 years old, no further breakdown) and on adults, age group 18-24 and 25-30, 31+.

NB: to avoid double counting, it is advisable to count only one citizenship per prosecuted trafficker.

Table 3.2 Number of persons prosecuted, by form of exploitation (forms identified as in Table 1.3)

This is the total number of prosecuted traffickers per form of exploitation. A breakdown is introduced for identified forms of exploitation as: Sexual, Forced Labour, Domestic Servitude, Forced Begging/Use for begging, Criminal Activities, Removal of Organs, Benefit Fraud, and Others (such as Forced Marriages, Illegal Adoptions, Selling of Children). Specify any other forms of exploitation included in the category "Others" in the metadata. In some cases the prosecuted trafficker committed the crime of human trafficking, using multiple forms of exploitation. In such cases, data should be provided on the most prevalent form of exploitation where possible (and an explanation provided in the metadata). If the system does not differentiate between the different forms of exploitation, the total number of prosecuted traffickers should be collected. If additional information on forms of exploitation based on studies is available, details should be included in the metadata. The total number of prosecuted traffickers in Table 3.2 should correspond with the total number in Table 3.1. If data is not complete, the category 'unknown' should be filled in with the missing information. Please provide data on legal persons that are subject to prosecution in the metadata file such as the total number of prosecutions of legal persons, type of legal persons, sector of exploitation, and parallel investigations with individual traffickers, etc.

Table 3.3 Number of final decisions by the public prosecution service (for persons prosecuted for trafficking in human beings), by nature of that decision

List the number of finalised prosecutions on individual traffickers. This data should reflect the total number of prosecuted persons for trafficking where the public prosecution services made a final decision on further procedures. The final decision could be: Decision to Summon for Trafficking in Human Beings, Decision to Summon for Other Criminal Offences, Out-of-Court Settlement and Others. In the category "Others", decisions can include not to prosecute (conditional or unconditional), decisions to joinder, decisions to transfer the case to another country, to transfer to another institution, Please specific the decisions placed in category "Others" in the metadata file.

NB: the total number of finalised prosecutions should be listed per individual trafficker and not cases that could contain several prosecuted traffickers. The total number of prosecuted traffickers in Tables 3.1 - 3.3 should be the same. If data is not complete, the category 'unknown' should be filled in with the missing information.

4. Court data on judgments of traffickers by age and gender and on users of services of trafficking victims**Table 4.1 Number of court judgments (including convictions) for trafficking in human beings**

List the total number of court judgment of traffickers (by gender and age group). The date of registration of the case in the court registration system should be used to identify the year. The different categories of court judgments are: Convictions, Acquittals and Others. Please specific judgments in category "Others" in the metadata file. Please specify in the metadata file if the court judgments refers to cases after appeal. This would provide information of the final court judgements as they are definitive. Decisions before appeal can still be modified according to the result of the appeal. Data on court judgments of traffickers is to be collected on the total number of children (all persons under 18 years old, no further breakdown) and on adults, age group 18-24 and 25-30, 31+.

Table 4.2 Number of convictions by form of exploitation (forms identified in Table 1.3)

List the total number of convictions for trafficking in human beings by form of exploitation (by gender and age group) by year. A breakdown is introduced for the following exploitation purposes: Sexual, Forced Labour, Domestic Servitude, Forced Begging/Use for begging, Criminal Activities, Removal of Organs, Benefit Fraud, and Others (such as Forced Marriages, Illegal Adoptions, Selling of Children). Specify any other forms of exploitation included in the category "Others" in the metadata file. Please provide data on legal persons that are subject to court judgments in the metadata file such as the total number, types of legal person, sector of exploitation, and parallel court judgments on individual traffickers, etc.

In some cases the convicted trafficker committed the crime of trafficking in human beings, using multiple forms of exploitation. In such cases, data should be provided on the most prevalent form of exploitation where possible (and an explanation provided in the metadata). If the system does not differentiate between the different forms of exploitation, the total number of convicted traffickers should be collected. If additional information on forms of exploitation based on studies is available, details should be included in the metadata. The total number of convicted traffickers in Table 4.2 should correspond with the total number in Table 4.1. If data is not complete, the category 'unknown' could be filled in with the missing information.

Table 4.3 Total value of assets confiscated and freezed from the traffickers convicted

List the total value of assets freezed and confiscated from the traffickers convicted in EURO. The value of property includes money in the form of cash, but also the value of confiscated real estate, cars, boats, etc. Please specify in the metadata file the number of different traffickers from whom the value of the assets was confiscated.

5. Criminal justice data for the criminal offence of use of services which are objects of exploitation of trafficking

This reporting is under Article 18 (4) Directive 2011/36/EU with breakdown by gender and age group (adult and child and as possible by 0-17; age group 18-24 and 25-30, 31+). Further information on type of offences to be considered is found in the Commission report of 02.12.2016 assessing the impact of existing national law, establishing as a criminal offence the use of services which are the objects of exploitation of trafficking in human beings, on the prevention of trafficking in human beings, in accordance with Article 23 (2) of the Directive 2011/36/EU.

General Country Notes

Member States were asked to provide metadata expanding on what they were able to report in the individual Tables of the questionnaire. This metadata are reproduced as they were received from Member States. Discussions did take place between European Commission/EU ATC and the Member States to understand any ambiguities or possible errors, and these have been amended wherever possible.

The general comments from each Member State are reported below and additional comments relating to specific tables are reported within the next section of the report.

General comments from Member States

Belgium: The source of the data is the Immigration Office. It must be mentioned that the provided data refers to victims that are accompanied by a specialised center. Thus the data do not refer to every potential victim referred to the centres.

Bulgaria: Bulgaria's National Commission for Combatting Trafficking in Human Beings (NCCTHB) relies solely on the Supreme Prosecutor's Office of Cassation for official data on identified victims of trafficking, proceedings, sentences and punishments. These victims are listed under Identified in this spreadsheet (data is unavailable on the identifying organisation). In addition, as the law-defined coordinator of the National Mechanism for Referral and Support of Trafficked Persons in Bulgaria, the NCCTHB receives signals for potential cases of trafficking from various stakeholders: partner institutions, Bulgarian missions abroad, international organisations and civil society organisations. These numbers are NOT included in this spreadsheet, but are provided in the narrative report. The reason is that the NCCTHB cannot either formally identify potential victims according to the law, and a proportion of the signals received turn out to be unlinked to trafficking. Also not included here but given in the narrative report are data provided to the NCCTHB by the Mission of the International Organisation for Migration in Sofia regarding victim return and reintegration, and by the non-governmental organisation Animus. The reason for this is that there is a tangible risk of double registration of a victim by both organisations, and the development of each case is not easily tracked.

Cyprus: The competent authority in Cyprus for recognizing victims of trafficking according to the national legislation is the Office of Combating Trafficking in Human Beings of the Cyprus Police. According to the National Referral Mechanism all parties refer presumed victims to the Social Welfare Services, to be informed of their rights according to the legislation before they are referred to the Police for the identification process

Czech Republic: Identified – victims identified by one of three NGOs or IOM Prague, who are involved in the national referral mechanism. If the victim is identified by another NGO or any other institution or body, but is not subsequently reported/supported/provided with services of the specialized NGO, we will not receive the information.

Presumed means that only victims supported and protected within the Program of Support and Protection of Victims of THB of the Ministry of the Interior.

Denmark: The Danish Centre against Human Trafficking has the task of registering identified victims of human trafficking. Three authorities can officially identify a victims of Human Trafficking and the Danish Centre against Human Trafficking monitors and collects data from each authority ad hoc and on an annually basis. Victims officially identified by the Immigration Service are included under Immigration and victims officially identified by the Danish Centre against Human Trafficking and the court are included under 'Other'.

Spain: The detection and identification processes is described in the points V and VI of our National Protocol for Victims Protection.

<http://www.violenciagenero.msssi.gob.es/otrasFormas/trata/normativaProtocolo/marco/docs/ProtocoloTrataEN.pdf>

Once the victims are identified, they have to be registered in national database managed by the

Intelligence Centre against Terrorism and Organized Crime (CITCO). This database only registers the information for official identified victims, nor for presumed victims.

Finland: National Assistance System for Victims of Human Trafficking (www.ihmiskauppa.fi). The assistance system is a governmental actor, which has merged in 2017 into the Finnish Immigration Service. The assistance system is responsible for providing assistance to all presumed and identified victims of trafficking, who are in need of assistance (and who agree to enter assistance services). The assistance system collects statistics on its customers. The assistance system does not collect statistics on whether its customers are formally identified or merely presumed victims. Finnish legislation has taken into account the difference between identified and presumed victims since July 1st 2015. Hence any possible statistical information about this can be calculated from the beginning of 2016 only.

Croatia: According to the Protocol of the Government of the Republic of Croatia, for identification, assistance and protection of victim of THB

Hungary: Please note that data filtered and provided here in this file refers to the following category of criminal acts - this circumstance is the result of the characteristics of national legislation: Categorization of criminal offenses related to trafficking in human beings is as follows: *Sexual exploitation* (Trafficking in Human Beings (for the purpose of sodomy or sexual intercourse), Sexual coercion, Pandering, Promotion of prostitution, Living on earnings of prostitution, Use of child prostitution, Child pornography, Sexual abuse).

Forced labour or forced service (slavery, servitude)(Forced labour, Abuse of a minor, Use of Coercion (for the purpose of forced begging and forced labour), Violation of Personal Freedom and forcing the victim into forced labour, Trafficking in Human Beings (subjecting the victim to forced labour), Child labour, Unlawful Employment of Third-Country Nationals)

Illegal Use of a Human Body Trafficking in Human Beings for the purpose of unlawful use of the human body, Unlawful use of the human body) and Other types of exploitation.

Ireland: All potential victims of human trafficking who are reported to our Competent Authority (CA), the Human Trafficking Investigation and Coordination unit within our national Police Force, are informed of the services and supports available to them i.e. the Reception and Integration Agency, the Health Service Executive and the Legal Aid Board. These bodies are also informed of the person's details. Each individual can then decide which services to avail of depending on their individual circumstances. The range of assistance and support services provided under the National Referral Mechanism to both foreign and domestic trafficking in person victims, depending on their individual circumstances. See <http://www.blueblindfold.gov.ie/en/bbf/pages/doje>. In this workbook Identified victims refers to persons mentioned above, who have been referred to our CA. These victims can be reported by State bodies, non- Governmental support organisations or members of the public.

Data on Presumed victims is sent by the aforementioned non-Governmental organisations to Ireland's NREM, the Anti-Human Trafficking Unit (AHTU) within the Department of Justice and Equality. Due to victim confidentiality and the lack of unique reference numbers, this data is not available in a format that would allow for Presumed victims to be disaggregated from Identified victims. Therefore, data on Presumed victims has not been presented in this workbook. All figures refer to Identified victims.

Lithuania: Formally THB victims can be identified by investigators, prosecutors or judges. The data are included into the national criminal data basis. To avoid duplication, presumed victims are included into official statistics after their formal identification. The system automatically does not generate data on who exactly performed the official identification.

Latvia: According to the national legal acts victims can be formally identified only by a person directing the criminal proceeding or by the mandated NGO. Victims indicated in this sheet are identified/and presumed victims who were assessed and formally identified by the State Police, mandated NGOs. Victims are recognized as potential victims of human trafficking by the police, NGOs, consular officials, border guards, migration officers, social workers, municipal police officers,

victims approach for assistance themselves.

Netherlands: The main data source for victim registration is the NGO CoMensha (Coordination Centre for Human Trafficking). CoMensha registers possible victims at the request of the Ministry of Justice and Security, which are used for the monitoring and reporting task of the Dutch National Rapporteur on Trafficking in Human Beings and Sexual Violence against Children. All possible victims should be reported by any organisation or person to CoMensha. The police and the Royal Netherlands Marechaussee are officially obligated by law to register any possible victims that they encounter with CoMensha. In addition, other organisations are also strongly urged to report victims to CoMensha. Hence, possible victims are also referred by, for example, the Inspectorate of Social Affairs and Employment (Inspectorate SZW), regional care coordinators, shelters, other institutions that provide support to (possible) victims, organised return institutions, refugee aid organisation and legal services. Individuals, including (possible) victims themselves, are also able to register victims; however, this does not occur frequently.

Austria: The first data questionnaire comprises data provided by the Austrian Criminal Intelligence Service and the Ministry of Justice. Unfortunately, the statistical analysis is not (yet) compatible with the data provided by victim protection services (see second data questionnaire provided and the joint commentary of the Federal Ministry of the Interior, the Federal Ministry of Justice and the NGO LEFÖ-IBF (Intervention Centre for Trafficked Women) on why it is not practicable to set up a unified data collection system.

The second data questionnaire response comprises data provided by the three main victim assistance services in Austria: LEFÖ-IBF (Intervention Centre for Trafficked Women), MEN VIA (assistance for male victims of THB) and Drehscheibe (service of the city of Vienna for victims of child trafficking). Unfortunately, the statistical analysis is not (yet) compatible with the data provided by state authorities (see second data questionnaire provided and the joint commentary of the Federal Ministry of the Interior, the Federal Ministry of Justice and the NGO LEFÖ-IBF (Intervention Centre for Trafficked Women) on why it is not practicable to set up a unified data collection system.

The data from the two separate questionnaire responses have been merged in this report.

Poland: Polish BG Data base, Polish Police Data base and Prosecutor's Office Data base

Portugal: The OTSH was created in 2008 via the Decree-Law nº 229/2008 of November 27. It is mandated to produce, collect, analyze and disseminate information on THB and other forms of gender violence. Aside other activities, the OTSH is the responsible body for the national monitoring system on THB, but it is not the national official representative for crime and criminal justice statistics – role assumed by the Portuguese Directorate-General for Justice Policy - Ministry of Justice. The OTSH collects harmonized disaggregated and anonymized data from more than 30 data providers from governmental bodies (e.g. Directorate-General for Justice Policy/ Ministry of Justice, Law Enforcement Agencies, Social Security Institute, amongst other), non-governmental bodies/NGO's (e.g. Shelters, Multidisciplinary Specialized Teams for the Support of THB victims) and Intergovernmental organizations (such as the Lisbon Office of the International Organization for Migration).

The data collection starts with the suspicion of a THB situations/victim that is registered as 'Presumed). If the register originates from Law Enforcement Agencies (or transit to them by other organization, namely a NGO), the register has the following 1st classification "Pending/In Investigation". After the conclusion the competent authorities classified this set as: 2) "Confirmed VoT", or 3) "Non-Confirmed VoT" (e.g. other crime).

If the register originates from other body and does not transit to criminal investigation (e.g. victims refusal), the registers are classified as: 1) "Flagged" or 2) "Not Considered" (e.g. other crime).

It is important to mention that the classification given to the registers is done by the registering organization.

Each 3 months the Observatory on Trafficking in Human Beings conducts reports and meetings. In the beginning of each here the Observatory conducts its annual report. All reports and thematic bulletins are validated by the data providers putting into practice the premise of collaborative work.

Slovenia: The process of identification of a victim of THB can be initiated by the police or a

competent NGO. Afterwards, the Police decides whether a person is a victim of THB (i.e. identified victims), refers the person for assistance which is provided by NGOs and collects evidence necessary to initiate a criminal case.

Slovakia: Data for years 2014 and 2015 refer only to victims who voluntarily were included into the specialized Programme of Support and Protection of Trafficked Victims. Data for year 2016 refer to all victims (i.e. those who entered the specialized programme - presumed victims and who were identified by the police) - they were 45 victims in total (32 identified victims and 13 presumed victims).

United Kingdom: There are three main sources of data available on the potential scale of modern slavery in the UK:

1. Referrals of potential victims to the National Referral Mechanism (NRM), the UK's identification and support system for victims of modern slavery.
2. Referrals of potential victims under the 'duty to notify' provision of the Modern Slavery Act 2015 which applies to England and Wales. Specified public bodies have a duty to notify the Government if they encounter an adult victim of modern slavery.
3. The number of modern slavery crimes recorded by the police.

The data in tabs 1.1-1.8 is from referrals of potential victims to the NRM.

Country notes applicable to Table A1.1, A1.1a and A1.1b

Cyprus: The competent authority in Cyprus for recognizing victims of trafficking according to the national legislation is the Office of Combating Trafficking in Human Beings of the Cyprus Police. According to the National Referral Mechanism all parties refer presumed victims to the Social Welfare Services, to be informed of their rights according to the legislation before they are referred to the Police for the identification process

Czech Republic: Identified – victims identified by one of three NGOs or IOM Prague, who are involved in the national referral mechanism. If the victim is identified by another NGO or any other institution or body, but is not subsequently reported/supported/provided with services of the specialized NGO, we will not receive the information. Presumed – only victims supported and protected within the Program of Support and Protection of Victims of THB of the Ministry of the Interior.

Denmark: The Danish Centre against Human Trafficking has the task of registering identified victims of human trafficking. Three authorities can officially identify a victim of Human Trafficking and the Danish Centre against Human Trafficking monitors and collects data from each authority ad hoc and on an annually basis. Victims officially identified by the Immigration Service are included under Immigration and victims officially identified by the Danish Centre against Human Trafficking and the court are included under 'Other'. Denmark does not register presumed victims.

Finland: National Assistance System for Victims of Human Trafficking (www.ihmiskauppa.fi). The assistance system is a governmental actor, which has merged in 2017 into the Finnish Immigration Service. The assistance system is responsible for providing assistance to all presumed and identified victims of trafficking, who are in need of assistance (and who agree to enter assistance services). The assistance system collects statistics on its customers. The assistance system does not collect statistics on whether its customers are formally identified or merely presumed victims. Finnish legislation has taken into account the difference between identified and presumed victims since July 1st 2015. Hence any possible statistical information about this can be calculated from the beginning of 2016 only.

Netherlands: It is important to note that there are no data on identified victims available, since victims registered at CoMensha are all possible victims and they are not subjected to a formal assessment on victimization. This is essential for the interpretation of the statistics on victims in The Netherlands provided by the Dutch National Rapporteur.

Secondly, contrary to earlier data questionnaires on trafficking in human beings filled out by the Dutch National Rapporteur, all the data on possible victims included in this questionnaire (1.1-1.4b) do not include possible victims of sexual exploitation solely registered by the Royal Netherlands Marechaussee (RNLM, the Dutch Border Police). A sub-article of the of the Dutch Criminal Code Article concerning trafficking in human beings (Article 273f (1)(3)), considers the recruiting, taking away or abducting of a person with the intention of inducing that person to make himself or herself available for sexual acts with or for a third party for payment in another country. Until recently, neither means nor the intention of exploitation was required. However, in 2016 the Dutch Supreme Court ruled that the intention of exploitation is actually a “latent” part of this subsection of the Dutch definition. The Netherlands is also the only country that recognises this particular offence as human trafficking and thereby this may hamper international comparability. This specific situation refers to almost all possible victims of sexual exploitation registered solely by the Royal Netherlands Mareschaussee. The Dutch National Rapporteur has recently decided not to include these individuals as possible victims of trafficking in persons in its own analyses and publications, and will also no longer include them in (international) data questionnaires. Hence, numbers on the year 2014 in this questionnaire will differ from those provided in earlier questionnaires.

The number of possible victims per registering organisation (1.1) is not equal to the total number

of possible victims per year (1.2) because some victims were registered by two or more organisations.

In general, it is not possible to report on how many of the minor victims of trafficking were unaccompanied minors or separated children, since this information is not structurally recorded.

Portugal: The OTSH was created in 2008 via the Decree-Law nº 229/2008 of November 27. It is mandated to produce, collect, analyze and disseminate information on THB and other forms of gender violence. Aside other activities, the OTSH is the responsible body for the national monitoring system on THB, but it is not the national official representative for crime and criminal justice statistics – role assumed by the Portuguese Directorate-General for Justice Policy - Ministry of Justice. The OTSH collects harmonized disaggregated and anonymized data from more than 30 data providers from governmental bodies (e.g. Directorate-General for Justice Policy/ Ministry of Justice, Law Enforcement Agencies, Social Security Institute, amongst other), non-governmental bodies/NGO's (e.g. Shelters, Multidisciplinary Specialized Teams for the Support of THB victims) and Intergovernmental organizations (such as the Lisbon Office of the International Organization for Migration).

In Portugal, in the category "Police" it is to be considered also the category "Border Guards" as the national Immigration and Border Guard is a Law Enforcement Agency (LEA).

By 'Presumed' victim is to be considered the registers with the following classification given by data providers: "Pending/In Investigation" (registers by LEA that may conclude at the end of the criminal investigation in 'Identified' or 'Not identified') and "Flagged by NGO/Other bodies" - registers that for several reasons did not transit to LEA.

It is counted 'Identified' and 'Presumed' victims in the typification Portugal as a Origin (domestic or abroad), Transit and Destination country. It should be noticed that in 'Origin' one can have not only Portuguese citizens but also foreign citizens that have migrated to Portugal (for a different length of time) and that were recruited in Portugal (either domestic trafficking or abroad). However, this aggregation (domestic trafficking and in transit) it is not considered in indicator "1.7 Number of victims (Identified plus Presumed) by country of destination".

Romania: For the police it was included also cases of identification from border guards. For the other was included: Romanian diplomatic mission, IO and other.

Slovakia: Completed with File 1 File 1: Tables 1,1 and 1,2 are separately filled in for the period of 2014 and 2015 for victims, who voluntarily agreed to enter the program (Presumed victims) and separately to the victims who appeared procedurally in the position of aggrieved person in cases investigated by NUCIM (identified victims), as there was no unified statistics of all HT victims during this period. It's not possible to count the numbers of victims, since some of the victims were also kept in IC statistics and NUCIM statistics and double count would occur.

A unified statistics for 2016 already exists for all HT victims recorded by IC and NUCIM, without the risk of double counting, as the data are collected from the uniform statistical system of the Ministry of the Interior of the SR to HT victims, this is a total of 45 HT victims. Information on the presumed victims was not provided by the non-governmental sector in the monitoring period. If such victims were registered by the non-governmental sector outside the IC statistical system, we do not obtain them, and therefore we cannot state them. For the purpose of this report, we also do not state the data on presumed or identified victims register in the SR and at the same time in a foreign NRM, although we have this information from 2016,.

Country notes applicable to Table A1.2 and A1.2a

Denmark: Denmark does not register presumed victims.

Netherlands: It is important to note that there are no data on identified victims available, since victims registered at CoMensha are all possible victims and they are not subjected to a formal assessment on victimization. This is essential for the interpretation of the statistics on victims in The Netherlands provided by the Dutch National Rapporteur.

Secondly, contrary to earlier data questionnaires on trafficking in human beings filled out by the Dutch National Rapporteur, all the data on possible victims included in this questionnaire (1.1-1.4b) do not include possible victims of sexual exploitation solely registered by the Royal Netherlands Marechaussee (RNLM, the Dutch Border Police). A sub-article of the of the Dutch Criminal Code Article concerning trafficking in human beings (Article 273f (1)(3)), considers the recruiting, taking away or abducting of a person with the intention of inducing that person to make himself or herself available for sexual acts with or for a third party for payment in another country. Until recently, neither means nor the intention of exploitation was required. However, in 2016 the Dutch Supreme Court ruled that the intention of exploitation is actually a "latent" part of this subsection of the Dutch definition. The Netherlands is also the only country that recognises this particular offence as human trafficking and thereby this may hamper international comparability. This specific situation refers to almost all possible victims of sexual exploitation registered solely by the Royal Netherlands Mareschaussee. The Dutch National Rapporteur has recently decided not to include these individuals as possible victims of trafficking in persons in its own analyses and publications, and will also no longer include them in (international) data questionnaires. Hence, numbers on the year 2014 in this questionnaire will differ from those provided in earlier questionnaires.

The number of possible victims per registering organisation (1.1) is not equal to the total number of possible victims per year (1.2) because some victims were registered by two or more organisations.

In general, it is not possible to report on how many of the minor victims of trafficking were unaccompanied minors or separated children, since this information is not structurally recorded.

Portugal: It is counted 'Identified' and 'Presumed' victims in the typification Portugal as a Origin (domestic or abroad), Transit and Destination country. It should be noticed that in 'Origin' one can have not only Portuguese citizens but also foreign citizens that have migrated to Portugal (for a different length of time) and that were recruited in Portugal (either domestic trafficking or abroad). However, this aggregation (domestic trafficking and in transit) it is not considered in indicator "1.7 Number of victims (Identified plus Presumed) by country of destination".

Indicators 1.2. it is counted 'Identified' and 'Presumed' victims in the typification. Portugal as a Origin (domestic or abroad), Transit and Destination country. It should be noticed that in 'Origin' one can have not only Portuguese citizens but also foreign citizens that have migrated to Portugal (for a different length of time) and that were recruited in Portugal (either domestic trafficking or abroad).

Indicator 1.2. "Victims by age and Gender": table year 2014: The total of adult male presumed victims is 12 as it includes registers that although not knowing the age (absolute value) it is known that the registers refers to adults.

Indicator 1.2. "Victims by age and Gender": table year 2014: The total of presumed adult female victims is 62 as it includes registers that although not knowing the age (absolute value) it is known that the register refers to adult.

Indicator 1.2. "Victims by age and Gender": table year 2014: The total of presumed children female victims is 6 as it includes register that although not knowing the age (absolute value) it is known that the register refers to a child.

Indicator 1.2. "Victims by age and Gender": table year 2014: The total of presumed victims of unknown gender has registers (protected by statistical secrecy) that although not knowing the age (absolute value) it is known that refers to children.

Indicator 1.2. "Victims by age and Gender": table year 2015: The total of presumed adult male victims is 51 as it includes registers that although not knowing the age (absolute value) it is known that it refers to adults.

Indicator 1.2. "Victims by age and Gender": table year 2015: The total of presumed female adult victims is 26 as it includes registers that although not knowing the age (absolute value) it is known that the registers refers to adults.

Indicator 1.2. "Victims by age and Gender": table year 2015: The total of presumed victims of unknown gender has register (protected by statistical secrecy) that although not knowing the age (absolute value) it is known that the registers refers to adult.

Indicator 1.2. "Victims by age and Gender": table year 2016: The total of identified adult male victims is 105 as it includes registers that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator 1.2. "Victims by age and Gender": table year 2016: The total of presumed adult male victims is 29 as it includes registers that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator 1.2. "Victims by age and Gender": table year 2016: The total of presumed unknown gender / Adult (protected by statistical secrecy) includes registers that although not knowing the age (absolute value) it is known that it refers to adult.

Slovakia: Tables 1,1 and 1,2 are separately filled in for the period of 2014 and 2015 for victims, who voluntarily agreed to enter the program (Presumed victims) and separately to the victims who appeared procedurally in the position of aggrieved person in cases investigated by NUCIM (identified victims), as there was no unified statistics of all HT victims during this period. It's not possible to count the numbers of victims, since some of the victims were also kept in IC statistics and NUCIM statistics and double count would occur. Unified statistics for 2016 already exists for all HT victims recorded by IC and NUCIM, without the risk of double counting, as the data are collected from the uniform statistical system of the Ministry of the Interior of the SR to HT victims, this is a total of 45 HT victims.

Information on the presumed victims was not provided by the non-governmental sector in the monitoring period. If such victims were registered by the non-governmental sector outside the IC statistical system, we do not obtain them, and therefore we cannot state them. For the purpose of this report, we also do not state the data on presumed or identified victims register in the SR and at the same time in a foreign NRM, although we have this information from 2016.

Country notes applicable to Table A1.3a, A1.3b, A1.3c and A1.3d

Bulgaria: "Others" category: Forced custody; Selling a child; crimes against marriage, family and youth, Trafficking for the purpose of holding in forced submission and trafficking of pregnant women for selling their babies (according to Bulgarian Criminal Code).

Denmark: N34 Marriage B104 Slavelike conditions and production of pornographic materials

Spain: Data collected as unknown is referred to forced marriages

Croatia: Other ways of sexual exploitation are in apartments, camps, homes, by internet, cars and hotels Other ways of exploitation are in transit from a third countries. Other ways of labour exploitation are in massage parlours without sexual exploitation

Ireland: "Other" forms of exploitation include cases where multiple forms of exploitation were recorded, e.g. Sexual and Labour exploitation.

Luxembourg: The numbers listed for sexual exploitation under "others" refer to what the Police considers as "places of debauchery". In this categorization are included: internet websites, hotels, apartments etc.

Latvia: Number of victims by form of exploitation (Identified and Presumed) - rows 34, 69, 104 (Others **) - exploitative sham marriage, which usually is combined form of exploitation and might contain sexual exploitation/forced labour /domestic servitude

Number of victims by form of exploitation (Identified and Presumed) - row 82 (Others) - victims were prostituted in apartments/flats.

Netherlands: Some possible victims are exploited both sexually and non-sexually and/or they were exploited in more than more sector within a category such as sexual exploitation or labour exploitation (for instance, both for escort and prostitution in a brothel). If that was the case, they were counted for each of the subsectors they were exploited in. Overall, this means that the total numbers by form of exploitation regarding a certain year are not equal to the total number of possible victims in that year.

The following subcategories of sexual exploitation are not optional for victim registration at CoMensha: strip clubs/bars; pornographic industry. In the category 'windows, brothels', sex clubs are also included.

The following subcategories labour exploitation are not optional for victim registration at CoMensha: agriculture (joint registration option with fishery and forestry); textile industry (joint registration option with food industry; fishery (see agriculture). These were all included under 'other' for labour exploitation.

For victims of exploitation for domestic labour no distinction is made between regulated labour (within an organisation providing domestic services, for instance) and servitude/slavery, hence these victims were included under 'other' labour exploitation.

Criminal exploitation is not subdivided into different forms in Dutch victim registration.

The overall category 'Unknown' exploitation refers both to victims for whom the form of exploitation was not registered as well as to victims who were identified before work/exploitation had commenced.

Austria: The value "18" given to an aggregate category mixing "Criminal activities" and "Forced begging". To disaggregate this category into categories, we calculate the mean of 9 for each category.

Portugal: Indicator 1.3) "Number of victims by form of exploitation (Identified and Presumed)": table year 2014 – Male Adult /"Forced Labour / Construction" – total of adults protect by statistical secrecy - although not knowing the age (absolute value) it is known that it refers to adults.

Indicator 1.3) "Number of victims by form of exploitation (Identified and Presumed)": table year 2014 - Male /"Forced Begging/use for begging" – total of adults protect by statistical secrecy - although not knowing the age (absolute value) it is known that it refers to adults.

Indicator 1.3) "Number of victims by form of exploitation (Identified and Presumed)": table year 2014 - Female /"Forced Begging/use for begging" – total of adults protect by statistical secrecy - although not knowing the age (absolute value) it is known that it refers to adults.

Indicator 1.3) "Number of victims by form of exploitation (Identified and Presumed)": table year 2014 - Unknown/"Forced Begging/use for begging" – total of children protect by statistical secrecy - although not knowing the age (absolute value) it is known that it refers to children.

Indicator 1.3) "Number of victims by form of exploitation (Identified and Presumed)": table year 2014 – Others Forms (total 11) includes, for instance registers of: Labour Exploitation & Criminal Activities (petty crimes) - simultaneously exploitation; Labour & Sexual Exploitation – simultaneously exploitation.Indicator 1.3) "Number of victims by form of exploitation (Identified and Presumed)": table year 2014 - Total of Female

Children/Unknown Forms includes a register that although not knowing the age (absolute value) it is known that it refers to children.

Indicator 1.3) "Number of victims by form of exploitation (Identified and Presumed)": table year 2014 - Total of Unknown gender - Children/Unknown Forms includes a register that although not knowing the age (absolute value) it is known that it refers to children.

Indicator 1.3) "Number of victims by form of exploitation (Identified and Presumed)": table year 2015 - Total of Female/Adults – "Strip clubs/bars" include register that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator 1.3) "Number of victims by form of exploitation (Identified and Presumed)": table year 2015 - Male/Forced Labour – total of Adults - Agriculture include register that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator 1.3) "Number of victims by form of exploitation (Identified and Presumed)": table year 2015 - Male/Forced Labour - Adults - Unknown include register that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator 1.3) "Number of victims by form of exploitation (Identified and Presumed)": table year 2015 – Unknown / Forced Labour "Unknown" / Total of Adults - include register that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator 1.3) "Number of victims by form of exploitation (Identified and Presumed)": table year 2015 - Female/total of Adults – "Others" include register that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator 1.3) "Number of victims by form of exploitation (Identified and Presumed)": table year 2015 – Others Forms (total 10) includes, for instance registers of: Adoption; Criminal Activities & Forced Begging.

Indicator 1.3) "Number of victims by form of exploitation (Identified and Presumed)": table year 2016 –Male - Total of Adults / Agriculture (83) - include register that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator 1.3) "Number of victims by form of exploitation (Identified and Presumed)": table year 2016 –Male - Total of Adults / HORECA (protected by statistical secrecy) - include register that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator 1.3) "Number of victims by form of exploitation (Identified and Presumed)": table year 2016 –Total of Adults / Forced Labour / "Unknown" - includes registers that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator 1.3) "Number of victims by form of exploitation (Identified and Presumed)": table year 2016 – Unknown gender / Total of adults / Forced Labour "Unknown" - include register that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator 1.3) "Number of victims by form of exploitation (Identified and Presumed)": table year 2016 – Others Forms (total 11) includes, for instance registers of: Forced Labour & Slavery (simultaneously); Forced Labour and Sexual Exploitation (simultaneously).

However, this aggregation (domestic trafficking and in transit) it is not considered in indicator

Slovakia: Completed with File 1 for 2016 Completed with File 2 for 2014 and 2015 In the 2016 data), this table is filled in only to the victims who were provided with assistance from the program (Presumed victims). Higher numbers are reported than the number of victims recorded as presumed victims who were receiving program care, since we record several forms of exploitation in some victims in the "form of exploitation" category.

"Other" category: Slavery or practice similar to slavery; Forced marriage

For years 2014 and 2015 this table is filled in only to the victims who were statistically registered by NUCIM within criminal proceedings (identified victims).

"Other" category: Forced marriage, combination of forced marriage with sexual exploitation.

Country notes applicable to Table A1.4b and A1.4c

Belgium: "xxx" citizenship category is replaced by "unknown" Citizenship code translate in ISO codification

Portugal: Note to Indicator "1.4 Number of victims (Identified plus Presumed) by citizenship": not counted registers in which the citizenship is not known.

Indicator "1.4 Number of victims (Identified plus Presumed) by citizenship": table year 2014 – RO / Total of adults male - includes registers that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator "1.4 Number of victims (Identified plus Presumed) by citizenship": table year 2014 – RO / Total of children female - includes registers that although not knowing the age (absolute value) it is known that it refers to children.

Indicator "1.4 Number of victims (Identified plus Presumed) by citizenship": table year 2014 – RO / Total of Adult female - includes registers that although not knowing the age (absolute value) it is known that it refers to adults.

Indicator "1.4 Number of victims (Identified plus Presumed) by citizenship": table year 2014 – PT / Total of adults male - includes registers that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator "1.4 Number of victims (Identified plus Presumed) by citizenship": table year 2015 – PT / Total of Adult male - includes registers that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator "1.4 Number of victims (Identified plus Presumed) by citizenship": table year 2015 – PT / Total of Adult female - includes registers that although not knowing the age (absolute value) it is known that it refers to adult. Indicator "1.4 Number of victims (Identified plus Presumed) by citizenship": table year 2015 – BR / Total of Adult female - includes registers that although not knowing the age (absolute value) it is known that it refers to adult

Indicator "1.4 Number of victims (Identified plus Presumed) by citizenship": table year 2015 – TH / Total of Adult "Unknown" - includes registers that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator "1.4 Number of victims (Identified plus Presumed) by citizenship": table year 2016– PT / Total of Adult Male - includes registers that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator "1.4 Number of victims (Identified plus Presumed) by citizenship": table year 2016– RO/ Total of Adult Male - includes registers that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator "1.4 Number of victims (Identified plus Presumed) by citizenship": table year 2016– BR/ Total of Adult Male - includes registers that although not knowing the age (absolute value) it is known that it refers to adult.

Slovakia: for 2014 and 2015: Two data files were returned. Number of victims with Slovakian country of recruitment completed with File 2 and Other country of recruitment completed with File 1 (but not "Slovakia" as country of recruitment to avoid double counting). For 2016 : Completed with File 1 In Appendix N°2, this table is filled in only to the victims who were provided with assistance from the program (Presumed victims). Citizenship code translate in ISO codification. In appendix N°3, this table is filled in only to the victims who were statistically registered by NUCIM within criminal proceedings (identified victims).

"Other" category: Forced marriage, combination of forced marriage with sexual exploitation

The combination of the two data files have been taken as the Slovakian response.

Table A1.4b: Number of registered victims in the EU by citizenship and form of exploitation

Country notes applicable to Table A1.5a

Denmark: Denmark does not register country of recruitment No available data

Spain: Figures are the same than in sheet 1.4

Luxembourg: Empty data table No data is available or data is not sufficiently reliable/correct to be included in the Excel document

Latvia: Number of victims (Identified plus Presumed) by country of recruitment, by form of exploitation - columns H, Q, Z (Other) - exploitative sham marriage, which usually is combined form of exploitation and might contain sexual exploitation/forced labour/domestic servitude

Netherlands: Insufficient data available on country of recruitment.

Portugal: Note to Indicator 1.5 "Number of victims (Identified plus Presumed) by country of recruitment" - Data to this indicator results from the analysis of the variables "citizenship, country of origin, date of entrance in PT" as examples. For the time being the OTSH does not collect 'Country of Recruitment'. Additionally, it is well known the rotation and mobility of (presumed) VoT within countries (Europol and European Commission Progress Report, 2016). As such, in some registers the evidence of the country of recruitment is straightforward, but in other this correlation is not direct (e.g. other country of origin that does not match to country of citizenship that can be either associated to migration flow or to THB recruitment). The data provided must be overall interpreted as having a low feasibility.

Indicator 1.5 "Number of victims (Identified plus Presumed) by country of recruitment": Table 2014, total of adults Male / PT - includes registers that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator 1.5 "Number of victims (Identified plus Presumed) by country of recruitment": Table 2014, total of adults Male / RO - includes registers that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator 1.5 "Number of victims (Identified plus Presumed) by country of recruitment": Table 2014, total of adults Female / RO - includes registers that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator 1.5 "Number of victims (Identified plus Presumed) by country of recruitment": Table 2015, total of adults Male / PT - includes registers that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator 1.5 "Number of victims (Identified plus Presumed) by country of recruitment": Table 2015, total of adults Female / PT - includes registers that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator 1.5 "Number of victims (Identified plus Presumed) by country of recruitment": Table 2015, total of adults Female / BR - includes registers that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator 1.5 "Number of victims (Identified plus Presumed) by country of recruitment": Table 2016, total of adults Male / PT - includes registers that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator 1.5 "Number of victims (Identified plus Presumed) by country of recruitment": Table 2016, total of adults Male / RO - includes registers that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator 1.5 "Number of victims (Identified plus Presumed) by country of recruitment": Table 2016, total of adults Male / BR - includes registers that although not knowing the age (absolute value) it is known that it refers to adult.

Romania: It was created a new field for the country of recruitment, unknown, for the cases in which there was no information related to the country

Slovakia: for 2014 and 2015 : Two excel spreadsheets were produced. Number of victims with Slovakian country of recruitment completed with File 2 and Other country of recruitment completed with File 1 (but not "Slovakia" as country of recruitment to avoid double counting).

For 2016 : Completed with File 1

In appendix N°3, this table is filled in only to the victims who were statistically registered by NUCIM within criminal proceedings (identified victims).

"Other" category : Forced marriage, combination of forced marriage with sexual exploitation

In Appendix N°2, this table is filled in only to the victims who were provided with assistance from the program (Presumed victims).

United Kingdom: Data not available, we do not disaggregate by country of recruitment.

Source: EU Member States. : Data not available. The EU28 Total reflects the total for a given year based on the countries which provided data for that year. Not all EU Member States provided data for all of the three reference years and direct comparisons of EU28 totals between years may therefore be misleading. Row totals are supplied by Member States and may not be the sum of relevant cell values.

Country notes applicable to Table A1.5b

Denmark: Denmark does not register country of recruitment No available data

Spain: Figures are the same than in sheet 1.4b

Citizenship code translate in ISO codification

Croatia: Other ways of sexual exploitation are in apartments, camps, homes, by internet, cars and hotels Other ways of exploitation are in transit from a third countries Other ways of labour exploitation are in massage parlours without sexual exploitation

Luxembourg: Empty data table No data is available or data is not sufficiently reliable/correct to be included in the Excel document

Netherlands: Insufficient data available on country of recruitment. No available data

Portugal: Indicator "1.5 B "Number of victims (Identified plus Presumed) by country of recruitment, by form of exploitation": Table 2014 "Other forms of Exploitation" includes registers such as: Forced Labour & Criminal Activities (simultaneously); Sexual Exploitation & Criminal Activities (simultaneously).

Indicator "1.5 B "Number of victims (Identified plus Presumed) by country of recruitment, by form of exploitation": Table 2015 "Other forms of Exploitation" includes registers such as: Criminal Activities & Forced Begging (simultaneously); Sexual Exploitation & Forced Labour (simultaneously).

Indicator "1.5 B "Number of victims (Identified plus Presumed) by country of recruitment, by form of exploitation": Table 2016 "Other forms of Exploitation" includes registers such as: Sexual Exploitation & Forced Labour (simultaneously); Adoption.

Romania: Cases of domestic servitude, when encountered are included within labour category

Slovakia: for 2014 and 2015 : Two Excel files were supplied. Number of victims with Slovakian country of recruitment completed with File 2 and Other country of recruitment completed with File 1 (but not "Slovakia") as country of recruitment to avoid double counting).

For 2016 : Completed with File 1

In appendix N°3, this table is filled in only to the victims who were statistically registered by NUCIM within criminal proceedings (identified victims).

"Other" category : Forced marriage, combination of forced marriage with sexual exploitation

In Appendix N°2, this table is filled in only to the victims who were provided with assistance from the program (Presumed victims).

Higher numbers are reported than the number of victims recorded as presumed victims who were receiving program care, since we record several forms of exploitation in some victims in the "form of exploitation" category.

United Kingdom: Data not available, we do not disaggregate by country of recruitment

Source: EU Member States. : Data not available. The EU28 Total reflects the total for a given year based on the countries which provided data for that year. Not all EU Member States provided data for all of the three reference years and direct comparisons of EU28 totals between years may therefore be misleading. Row totals are supplied by Member States and may not be the sum of relevant cell values.

Country notes applicable to Table A1.6a

Denmark: Denmark does not register country of recruitment

Hungary: Trafficking in Human Beings (subjecting the victim to forced labor)

Latvia: Number of victims (Identified plus Presumed) by means of recruitment - row 32 (Others**) - a victim was not recruited, but abducted

Portugal: Indicator "1.6 Number of victims (Identified plus Presumed) by means of recruitment": Table 2014 / Male - Total of Adults, Means "Other" - includes registers that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator "1.6 Number of victims (Identified plus Presumed) by means of recruitment": Table 2014 / Male - Total of Adults, Means "Unknown" - includes registers that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator "1.6 Number of victims (Identified plus Presumed) by means of recruitment": Table 2014 / Female - Total of Children, Means "Unknown" - includes registers that although not knowing the age (absolute value) it is known that it refers to children.

Indicator "1.6 Number of victims (Identified plus Presumed) by means of recruitment": Table 2014 / Female - Total of Adults, Means "Unknown" - includes registers that although not knowing the age (absolute value) it is known that it refers to adults.

Indicator "1.6 Number of victims (Identified plus Presumed) by means of recruitment": Table 2014 / Unknown - Total of Children, Means "Unknown" (protected by statistical secrecy) - includes registers that although not knowing the age (absolute value) it is known that it refers to children.

Indicator "1.6 Number of victims (Identified plus Presumed) by means of recruitment": Table 2015 / Male - Total of Adults, Means "Oral" - includes registers that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator "1.6 Number of victims (Identified plus Presumed) by means of recruitment": Table 2015 / Male - Total of Adults, Means "Unknown" - includes registers that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator "1.6 Number of victims (Identified plus Presumed) by means of recruitment": Table 2015 / Gender Unknown - Total of Adults, Means "Unknown" (protected by statistical secrecy) - includes registers that although not knowing the age (absolute value) it is known that it refers to adults.

Indicator "1.6 Number of victims (Identified plus Presumed) by means of recruitment": Table 2015 / Gender Female - Total of Adults, Means "Unknown" (22) - includes registers that although not knowing the age (absolute value) it is known that it refers to adults.

Indicator "1.6 Number of victims (Identified plus Presumed) by means of recruitment": Table 2016 / Male - Total of Adults, Means "Oral" - includes registers that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator "1.6 Number of victims (Identified plus Presumed) by means of recruitment": Table 2016 / Male - Total of Adults, Means "Unknown" - includes registers that although not knowing the age (absolute value) it is known that it refers to adult.

Indicator "1.6 Number of victims (Identified plus Presumed) by means of recruitment": Table 2016 / Gender Unknown - Total of Adults, Means "Unknown" (protected by statistical secrecy) - includes registers that although not knowing the age (absolute value) it is known that it refers to adults.

Indicator "1.6 Number of victims (Identified plus Presumed) by means of recruitment": 2014 "Other means" data is protected by statistical secrecy.

Indicator "1.6 Number of victims (Identified plus Presumed) by means of recruitment": 2015 "Other means" includes as examples through Church.

Indicator "1.6 Number of victims (Identified plus Presumed) by means of recruitment": 2016
"Other means" includes as examples through social solidarity organization.

Romania: Within other the following recruitment methods were considered: marriage promises, blackmail, abduction and/or the recruitment wasn't so evident and the victims left the country without having a concrete offer, abduction

Slovakia: Completed with File 1 for 2016

Completed with File 2 for 2014 and 2015

In appendix N°3, this table is filled in only to the victims who were statistically registered by NUCIM within criminal proceedings (identified victims).

"Other" category : Forced marriage, combination of forced marriage with sexual exploitation

In Appendix N°2, this table is filled in only to the victims who were provided with assistance from the program (Presumed victims).

Higher numbers are reported than the number of victims recorded as presumed victims who were receiving program care, since we record several forms of exploitation in some victims in the "form of exploitation" category.

United Kingdom: Data not available, we do not disaggregate by means of recruitment.

Country notes applicable to Table A1.6b

Denmark: Denmark does not register country of recruitment. No available data

Croatia: Other ways of sexual exploitation are in apartments, camps, homes, by internet, cars and hotels

Other ways of exploitation are in transit from a third countries

Other ways of labour exploitation are in massage parlours without sexual exploitation

Hungary: Unlawful Employment of Third-Country Nationals

Latvia: Number of victims (Identified plus Presumed) by means of recruitment, by form of exploitation - columns H, Q, Z (Other) - exploitative sham marriage, which usually is combined form of exploitation and might contain sexual exploitation/forced labour/domestic servitude

Portugal: Indicator 1.6b Number of victims (Identified plus Presumed) by means of recruitment, by form of exploitation: 2014 "Other means" data is protected by statistical secrecy.

Indicator 1.6b Number of victims (Identified plus Presumed) by means of recruitment, by form of exploitation: 2015 "Other means" includes as examples trough Church.

Indicator 1.6b Number of victims (Identified plus Presumed) by means of recruitment, by form of exploitation: 2016 "Other means" includes as examples trough social solidarity organization.

Romania: Within "other" the following recruitment methods were considered: marriage promises, blackmail, abduction and/or the recruitment wasn't so evident and the victims left the country without having a concrete offer, abduction

Slovakia: Completed with Excel File 1 for 2016

Completed with Excel File 2 for 2014 and 2015

In Appendix N°2, this table is filled in only to the victims who were provided with assistance from the program (Presumed victims).

In appendix N°3, this table is filled in only to the victims who were statistically registered by NUCIM within criminal proceedings (identified victims).

"Other" category : Forced marriage, combination of forced marriage with sexual exploitation

Higher numbers are reported than the number of victims recorded as presumed victims who were receiving program care, since we record several forms of exploitation in some victims in the "form of exploitation" category.

United Kingdom: Data not available, we do not disaggregate by means of recruitment.

Source: EU Member States. : Data not available. The EU28 Total reflects the total for a given year based on the countries which provided data for that year. Not all EU Member States provided data for all of the three reference years and direct comparisons of EU28 totals between years may therefore be misleading. Row totals are supplied by Member States and may not be the sum of relevant cell values.

Country notes applicable to Table A1.7

Spain: For most of the victims the destination country is Spain, for other destinations there is no reliable data. Citizenship code translate in ISO codification

Hungary: Trafficking in Human Beings (for the purpose of unlawful use of the human body)

Netherlands: No data available on country of destination. Generally, the Netherlands is a destination country with regards to trafficking routes, and possible victims are often detected as they are being exploited in the Netherlands.

No available data

Portugal: Note to Indicator 1.7) "Number of victims (Identified plus Presumed) by country of destination". This indicator can have a broader or narrowing interpretation as it can relate to migration flows (not always resulting in THB - EU Immigration Portal "Country of destination: The country which is a destination for migratory flows (legal or irregular)", or interpreted has "Destination of in fact or intended THB exploitation". In this sense, and from our understanding this indicator excludes domestic trafficking (either on Portuguese citizens or foreign citizens that have migrated to Portugal and where recruited here to THB - varying the length of time of the residence in Portugal before the recruitment to THB) as well as it excludes situations detected in Transit. In this last category, even in the cases where we know the intended country of destination, this data may have a low feasibility as one cannot guarantee that the final destination would be the suspected country and even if presented Member-states must clarified in the metadata when reporting to other countries besides their own whether this data reflected national citizens (intended) or exploited in those countries or to situations detected in transit but that the registering body knew the final destination. Consequently, data on this indicator excludes "PT as an origin country/domestic THB" as well as "PT as a Transit Country". Finally, we put to future consideration this disaggregation: Origin/Domestic; Origin/International; Destination; Transit as they can portray the flows (mobility and rotation of VoT) and, amongst other variables, breakdown by citizenship as a special attention is being directed to 3rd nationals and the vulnerability of UAM and Asylum Seekers.

Indicator 1.7) "Number of victims (Identified plus Presumed) by country of destination": Table 2014 / Total of Adults Male – PT - includes registers that although not knowing the age (absolute value) it is known that it refers to adults.

Indicator 1.7) "Number of victims (Identified plus Presumed) by country of destination": Table 2014 / Total of Female / Children– PT - includes registers that although not knowing the age (absolute value) it is known that it refers to children.

Indicator 1.7) "Number of victims (Identified plus Presumed) by country of destination": Table 2014 / Total of Female / Adults – PT - includes registers that although not knowing the age (absolute value) it is known that it refers to adults.

Indicator 1.7) "Number of victims (Identified plus Presumed) by country of destination": Table 2014 / Total of Adults Male– MZ (protected by statistical secrecy) - includes registers that although not knowing the age (absolute value) it is known that it refers to adults.

Indicator 1.7) "Number of victims (Identified plus Presumed) by country of destination": Table 2015 / Total of Female/ Adults – PT - includes registers that although not knowing the age (absolute value) it is known that it refers to adults.

Indicator 1.7) "Number of victims (Identified plus Presumed) by country of destination": Table 2015/ Total of Gender Unknown / Adults – PT (protected by statistical secrecy) - includes registers that although not knowing the age (absolute value) it is known that it refers to adults.

Indicator 1.7) "Number of victims (Identified plus Presumed) by country of destination": Table 2015/ Total of Female/ Adults – DE (protected by statistical secrecy) - includes registers that

although not knowing the age (absolute value) it is known that it refers to adults.

Indicator 1.7) "Number of victims (Identified plus Presumed) by country of destination": Table 2015 / Total of Male/ Adults – LU (protected by statistical secrecy) - includes registers that although not knowing the age (absolute value) it is known that it refers to adults.

Indicator 1.7) "Number of victims (Identified plus Presumed) by country of destination": Table 2016/ Total of male / Adults – PT - includes registers that although not knowing the age (absolute value) it is known that it refers to adults.

Indicator 1.7) "Number of victims (Identified plus Presumed) by country of destination": Table 2016/ Total of Gender Unknown / Adults – PT - includes registers that although not knowing the age (absolute value) it is known that it refers to adults.

Indicator 1.7) "Number of victims (Identified plus Presumed) by country of destination": Table 2016/ Total of male / Adults – ES - includes registers that although not knowing the age (absolute value) it is known that it refers to adults.

Romania: The total number of registered victims in 2014 was 757. Take into consideration victims having multiple destination countries.

Sweden: No data

Slovakia: Completed with File 1 for 2016

Completed with File 2 for 2014 (Except for Austria, Poland, Slovenia, Sweden, Switzerland : FILE 1)

completed with File 2 for 2015 (Except for Kuwait : FILE 1)

In appendix N°3, this table is filled in only to the victims who were statistically registered by NUCIM within criminal proceedings (identified victims).

Victims could be exploited in more than 1 country.

In Appendix N°2, this table is filled in only to the victims who were provided with assistance from the program (Presumed victims).

United Kingdom: No Data Available either in the NRM database or the NCA published stats

Source: EU Member States. : Data not available. The EU28 Total reflects the total for a given year based on the countries which provided data for that year. Not all EU Member States provided data for all of the three reference years and direct comparisons of EU28 totals between years may therefore be misleading. Row totals are supplied by Member States and may not be the sum of relevant cell values.

Country notes applicable to Table A1.9, A1.9a and A1.9d

Cyprus: Cyprus provides residence permits to recognized victims of trafficking only according to Directive 2004/81. Thus, all residence permits issued were included in the relevant rows of the table.

The table records individual persons that have applied/ received residence permits within each reporting year. Renewals of the permits within the same year are not recorded.

Age group is calculated based on year the victim was recognized by the competent authority as such.

Residence permits for reflection periods are not common, since victims are, in most cases, directly granted a year-long residence permit according to Directive 2004/81.

France: 2015 : 220 titres dont 26 cartes de résident sur le motif TEH.

2016 : 264 titres dont 38 cartes de résident sur le motif TEH.

Ireland: Ireland has opted out of Directive 2004/81/EC, however residence permits are issued under the Administrative Immigration Arrangements (<http://www.inis.gov.ie/en/INIS/Pages/PB08000021>) which is based on the Directive.

Figures refer to the number instances of "Recovery & Reflection" and first-time residence permits issued in the time period. A person may avail of both in the time period, therefore a person may be included more than once in each time period.

"Age group" is based on date on which the residence period was granted.

Victims having received a reflection period and residence permit, by gender and age: the assistance received refers to the same victims having received a reflection period and/or residence permit.

Luxembourg: The assistance received refers to the same victims having received a reflection period and/or residence permit.

Netherlands: The number of requested residence permits and granted residence permits within a year do not form cohorts due to administrative processing duration.

The number of victims offered the reflection period and applying for a residence permit within one year often overlap in terms of unique victims: many apply for a residence permit within or shortly after the three month reflection permit. As such many individuals may appear twice in the totals and thereby skew the data. There are at the moment no data available on human trafficking victims in the Netherlands that apply for other residence permits than those specifically applicable to victims of trafficking, such as asylum. This is because the Immigration and Naturalisation Service (IND) does not register victimhood as such. In consultation with the National Rapporteur, the IND is exploring how these data could be made available in future.

Portugal: Indicator "1.9 Reflection period and residence permit, by gender and age": Table 2014 "Received Assistance (Total)" – Female / Total Adults – includes registers that although not knowing the age (absolute value) it is known that it refers to adults.

Indicator "1.9 Reflection period and residence permit, by gender and age": Table 2015 – Residence Permit / Requested residence permit (total) – it is known that 1 was requested but no further information is available.

Romania: The Romanian authorities responsible with data collection in the field of anti-trafficking measures can distinguish in their measuring reports and data collection processes by the moment of the identification of the victims. Given that ability, two values of assisted victims can be presented but we choose to present here only the number of victims assisted out of the identified victims in the same period.

Slovakia: "Other category" is: Asylum seeker

United Kingdom: Directive 2004/81 doesn't apply to the UK.

Country notes applicable to Table A1.9b

Netherlands: For the number of residence permits: applications were used (so not the granting of permits)

The IND has recently started registering the form of exploitation for trafficking victims applying for permits. These data are as of yet insufficient and not representative.

No available data

Portugal: Indicator "1.9b Reflection period and residence permit, by form of exploitation" - in cases where a VoT is beneficiary of both s/he is only counted once in order to avoid double counting. Additionally, the total by form of exploitation is the aggregation of these two variables in which some registers may only refer to "residence permit" or to "reflection period". Of notice that there is for instance a case where a victim has a reflection period in one year and a residence permit in the following year.

Romania: Given the origin characteristics of Romanian rather than a destination for trafficking for other citizens than Romanians, we had no registered victims by residence permit of or reflection period for foreigners.

Slovakia: Higher numbers are reported than the number of victims recorded as presumed victims who were receiving program care, since we record several forms of exploitation in some victims in the "form of exploitation" category.

"Other" category : Slavery or practice similar to slavery ; Forced marriage

United Kingdom: Directive 2004/81 doesn't apply to the UK

Country notes applicable to Table A1.9c

Cyprus: The table records individual persons that have applied/ received residence permits within each reporting year. Renewals of the permits within the same year are not recorded.

Citizenship code translate in ISO codification

Croatia: NOTE: Refers to approved temporary stays in accordance with the Aliens Act

Netherlands: For the number of residence permits: applications were used (so not the granting of

permits)

The IND has recently started registering the form of exploitation for trafficking victims applying for permits. These data are as of yet insufficient and not representative.

Portugal: Indicator "1.9c Reflection period and residence permit, by citizenship" - in cases where a VoT is beneficiary of both s/he is only counted once in order to avoid double counting. Additionally, the total by citizenship is the aggregation of these two variables in which some registers may only refer to "residence permit" or to "reflection period".

Slovakia: In Appendix N°2, this table is filled in only to the victims who were provided with assistance from the program (Presumed victims).

Not all EU Member States provided data for all of the three reference years and direct comparisons of EU28 totals between years may therefore be misleading. Row totals are supplied by Member States and may not be the sum of relevant cell values.

Country notes applicable to Table A1.10a and A1.10b

Cyprus: Accommodation provided. The shelter is one of the options available to accommodate women victims of sexual exploitation. In case a victim does not wish to stay in the shelter, financial and other support (housing provided by NGOs) are provided for as long as required.

In 2015, 20 victims were accommodated in the shelter and in 2016, 53 victims.

Upon admission the competent Social Welfare Officer informs the victim about the shelter regulations and their rights and obligations as well. The victim may remain in the shelter for a period not exceeding four (4) weeks. However, in certain cases and circumstances accommodation can be extended. In addition information is provided concerning all the services available to support the victim.

Spain: The available data is provided in the situation report but it is referred to people in prostitution not only to victims of THB

Croatia: K61: During the placement in the foster family, the victim had a negative impact on the other person, and because of the aggressive and self-aggressive behavior she was assisted in Psychiatric hospital for children and youth, after which she returned to the foster family. As the described behavior continued, the girl was referred to a stationary observation where was concluded that it was necessary to accommodate her in the Institution for education of children and juveniles in which appropriate professional help and support would be provided and realized. In other case a stationary observation of the victim was conducted. The conclusion was that the behavioral disorders are not present and it is recommended to continue the care within the family in addition to determine the supervision measure on parental care. It is also recommended to include a minor in some form of counseling.

C60: A foreign national refused to stay in a shelter. He was seeking asylum after which temporary accommodation was secured. (two cases)

K17: For example: A stationary observation was provided for the minor. Because of the some behavior problems and the circumstances in the family, she is separated from the family and placed in the Institution for education of children and juveniles where appropriate assistance and support is provided.

B21 & J21: A female person attempted to cross the border illegally with three children (1,3 and 10 years old) - foreign nationals and was falsely represented as their mother. A special guardian were ensured for the children and they were provided with accommodation. A one-time fee for paying personal documents, purchasing necessary clothes and shoes, as well as other everyday needs has been approved. Integration of children into the educational system was ensured.

Taking into account the results of the investigative procedures, wishes and opinions of children and their parents, an assessment of the best interests of the child was carried out and the procedure of voluntary return of children to parents in their country was initiated.

K38 and K60: Victims are provided with counseling assistance and support and informed about providing other forms of help and support. They are involved in the counseling and assistance process.

Latvia:Type of assistance and support received, by gender and age - the year 2014: row 14 (Others): consultations of social worker, food, hygiene/household goods, clothing, shoes and bedding, local travel expenses (public transport tickets), or only psychological assistance

Netherlands: No data is available on the received assistance to victims because there is no central registration for these types of assistance. When a victim is registered with CoMensha, they are only aware of the purpose: only registration / registration and advice / registration and shelter.

However, all possible victims of trafficking are entitled to, at least, a reflection period of 90 days

during which they are entitled to accommodation/shelter, medical/physical/psychological assistance, legal assistance, health insurance, benefits, and integration courses. Return assistance is also provided to all possible victims that are in the process of return.

There is no data on "Assistance and support measures for child victims, including unaccompanied children and separated children", however, all unaccompanied minors are at least appointed a guardian, via the organisation NIDOS, who ensure they receive assistance.

Portugal: Note to Indicator 1.10) "Type of assistance and support received, by gender and age (Identified and Presumed)": tables 2014, 2015 and 2016 - Data not available for the variables: 1) (Re) integration assistance as this could be access by other variables already asked such as Education, Training and Job Placement; 2) Specific actions to assist and support child victims of trafficking; 3) Measures that have been adopted to carry out individual assessment of the best interest of the child as its operationalization seems unclear. Data not available to the remaining variables with the exception of "Access to Education" (blank) as it is already insert in the variable "Education" asked previously and with the disaggregation by age. If inserted it would cause double counting.

Indicator 1.10) "Type of assistance and support received, by gender and age (Identified and Presumed)": Table 2014 - Female / Total Adults "Received Assistance (total) is 72 as it includes registers that although not knowing the age (absolute value) it is known that it refers to adults.

Indicator 1.10) "Type of assistance and support received, by gender and age (Identified and Presumed)": Table 2014 - Female / Total Adults Other" (55) it includes registers that although not knowing the age (absolute value) it is known that it refers to adults.

Romania: (Re)integration assistance was not completed because all the other services that victims received and are entitled to are meant to help and empower them for the social integration.

MS have split the indicator "medical assistance" and "psychological assistance" because the measuring of these assistance services was made separately within ~other~ assistance services, ~financial help~ was considered.

ESTAT Contractor has aggregated these two categories to standardize the tables but this could lead, in some cases, to double counting.

Slovakia: For this table, we only record victims who were provided with assistance and support from a specialized program, as it result from to the nature of the data required. If HT victims did not agree to enter the program, we do not obtain any information whether they were provided with other assistance outside HT victim assistance system.

"Other" category: Financial and material assistance

United Kingdom: Data excluding Scotland

Country notes applicable to Table A1.11

Cyprus: Measures – Best interest of the child

In cases of a child victim of THB, the Social Welfare Services make a needs assessment to determine the best interest of the child in cooperation with all the departments and NGOs involved. The child is informed of his/her rights and is referred to the services needed (e.g. Mental Health Services for psychological support, health services, educational psychological services, etc.).

Luxembourg: No available data No data is available or data is not sufficiently reliable/correct to be included in the Excel document

Romania: The Romanian authorities responsible with data collection in the field of anti-trafficking measures can distinguish in their measuring reports and data collection processes by the moment of the identification of the victims. Given that ability, two values of victims cooperating with Law Enforcement can be presented.

Add information about "Number of victims cooperating with LEAs out of the total identified victims

in the same year"

United Kingdom: No Data Available - we do not collect this data in the UK.

Country notes applicable to Table A1.12

Cyprus: Unaccompanied minors

According to the Refugees Law 2000-2016, in cases where the victim is an unaccompanied minor, the minor is taken in care of the Director of Social Welfare Services, who acts as a guardian of the minor safeguarding access to all his/her rights based on the best interests of the child. In 2016, the Director of Social Welfare Services acted as a guardian of 1 child victim (male).

Romania: The Romanian authorities responsible with data collection in the field of anti-trafficking measures can distinguish in their measuring reports and data collection processes by the moment of the identification of the victims. Given that ability, two values of victims cooperating with Law Enforcement can be presented. Break in the series for 2015 and 2016.

Country notes applicable to Table A2.1a, A2.1b and A2.1c

Belgium: "CS (Serbia-Montenegro)" is replaced by "CS" "Countries of former Yugoslavia" is replaced by "EX-Y" Citizenship code translate in ISO codification

Czech Republic: "Foreigner/not Czech Republic citizen" replaced by "unknown"

Citizenship code translate in ISO codification

Croatia: show numbers of suspects against whom police officers filed criminal charges

Citizenship code translate in ISO codification

Ireland: No available data It is mostly impossible to disaggregate the data provided by the public prosecutor by sex and age.

Luxembourg: It is mostly impossible to disaggregate the data provided by the public prosecutor by sex and age.

Latvia: Persons brought into formal contact with the police and/or criminal justice system, by citizenship - data on persons brought into formal contact with the police is provided. Citizenship code translate in ISO codification

Netherlands: It is only possible to include data from the Public Prosecution Service (OM) of the Netherlands. It is not possible to link data on suspects registered by the Dutch National Police to the OM registration: these groups do not form a cohort, and because the databases are not compatible, it is unclear what the overlap and/or gaps between the groups are. Therefore, this number does not include those who have been in suspected, arrested or cautioned for a criminal offence by the police, but only the cases registered at the OM.

It is not possible to provide a breakdown by nationality, gender, or age.

No available data

Data on 2016 have not yet been analysed.

Slovakia: 2014-2015 No available data for 2016

In Appendix N°2, this table is filled in only to the victims who were provided with assistance from the program (Presumed victims).

The data relate to suspects investigated by the specialized police unit involved in investigating trafficking.

Citizenship of suspects/perpetrators is not recorded in the statistical system of the specialized police unit involved in investigating trafficking.

United Kingdom: We don't collect this data – we collect police recorded crimes, which may not have a formal suspect linked to them.

Table A 2.2: Number of persons brought into formal contact with the police and/or criminal justice system, by form of exploitation

Source: EU Member States. : Data not available. The EU28 Total reflects the total for a given year based on the countries which provided data for that year. Not all EU Member States provided data for all of the three reference years and direct comparisons of EU28 totals between years may therefore be misleading. Row totals are supplied by Member States and may not be the sum of relevant cell values.

Country notes applicable to Table A2.2

Bulgaria: "Others" category : Forced custody; Selling a child; crimes against marriage, family and youth

Spain: Data collected as unknown is referred to forced marriages

Croatia: show numbers of suspects against whom police officers filed criminal charges

Ireland: No available data It is mostly impossible to disaggregate the data provided by the public prosecutor by sex and age

Luxembourg: It is mostly impossible to disaggregate the data provided by the public prosecutor by sex and age.

Latvia: Number of persons brought into formal contact with the police and/or criminal justice system, by form of exploitation - data on persons brought into formal contact with the police is provided; rows 34, 69, 104 (Others**) - exploitative sham marriage, which usually is combined form of exploitation and might contain sexual exploitation/forced labour/domestic servitude

Netherlands: It is only possible to include data from the Public Prosecution Service (OM) of the Netherlands. It is not possible to link data on suspects registered by the Dutch National Police to the OM registration: these groups do not form a cohort, and because the databases are not compatible, it is unclear what the overlap and/or gaps between the groups are. Therefore, this number does not include those who have been in suspected, arrested or cautioned for a criminal offence by the police, but only the cases registered at the OM. It is not possible to provide a breakdown by nationality, gender, or age.

Data on 2016 have not yet been analysed.

No available data

Slovakia: Completed for 2016 :

In Appendix N°2, this table is filled in only to the victims who were provided with assistance from the program (Presumed victims).

The data relate to suspects investigated by the specialized police unit involved in investigating trafficking.

Citizenship of suspects/perpetrators is not recorded in the statistical system of the specialized police unit involved in investigating trafficking.

Completed with File 2 for 2014 and 2015

In appendix N°3, this table is filled in only to the victims who were statistically registered by NUCIM within criminal proceedings (identified victims).

"Other" category: Forced marriage, combination of forced marriage with sexual exploitation

Table A2.3: Number of persons brought into formal contact with the police and/or criminal justice system by involvement in organised crime or migrant smuggling

Country notes applicable to Table A2.3

Ireland: No available data No data is available or data is not sufficiently reliable/correct to be included in the Excel document: Persons brought into formal contact with the police on suspicion of trafficking, disaggregated by involvement in organised crime or illegal facilitation of entry, transit and residence (migrant smuggling):

Luxembourg: Non available data. No data is available or data is not sufficiently reliable/correct to be included in the Excel document

Netherlands: There are no data on people brought into formal contact with the criminal justice system and suspected involvement in other criminal activities. No available data

Slovakia: Completed with File 1 The data not recorded by the General Prosecutor's Office, nor the specialized police unit involved in trafficking

United Kingdom: We don't collect this– only one offence is recorded per crime, so we would not be able to record a link between human trafficking and wider organised crime

Country notes applicable to Table A3.1a, A3.1b and A3.1c

Czech Republic: "Persons prosecuted" - filled in for § 168 of the Criminal Code and includes the sum = Criminal prosecution + Short-form/Summary preparatory proceedings. The total number of prosecuted traffickers in Tables 3.1 - 3.3 should be the same." This requirement is met for table 3.1. and 3.2. For table. 3.3. is met for the "Decisions to Summon for Trafficking in Human Beings" line. Citizenship code translate in ISO codification

Denmark: The sheet has been filled out with the number of persons prosecuted for human trafficking divided between sex, age and nationality. Regarding 2014, only the "total" has been filled out, because the other cells in the sheet are blocked. Citizenship code translate in ISO codification

Spain: The data available is provided as annex 3 and 4 to the report

Italy: Data refers to proceedings collected after the decision of the Prosecutor Office (to start or not the penal action). Trafficking in human beings is defined in the Italian penal code by article 601. Nevertheless for THB generally is used a more a complex approach described by following articles of the Italian penal code: art. 600 (slavery reduction), art.601 (trafficking and slaves trade), art.602 (Purchase and introduction of slaves). Data consider also the laws that introducing the previous articles in the penal code and the Ratification of the Convention of Varsaw (n.163 of 2010), the law n.286 1998, art.18 concerning the Residence permit for social protection reasons. The same data definition was used to produce data delivered to EUROSTAT in the last request. Data for the only article 601 are: year 2013 129 persons prosecuted for article 601; year 2014: 85; year 2015: 159.

Citizenship code translate in ISO codification

Netherlands: Data on 2016 have not yet been analysed. Citizenship code translate in ISO codification

Slovakia: Completed with File 1 The data relate to perpetrators prosecuted by the prosecutor's offices Citizenship of suspects/perpetrators is not recorded in the statistical system of General Prosecutor's Office

United Kingdom: We are unable to break down prosecutions by citizenship/nationality

Row totals are supplied by Member States and may not be the sum of relevant cell values.

Country notes applicable to Table A3.2

Czech Republic: No legal entities have been prosecuted during the reported period, and for this reason we have only inserted a separate line in the existing tab. 3.2. in which we display 0 (the new row is labeled blue). We are not able to fill in the required structure, only as the total number of persons for the whole § 168 of the Criminal Code (identical to the number of persons in Table 3.1). Reason: The State Prosecutor's Office (and also the courts in Table 4.2) often fill in the statistical sheets for the trafficking crime according to § 168 of the Criminal Code incompletely; within statistics they highlight more the importance of reference to the paragraph 3 and its relevant letters (e.g. in case where the organized aspect is present), but the relevant basic definition distinguishing among various forms of trafficking (the form has no influence on sentence; it's influenced by the seriousness of a certain crime) is usually not filled in (paragraph 1 or 2 together with the relevant letter are defining the form of trafficking). The Ministry of Justice currently discusses how to incorporate proper control into the statistical system. Therefore we only inserted the total number for that concrete year in the "Total" line.

The total number of prosecuted traffickers in Tables 3.1 - 3.3 should be the same." This requirement is met for table 3.1. and 3.2. For table. 3.3. is met for the "Decisions to Summon for Trafficking in Human Beings" line.

Denmark: No available data We are not able to draw statistics on the purpose of exploitation. Consequently, sheet 3.2 cannot be answered.

Spain: The data available is provided as annex 3 and 4 to the report

Ireland: Data as received from the public prosecutor's office, data is incomplete. The numbers listed under "others" refer to sexual exploitation in apartments.

Luxembourg: Data as received from the public prosecutor's office, data is incomplete. The numbers listed under "others" refer to sexual exploitation in apartments.

Netherlands: The OM does not provide distinction between different forms of exploitation.No available data

Slovakia: The data relate to perpetrators prosecuted by the prosecutor's offices Citizenship of suspects/perpetrators is not recorded in the statistical system of General Prosecutor's Office

United Kingdom: Initial table different than the standard questionnaire table.

Source: EU Member States. : Data not available. The EU28 Total reflects the total for a given year based on the countries which provided data for that year. Not all EU Member States provided data for all of the three reference years and direct comparisons of EU28 totals between years may therefore be misleading. Row totals are supplied by Member States and may not be the sum of relevant cell values. Note: Decision to summon for other criminal offences was set to missing for CZ as counts were unrealistically large.

Country notes applicable to Table A3.3

Czech Republic "Decisions to summon for trafficking in human beings" - we report as Criminal prosecution + Short-form/Summary preparatory proceedings.

"Decisions to summon for other criminal offenses" we report all crimes that have been dealt with by the public prosecutor's office in the given year.

"Out of court settlements" - here we understand "settlement" as a way to terminate either criminal prosecution or Short-form/Summary preparatory proceedings for criminal offenses under § 168 of the Criminal Code; thus they are also included in the "Decisions to Summon for Trafficking in Human Beings" line. The total number of prosecuted traffickers in Tables 3.1 - 3.3 should be the same." This requirement is met for table 3.1. and 3.2. For table. 3.3. is met for the "Decisions to Summon for Trafficking in Human Beings" line.

Denmark: We have filled out the number of prosecutions (same numbers as in 3.1.)

Spain: The data available is provided as annex 3 and 4 to the report

Ireland: No available data Data as received from the public prosecutor's office The numbers listed under "others" refer to the following:

2014: Ongoing instructions: 16 Decisions to close a file/put a case ad acta: 27

2015: Ongoing instructions: 1 Ongoing decisions: 1 Decisions to close a file/put a case ad acta: 22 Denunciation: 1

2016: Ongoing instructions: 6 Ongoing decisions: 3 Closing of the proceedings : 1 Decisions to close a file/put a case ad acta: 10

Italy: These numbers refer to proceedings prosecuted for trafficking in human beings, but also registered, since the beginning, for trafficking in human beings. Consequently they do not include change of crime classification. Data refers to proceedings collected after the decision of the Prosecutor Office and concern only those proceedings start the penal action.

Luxembourg: Data as received from the public prosecutor's office The numbers listed under "others" refer to the following: 2014: Ongoing instructions: 16 Decisions to close a file/put a case ad acta: 27

2015: Ongoing instructions: 1 Ongoing decisions: 1 Decisions to close a file/put a case ad acta: 22 Denunciation: 1

2016: Ongoing instructions: 6 Ongoing decisions: 3 Closing of the proceedings 1: Decisions to close a file/put a case ad acta: 10

Netherlands: The total number of court judgements are not equal to the total number of prosecutions in the same year (in 2014: 253 vs. 279; in 2015: 285 vs. 216) because the number of prosecutions refer to cases commencing to the phase of summoning and it may take some time for they will actually appear before a court and for a verdict to be reached.

'Other' refers to cases where there is Nolle prosequi: a prosecutor's decision to voluntarily discontinue criminal charges either before trial or before a verdict is rendered. This decision can be made on several grounds and these are treated and recorded separately.

Beleidssepot (policy dismissal): Technically speaking, prosecution is possible here, but the Public Prosecutor always decides whether a prosecution is opportune or not. The decisive element here is the public interest.

Technisch sepot (technical dismissal): The choice between dismissal and prosecution in this case depends on the personal judgment of the Public Prosecution Service. It is also possible that the Public Prosecution Service will not get the proof because the perpetrator is unknown, for example.

In this case, the Public Prosecution Service can decide to suspend the prosecution that is unpredictable in advance.

Voorwaardelijk sepot (conditional dismissal): A dismissal can also be granted under certain conditions. The perpetrator is hoped to hold off similar behaviour in the future. One then speaks of a conditional dismissal

Slovakia: The data were recorded by General Prosecutor 's Office

Court Data on Judgments of Traffickers By Gender and Age

United Kingdom: We do not collect the data in the form requested.

Source: EU Member States. : Data not available. The EU28 Total reflects the total for a given year based on the countries which provided data for that year. Not all EU Member States provided data for all of the three reference years and direct comparisons of EU28 totals between years may therefore be misleading. Row totals are supplied by Member States and may not be the sum of relevant cell values.

Country notes applicable to Table A4.1

Czech Republic: Please note that while in tab. 3 is required to indicate the number of persons, in tab. No 4 requires number of judgments "Number of court judgments". However, our judiciary statistics only track the number of persons, thus tab. 4 refers only to the number of persons.

- we are not able to identify the users of services resulting from trafficking crime, who have been convicted for other crimes before 2014 (amendment to Act No. 141/2014 Coll., effective from 1 August 2014). But also in the reported years 2015 and 2016 the same applies + we are not able to distinguish "Provider" and "User" within the statistic of convictions under § 168 of the Criminal Code.

Denmark: We are only able to draw statistics on the latest conviction in the case (the highest court decision). This means that if the case has been tried in both the City Court and the District Court, only the District Court decision will show. Consequently, only "total final court decisions" has been filled out. The sheet has been filled out for both persons that are convicted and acquitted. Consequently, the total amount does not correspond to both the numbers on acquitting and convicting decisions.

Ireland: The data from the public prosecutor's office indicated the number of persons convicted/acquitted in first or second instance, disaggregated by sex, and not the number of court judgments.

Italy: Data refers to final conviction, by type of last instance (first or second) Trafficking in human beings is defined in the Italian penal code by article 601. Nevertheless for THB generally is used a more a complex approach described by following articles of the Italian penal code: art. 600 (slavery reduction), art.601 (trafficking and slaves trade), art.602 (Purchase and introduction of slaves). Data consider also the laws that introducing the previous articles in the penal code and the Ratification of the Convention of Varsaw (n.163 of 2010), the law n.286 1998, art.18 concerning the Residence permit for social protection reasons.

Luxembourg: The data from the public prosecutor's office indicated the number of persons convicted/acquitted in first or second instance, disaggregated by sex, and not the number of court judgments.

Latvia: Number of court judgments (including convictions) for trafficking in human beings: * - The total number of courts decisions (judgements) signed during the the reference period. More than one convicted person, acquitted or other person may be included in one court decision (judgement); ** - The number of persons; **** - Other kinds of decisions: the case has been referred to the pre-trial investigation (In the particular case: one criminal case with five persons); **** - Final decisions means decisions which have entered into force regardless of judicial instance (Results of the trial including the cassation instance)

Netherlands: Disaggregated data on nationality, gender, or age are not available. Only data on first instance on court judgements available.

Slovakia: Final convictions relate to criminal offence of trafficking under all applicable laws (old and new Penal Code)

United Kingdom: England and Wales Only as Northern Ireland and Scotland have provided data on convictions in tab 4.2

Country notes applicable to Table A4.2a, A4.2b and A4.2c

Czech Republic: Is the same situation as for Table 3.2. = we are not able to fill it in, the reason is already explained under 3.2. The same applies to the data for legal entities which the instruction requires to be given in the form of metadata. No legal entities have been prosecuted during the requested period, and for this reason we have only inserted a separate line in the existing tab. 4.2. in which we display 0 (the new row is labelled blue). - we are not able to identify the users of services resulting from trafficking crime, who have been convicted for other crimes before 2014 (amendment to Act No. 141/2014 Coll., effective from 1 August 2014). But also in the reported years 2015 and 2016 the same applies + we are not able to distinguish "Provider" and "User" within the statistic of convictions under § 168 of the Criminal Code.

Denmark: No available data We are not able to draw statistics on the purpose of exploitation. Consequently, sheet 3.2 cannot be answered.

Italy: Trafficking in human beings is defined in the Italian penal code by article 601. Nevertheless for THB generally is used a more a complex approach described by following articles of the Italian penal code: art. 600 (slavery reduction), art.601 (trafficking and slaves trade), art.602 (Purchase and introduction of slaves). Data consider also the laws that introducing the previous articles in the penal code and the Ratification of the Convention of Warsaw (n.163 of 2010), the law n.286 1998, art.18 concerning the Residence permit for social protection reasons.

The same data definition was used to produce data delivered to EUROSTAT in the last request.

Netherlands: The OM does not provide distinction between different forms of exploitation. No available data

Slovakia: Type of exploitation is not recorded in the statistical system of the Ministry of Justice of the Slovak Republic

United Kingdom: NI and Scotland Only as England and Wales are unable to break down convictions by form/sub-type of exploitation

Table A4.3: Freezing and confiscation of assets relating to offences of trafficking in human beings

Not all EU Member States provided data for all of the three reference years and direct comparisons of EU28 totals between years may therefore be misleading. Row totals are supplied by Member States and may not be the sum of relevant cell values.

Note: Value of property includes cash money, but also the value of real estate, cars, boats, etc...

Country notes applicable to Table A4.3

Czech Republic: "Number of freezing orders" and "Number of confiscation" data reports the number of persons - we are not able to identify the users of services resulting from trafficking crime, who have been convicted for other crimes before 2014 (amendment to Act No. 141/2014 Coll., effective from 1 August 2014). But also in the reported years 2015 and 2016 the same applies + we are not able to distinguish "Provider" and "User" within the statistic of convictions under § 168 of the Criminal Code.

Estonia: THB crimes are just one of the crimes for which confiscation is executed, the criminals have committed other related crimes as well.

Ireland: No available data No data is available or data is not sufficiently reliable/correct to be included in the Excel document: Freezing and confiscation of assets relating to offences of trafficking in human beings

Luxembourg: Non available data No data is available or data is not sufficiently reliable/correct to be included in the Excel document

Netherlands: No available data No data on number of freezing orders, confiscation orders and estimated value of either.

Poland: Value in Polish Zloty: Estimated value frozen : 2014/137000PLN; 2015/64860PLN;2016/25000PLN Estimated value recovered: 2014/137000PLN;2015/64860PLN;2016/25000PLN Indicator calculated in € based on annually average exchange rate between PLN & € (2014 = 0,23876 / 2015=0,23886 /2016=0,22900)

Slovakia: The number of freezing and confiscated assets is not recorded by General Prosecutor 's Office, nor by the Ministry of Justice. The total value is frozen and confiscated assets is not available.

United Kingdom: England and Wales Only, Northern Ireland has no record of any freezing orders for these years. Scotland did not submit data.

Value in £: Estimated value frozen:

2014=1,65m(Restraint orders)+0,07m(cash Seizures)/

2015=1,88m(Restraint orders)+0,38m(cash Seizures)/

2017=0,30m(Restraint orders)+1,43m(Cash Seizures)

Estimated value recovered: 2014=1,20m / 2015=0,92m / 2016=0,59m

Indicator calculated in € based on annually average exchange rate between £ and €

2014=1,24041 /2015=1,3769 /2016=1,22448)

Sweden		:	:	:	:	:	:	:	:	:	:	:	:	:	:	:	:	:	:	:	:	:	
United Kingdom		:	:	:	:	:	:	:	:	:	:	:	:	:	:	:	:	:	:	:	:	:	

Source: EU Member States. : Data not available. The EU28 Total reflects the total for a given year based on the countries which provided data for that year. Not all EU Member States provided data for all of the three reference years and direct comparisons of EU28 totals between years may therefore be misleading. Row totals are supplied by Member States and may not be the sum of relevant cell values.

Notes: Formal contact refers to formal contact with the police or criminal justice system. Italy reported no registered prosecutions or convictions in 2016.

Country notes applicable to Table A5

Estonia: Change of the Penal Code criminalizing the use of services of THB victims are entered into force since 6.07.2017.

Italy: For Italy is action is considered to be article 603bis of the penal code

No convictions registered in the justice central office in 2014

No convictions registered in the justice central office in 2016

Luxembourg: No data available The use of services which are objects of sexual exploitation for the purpose of trafficking of human beings is currently not a criminal offence under Luxembourgish law. Therefore, there is no data available. However, a draft law n°7008 foresees to establish as a criminal offence the use of services that are the objects of the sexual exploitation of trafficking in human beings.

Netherlands: In the Netherlands there is no specific criminalisation of the use of services which are the objects of exploitation of trafficking in human beings. Sex with minors in exchange for money is a punishable offence. However, this is treated as a sexual offence against the minor, not in the context of the use of services of a trafficking victim.

United Kingdom: We don't collect data on this as this is not an offence.

Totals and Technical Adjustments

Table A3.1 Hungary. Coding errors found in the compilation of this report has led to the exclusion of Hungarian data from Table 3.1.

Table A3.3, Czech Republic: The decision to summon for other criminal offences has numbers which are unrealistically large. The data was set to 'missing' in Annex table A3.3.

The (translated) Czech text indicates they have calculated this figure from all criminal proceedings and prosecutions minus those of section 168 rather than taking the final prosecution decisions for those being prosecuted under section 168.

Table A6: Comparisons between total counts within Annex tables

Comparison of total victim counts in each Annex table with victim count in Annex Table A1.1 2015-2016			
Annex Table	Largest count for victims (Table A1.1)	Total number of victims in Table	Gap between the two counts
Table A1.1	20,532	20,532	0
Table A1.2	20,532	19,210	1,322
Table A1.2a	20,532	19,210	1,322
Table A1.3	20,532	19,034	1,498
Table A1.4	20,532	15,973	4,559
Table A1.4a	20,532	9,837	10,695
Table A1.4b	20,532	15,750	4,782
Table A1.5a	20,532	4,858	15,674
Table A1.5b	20,532	2,820	17,712
Table A1.6a	20,532	4,047	16,485
Table A1.6b	20,532	4,060	16,472
Table A1.7	20,532	2,635	17,897

Comparison of total suspect counts in each Annex table with suspect count in Annex Table A2.2 2015-2016			
Annex Table	Largest count for suspects (Table A2.2)	Total number of suspects in Table	Gap between the two counts
Table A2.1a	7,503	7,109	394
Table A2.1b	7,503	7,109	394
Table A2.1c	7,503	7,109	394
Table A2.2	7,503	7,503	0

Comparison of total number of prosecuted persons in each Annex table with the total number of prosecuted persons in Annex Table A3.2 2015-2016			
Annex Table	Largest count for prosecutions (Table A3.2)	Total number of suspects in Table	Gap between the two counts
Table A3.1a	5,979	5,258	721
Table A3.1b	5,979	5,258	721
Table A3.1c	5,979	2,822	3,157
Table A3.2	5,979	5,979	0

Comparison of total conviction counts in each Annex table with conviction counts in Annex Table 4.2a 2015-2016			
Annex Table	Largest count for convicted persons (Table A4.2a)	Total number of convicted persons in Table	Gap between the two counts
Table A4.2a	2,927	2,927	0
Table A4.2b	2,927	2,927	0
Table A4.2c	2,927	2,927	0
